8-WEEK PROGRESSIVE MUSCLE GAIN PROGRAMME

Hypertrophy, Strength, Cardio, Breathing and Mobility

Dumbbells (3 kg and 5 kg) | Flat/Incline Bench | Step Board

Programme at a glance	
Duration	8 weeks, 56 daily schedules (Monday-Saturday training, Sunday active recovery)
Daily time	About 75-80 minutes on training days: 8 min warm-up, 45-55 min main workout, 8 min stretching, 7 min breathing (plus 15-20 min easy cardio on Wed and Fri)
Phases	Foundation (W1-2), Build (W3-4), Overload (W5-6), Peak (W7-8)
Status	DRAFT FOR REVIEW. The Excel file for Workout App V3 will only be prepared after you approve this PDF.

Programme designed for: 41-year-old male intermediate trainee, 70 kg, 5 ft 10 in, body fat 20.3%. General fitness guidance, not medical advice.

Contents

Section	Contents
Part 1	Training overview, split, phases, recovery
Progressive overload strategy	How to progress with only 3 kg and 5 kg dumbbells
Nutrition and recovery guidance	Calories, protein, realistic expectations
Part 2	Daily workout plans, Weeks 1-8 (56 days)
Part 3	Weekly progression summary
Duplicate-workout validation	Evidence that every week is distinct
Part 4	Weekly exercise variation matrix (per muscle group)
Part 5	Muscle group coverage matrix (primary and secondary)
Part 6	Tracking sheets (8 weeks), baseline and final assessment

Use the PDF bookmarks/outline panel to jump straight to any week or day.

My Fitness Profile and Goals

Item	Detail
Age	41 years
Weight	70 kg
Height	5 ft 10 in (about 178 cm)
Body fat	20.3%
Muscle mass (device reading)	75.7%
Fitness level	Intermediate
Daily time available	About 60 minutes
Running stamina	Can run continuously for 45 minutes
Primary goal	Muscle hypertrophy and strength (especially biceps), with body recomposition: build lean mass while reducing belly fat; about +3 kg lean-led body weight over roughly 10-14 weeks
Secondary goals	Cardiovascular health, respiratory fitness, mobility, flexibility, muscular endurance
Equipment	Dumbbells (one pair of 3 kg, one pair of 5 kg), workout bench (flat and incline), step board. No other equipment is used.

Part 1: Training Overview

Eight-week programme summary

The programme builds muscle with limited dumbbell weight (max 5 kg per hand) by raising difficulty through tempo, unilateral work, pauses, supersets, mechanical drop sets and tri-sets. Every week uses a different exercise selection for each muscle group, and every training day includes a targeted warm-up, a main workout, muscle-specific stretching and breathing practice.

Weekly training split (same pattern all 8 weeks, different exercises each week)

Day	Focus	Muscle groups
Monday	Chest and Back (antagonist pairs) + Biceps + Upper Abs	Chest, back, traps, biceps, forearms, upper abs, deep core
Tuesday	Quadriceps, Adductors/Abductors, Calves + Lower Abs	Quads, glutes, hips, calves, lower abs
Wednesday	Shoulders and Arms + Obliques (+ 15-20 min easy cardio)	Front/side/rear delts, biceps, brachialis, triceps, obliques
Thursday	Hamstrings, Glutes, Calves + Deep Core	Hamstrings, glutes, calves, lower back, deep core
Friday	Back, Chest Support, Biceps, Forearms + Deep Core (+ 15-20 min easy cardio)	Lats, rhomboids, traps, rear delts, chest, biceps, forearms, deep core
Saturday	Arms, Legs, Press Variations + Step-Board Cardio	Biceps, triceps, quads, shoulders, core, cardio finisher
Sunday	Active Recovery: cardio, full-body yoga, breathing	Mobility, circulation, recovery

Intensity progression

Weeks	Phase	Intensity	What changes
Weeks 1-2	Phase 1: Foundation	Medium	Straight sets; 3-4 sets of 10-15 reps; 60-75 s rest; 3 RIR. Week 2 adds a set on primary lifts and swaps every exercise pattern.
Weeks 3-4	Phase 2: Build	Medium-to-High	Antagonist and compound supersets; 3-4 s eccentrics; 45 s rest inside rounds, 60 s after the pair; 2-3 RIR.
Weeks 5-6	Phase 3: Overload	High	Supersets plus mechanical drop sets; 2 s pause reps; 4-5 s negatives; 30-45 s rest; 1-2 RIR.
Weeks 7-8	Phase 4: Peak	Advanced	Tri-sets, tempo work, controlled eccentrics, finishing exercises. Week 8 trims volume (fewer rounds) so it is hard but not an overtraining week.

Recovery strategy

• Every muscle group is trained at most twice per week, with at least 48 hours (usually 3-4 days) between hard sessions for the same group.

• Chest and back are paired on Monday and Friday (4 days apart). Quadriceps work (Tuesday) is separated from hamstring/glute work (Thursday) by a full day.
• Saturday uses lighter, higher-rep leg and arm work and a short cardio finisher so Sunday recovery can restore you for Monday.
• Sunday is a true recovery day: easy cardio, full-body yoga and breathing. It is never a second high-intensity session.
• Cardio stays low-impact: 3 min step-board warm-up, a Saturday finisher, two short fat-loss cardio sessions (Wednesday and Friday, 15-20 min easy pace) and Sunday cardio, so it supports fat loss without competing with muscle recovery.
• Sleep 7-9 hours, hydrate, and follow the nutrition guidance. If recovery signs (see Nutrition and Recovery) appear, drop one set from each exercise for a few days.

Muscle-group distribution (sessions per week with primary work)

Muscle group	Days with primary work (Weeks 1-8 pattern)
Chest	Mon, Fri, Sat (3 days)
Back (lats / mid-back)	Mon, Fri, Sat (3 days)
Shoulders	Mon, Wed, Fri, Sat (4 days)
Biceps / brachialis	Mon, Wed, Fri, Sat (4 days)
Triceps	Mon, Wed, Fri, Sat (4 days)
Forearms	Mon, Wed, Fri, Sat (4 days)
Quadriceps	Tue, Thu, Sat (3 days)
Hamstrings	Tue, Thu (2 days)
Glutes	Tue, Thu, Sat (3 days)
Calves	Tue, Thu, Sat (3 days)
Upper abs	Mon (1 days)
Lower abs	Mon, Tue, Fri, Sat (4 days)
Obliques	Mon, Wed, Fri, Sat (4 days)
Deep core	Mon, Wed, Thu, Fri, Sat (5 days)
Lower back	Mon, Thu, Fri (3 days)
Hip abductors / adductors	Tue, Wed, Thu, Sat (4 days)
Trapezius / rhomboids	Mon, Thu, Fri, Sat (4 days)

Progressive Overload and Intensity Management

Topic	Guidance
Increase repetitions	When you reach the top of the rep range on all sets with good form and 2-3 RIR, add 1-2 reps per set next session. Do not increase sets at the same time.
Increase sets	Only in Weeks 1-2 on primary lifts (3 to 4 sets). Later weeks use supersets and tri-sets instead of adding more sets, and Week 8 trims sets.
Increase time under tension	From Week 3 use 3-5 s lowering phases, from Week 5 add 2 s pauses, from Week 7 use 4-1-1 style tempos. Do this before adding any reps.
Progress exercise difficulty	With only 3 kg and 5 kg pairs, progress by making the movement harder: bilateral to unilateral (Bulgarian split squat), flat to feet-elevated push-ups, two-hand to single-arm presses.
Reduce rest	Rest drops from 60-75 s (Phase 1) to 45 s (Phase 2), 30-45 s (Phase 3) and short rests inside tri-sets (Phase 4). Reduce rest only when reps are stable.
Do not change everything at once	In any week change one or two variables only (for example tempo and rest), not reps, sets, tempo and rest together.
Reps in reserve (RIR)	Most working sets finish with 1-3 RIR. Go close to failure (0-1 RIR) only on the last set of isolation exercises (raises, curls, extensions) and on bodyweight finishers, never on loaded single-leg exercises or when form breaks.
Managing fatigue	Keep 1-3 RIR on compound lifts, protect sleep, and if two sessions in a row drop below your reps, remove one set from each exercise for 3-4 days. Week 8 is intentionally controlled.
Dumbbell weights	Only 3 kg and 5 kg pairs are used. Raises, flies, kickbacks, extensions and rotations use 3 kg; presses, rows, lunges, squats and curls use 5 kg. Holding one 5 kg dumbbell with both hands counts as the load for goblet-style moves.

Muscle Gain, Nutrition and Recovery

Topic	Guidance
Realistic expectations (body recomposition)	Goal: build muscle while reducing belly fat. Over 8 weeks expect roughly 1-1.5 kg of new lean mass and 0.5-1.5 kg of fat loss, so scale weight may rise only 0 to +1.5 kg while the waist shrinks and arms, shoulders and legs improve. Gaining 3 kg of pure muscle in 8 weeks is not realistic; about +3 kg total is a 10-14 week outcome. Fat cannot be removed from the stomach alone: belly fat falls as overall body fat falls, so waist measurement and photos matter more than the scale.
Calories	Estimated maintenance is roughly 2,450-2,600 kcal per day (varies with job activity). For recomposition eat at maintenance to a small surplus of 100-150 kcal, so about 2,550-2,700 kcal per day. If weight rises faster than 0.2 kg per week or the waist grows, reduce by 100-150 kcal; if energy and reps drop, add 100 kcal. Avoid a large surplus and avoid crash dieting.
Protein	1.8-2.0 g per kg body weight, about 125-140 g per day, split across 4-5 meals (25-35 g each).
Carbohydrate	About 4.7-5.3 g per kg, about 330-370 g per day, from rice, oats, potatoes, fruit, bread and legumes. Put a carbohydrate-rich meal within 2-3 hours before and after training.
Healthy fats	About 1.0 g per kg, about 65-75 g per day, from nuts, olive oil, eggs, fish and avocado.
Hydration	About 35-40 ml per kg per day (2.5-3 L), plus 500 ml extra on training days or hot days. Pale-yellow urine is a good guide.
Sleep and recovery	7-9 hours per night. Keep a regular schedule; avoid screens for 30 minutes before bed.
Rest between sessions	At least 48 hours between hard sessions for the same muscle group (built into the split).
Signs of inadequate recovery	Resting heart rate 5-8 bpm above normal for several mornings, persistent soreness beyond 72 hours, falling reps for two sessions, poor sleep, low mood or irritability, joint pain. Response: remove one set per exercise for 3-4 days and add 100-150 kcal.
Progress monitoring	Measure waist at the navel every week and take photos every 2 weeks; weigh yourself on the same morning each week under the same conditions; record the body-composition device figures weekly (treat as trends, they vary with hydration); take waist, chest and arm measurements every 2 weeks; log every workout.
Supplements	No steroids or unverified muscle-building products. Food comes first; creatine monohydrate (3-5 g per day) and whey protein are the only commonly evidence-backed options and are optional. Check with a doctor if you have any medical condition.
Medical note	This programme is general fitness guidance, not medical advice. At age 41, if you have any heart, blood pressure, joint or other health concerns, check with a doctor before starting.

Part 2: Detailed Daily Workout Plans

Weeks 1 to 8, all seven days per week. How to read each day: A) warm-up, B) main workout (blocks are done in order), C) stretching, D) breathing. Weights are always 3 kg or 5 kg dumbbells or bodyweight. Rest times are listed in each block.
Colour guide: blue = Phase 1, green = Phase 2, orange = Phase 3, red = Phase 4.

Week 1 | Monday (Day 1 of 56)

Chest and Back Foundation + Biceps + Upper Abs

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Chest, Back (lats / mid-back), Trapezius / rhomboids, Shoulders, Forearms, Upper abs, Biceps / brachialis, Deep core
Supporting muscles: Triceps, Lower abs
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board March with Knee Drive**	3 min, drive each knee to hip height	3 min
Dynamic mobility	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Joint activation	**Wall Angels**	8 reps	1.5 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 3 sets, Rest between sets: 75 s
Lower in 3 s, press in 1 s.

Flat Dumbbell Bench Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 sets x 10-12** Rest between sets: 75 s	Lie flat, feet planted, shoulder blades pinched. Start with dumbbells at chest level, elbows about 45 degrees from the body. Press to straight arms, lower under control to a chest stretch. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Floor Press (lying on the floor)

Block 2: STRAIGHT SETS | 3 sets, Rest between sets: 75 s
Squeeze shoulder blades for 1 s at the top.

Chest-Supported Row (incline bench) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Biceps / brachialis, Shoulders **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 sets x 10-12** Rest between sets: 75 s	Lie chest-down on the incline bench. Let arms hang, then row elbows toward the ceiling and squeeze the shoulder blades together. Lower slowly. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Bent-Over Row with light 3 kg

Block 3: STRAIGHT SETS | 3 sets, Rest between sets: 60 s
Slow 3 s lowering; stop at a comfortable chest stretch.

Incline Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 60 s	On a low incline, with a soft elbow bend, lower the arms in a wide arc to chest level and squeeze back up. Focus on the upper chest. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Flat Dumbbell Fly

Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 60 s
Move slowly; resting between each shape.

Incline-Bench Prone Y-T-W Raise Primary: Trapezius / rhomboids, Back (lats / mid-back) Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 sets x 10** Rest between sets: 60 s	Chest-down on the incline bench. Raise arms in a Y, then a T, then a W shape, with thumbs up and shoulder blades down and back, resetting between shapes. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bodyweight Y-T-W on the floor

Block 5: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Scapular Push-Up (push-up plus) Primary: Shoulders, Chest Secondary: Deep core, Trapezius / rhomboids **Weight:** Bodyweight **Difficulty:** Beginner	**2 sets x 12** Rest between sets: 30 s	In a high plank, keep arms straight and let the chest sink between the shoulder blades, then push the floor away to round the upper back slightly. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Scapular Push-Up
Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Farmer Hold Walk Primary: Forearms Secondary: Trapezius / rhomboids, Deep core **Weight:** 5 kg each hand **Difficulty:** Beginner	**3 sets x 40 s** Rest between sets: 30 s	Stand tall with shoulders back, hold the dumbbells at your sides and walk slowly in small steps for the set time. Keep ribs down and grip tight. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Static Farmer Hold
Block 7: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Slow Crunch Primary: Upper abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 15** Rest between sets: 30 s	Lie on your back, knees bent, hands by the ears. Curl the ribs toward the hips in 2 seconds, hold 1 second, and lower in 3 seconds. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Reaching Crunch
Block 8: STRAIGHT SETS | 3 sets, Rest between sets: 45 s ***Slow 3 s lowering.***		
Single-Arm Incline-Bench Preacher Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 sets x 12/arm** Rest between sets: 45 s	Rest the back of one upper arm on the top of the incline bench, arm fully extended. Curl up without lifting the elbow, squeeze 1 second, lower for 3 seconds. Finish all reps, then switch. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Concentration Curl
Block 9: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Dead Bug Primary: Deep core Secondary: Lower abs, Upper abs **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 8/side** Rest between sets: 30 s	Lie on your back, arms up, hips and knees at 90 degrees. Lower the opposite arm and leg slowly, keeping the lower back flat, then return. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Taps (bent knee)

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Thread-the-Needle	Upper back and rear shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose, Walk Hands to One Side	Lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Prayer Stretch (palms together at chest)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 1 | Tuesday (Day 2 of 56)

Quadriceps, Adductors, Calves + Lower Abs

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Quadriceps, Glutes, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Deep core, Hamstrings, Upper abs
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 48 min + stretching 8 min + breathing 7 min = about 71 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Lateral Step-Overs across the step board**	3 min, 15 per minute each direction	3 min
Dynamic mobility	**Hip Circles**	8 each direction	1.5 min
Joint activation	**Bodyweight Squat to Stand**	10 reps	1.5 min
Muscle activation	**Fire Hydrant**	8 per side	1 min
Muscle activation	**Lateral Step-Down on the step board**	6 per leg	1 min

B. Main Workout (about 48 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s ***Lower in 3 s; keep chest tall.***		
Goblet Squat Primary: Quadriceps, Glutes Secondary: Deep core **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Beginner-Intermediate	**5 sets x 12** Rest between sets: 75 s	Hold the dumbbell at the chest, feet shoulder-width. Sit down between the hips with chest tall, thighs to parallel, then drive up through the whole foot. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Squat to Bench
Block 2: STRAIGHT SETS | 4 sets, Rest between sets: 60 s		
Reverse Lunge Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 sets x 10/leg** Rest between sets: 60 s	Step back with one leg, lower until both knees are about 90 degrees, and push through the front heel to return. Alternate legs. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Reverse Lunge
Block 3: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Side-Lying Hip Abduction Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 15/side** Rest between sets: 30 s	Lie on your side with the legs straight. Raise the top leg to about 45 degrees, toes forward, and lower for 3 seconds. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Fire Hydrant
Block 4: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Side-Lying Hip Adduction Primary: Hip abductors / adductors Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 sets x 15/side** Rest between sets: 30 s	Lie on your side with the top leg bent in front on a support. Lift the straight bottom leg up to the top leg, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 45 s ***1 s pause at the top.***		
Standing Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 sets x 15** Rest between sets: 45 s	Balls of the feet on the step board edge, heels hanging. Rise high onto the toes, pause 1 second, and lower into a full stretch. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Bodyweight Calf Raise on the floor

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Reverse Crunch Primary: Lower abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 sets x 12** Rest between sets: 30 s	Lie on your back, knees at 90 degrees. Curl the hips off the floor, bringing the knees toward the chest, and lower slowly without swinging. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Knee Tuck
Block 7: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Lying Leg Raise Primary: Lower abs Secondary: Upper abs, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 10** Rest between sets: 30 s	Lie on your back with legs straight and hands under the hips. Lift the legs to vertical, then lower slowly to just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bent-Knee Leg Raise

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Quadriceps Stretch	Quadriceps and hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Side Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Low Lunge Hip-Flexor Stretch	Hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Figure-Four Glute Stretch (on the back)	Glutes and piriformis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (bent knee)	Soleus	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wide-Legged Seated Stretch	Adductors	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 1 | Wednesday (Day 3 of 56)

Shoulders and Arms + Obliques

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Shoulders, Biceps / brachialis, Triceps, Obliques, Deep core
Supporting muscles: Trapezius / rhomboids, Back (lats / mid-back), Forearms, Upper abs, Lower abs, Glutes
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step Taps (alternate foot taps with arm swing)**	3 min, steady rhythm	3 min
Dynamic mobility	**Thread-the-Needle**	5 per side	1.5 min
Joint activation	**Arm Circles, small to large**	10 each direction	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Cuban Rotation with no weight**	8 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s		
Seated Dumbbell Shoulder Press Primary: Shoulders Secondary: Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**5 sets x 10-12** Rest between sets: 75 s	Sit upright on the flat bench with core braced. Press dumbbells overhead until arms are nearly straight, lower to ear level. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Standing Press with 3 kg

Block 2: STRAIGHT SETS | 5 sets, Rest between sets: 45 s ***Lead with the elbows; 3 s lowering.***		
Standing Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**5 sets x 12-15** Rest between sets: 45 s	Stand tall with a slight forward lean. Raise arms out to the sides to shoulder height, leading with the elbows, lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Seated Lateral Raise

Block 3: STRAIGHT SETS | 4 sets, Rest between sets: 45 s		
Bent-Over Rear-Delt Raise Primary: Shoulders Secondary: Trapezius / rhomboids, Back (lats / mid-back) **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 sets x 12-15** Rest between sets: 45 s	Hinge forward with a flat back. Raise arms out to the sides with slightly bent elbows, squeezing shoulder blades gently. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Prone Incline Rear-Delt Raise

Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Alternating Dumbbell Curl Primary: Biceps / brachialis Secondary: Forearms **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 sets x 12** Rest between sets: 45 s	Stand tall, elbows pinned to the ribs. Curl one dumbbell while turning the palm up, lower slowly, and alternate. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Alternating Curl

Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Two-Hand Overhead Dumbbell Extension Primary: Triceps Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**3 sets x 12** Rest between sets: 45 s	Hold one dumbbell overhead with both hands. Bend the elbows to lower it behind the head, elbows pointed forward, and extend back up. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Seated Single-Arm Overhead Extension

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Bicycle Crunch Primary: Obliques Secondary: Upper abs, Lower abs **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 sets x 20** Rest between sets: 30 s	Hands by the ears. Bring the opposite elbow toward the opposite knee while extending the other leg, rotating through the ribs, not the neck. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches
Block 7: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Side Plank Primary: Obliques, Deep core Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Intermediate	**2 sets x 25 s/side** Rest between sets: 30 s	Elbow under the shoulder, feet stacked. Lift the hips to form a straight line and hold. Repeat on the other side. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Side Plank on knees

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Overhead Shoulder Stretch (elbow pull)	Deltoid and triceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Rear Deltoid Stretch (arm across, bent elbow)	Rear deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Prayer Stretch (palms together at chest)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Relaxation (extended-exhale) Breathing	Before the workout	2 min, 10 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk with incline or stairs	15 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 1 | Thursday (Day 4 of 56)

Hamstrings, Glutes, Calves + Deep Core

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Hamstrings, Glutes, Calves, Deep core, Lower back
Supporting muscles: Forearms, Trapezius / rhomboids
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Up-Up-Down-Down Step Pattern**	3 min, alternate the lead foot every minute	3 min
Dynamic mobility	**Leg Swings (side to side)**	10 per leg	1.5 min
Joint activation	**Hamstring Scoop (walking)**	6 per side	1.5 min
Muscle activation	**Side-Lying Hip Abduction**	10 per side	1 min
Muscle activation	**Single-Leg Glute Bridge**	6 per leg	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s
Feel the stretch behind the thighs; flat back.

Dumbbell Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**5 sets x 12** Rest between sets: 75 s	Soft knees, dumbbells close to the thighs. Push the hips back until you feel a hamstring stretch, spine neutral, then drive the hips forward. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Bodyweight Hip Hinge

Block 2: STRAIGHT SETS | 5 sets, Rest between sets: 60 s
2 s squeeze at the top.

Weighted Glute Bridge Primary: Glutes Secondary: Hamstrings **Weight:** 5 kg (one dumbbell on hips) **Difficulty:** Beginner	**5 sets x 15** Rest between sets: 60 s	Lie on your back, knees bent. Drive through the heels to lift the hips to a straight line, squeeze the glutes for 2 seconds, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Glute Bridge

Block 3: STRAIGHT SETS | 4 sets, Rest between sets: 30 s

Donkey Kick Primary: Glutes Secondary: Hamstrings **Weight:** Bodyweight **Difficulty:** Beginner	**4 sets x 15/side** Rest between sets: 30 s	On hands and knees, press one heel to the ceiling with the knee bent at 90 degrees, squeeze, and lower without arching the back. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge

Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 45 s

Seated Calf Raise (dumbbells on knees) Primary: Calves Secondary: - **Weight:** 5 kg each hand (resting on the knees) **Difficulty:** Beginner-Intermediate	**3 sets x 15** Rest between sets: 45 s	Sit on the bench with the balls of the feet on the step board. Rest the dumbbells on the knees, lift the heels as high as possible and lower slowly. Targets the soleus. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise

Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 30 s

Bird-Dog Primary: Deep core, Lower back Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 8/side** Rest between sets: 30 s	On hands and knees, extend the opposite arm and leg, hold 2 seconds without rotating the hips, and return slowly. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Superman Hold Primary: Lower back Secondary: Glutes, Trapezius / rhomboids **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 10** Rest between sets: 30 s	Lie face down with arms extended. Lift arms, chest and legs a few centimetres, hold 2 seconds, and lower. Keep the neck neutral. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Bird-Dog

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Seated Forward Fold	Hamstrings and lower back	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Hamstring Stretch	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Knee-to-Chest Hug	Glutes and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (straight knee)	Gastrocnemius	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Lower back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 1 | Friday (Day 5 of 56)

Back, Chest Support and Forearms + Biceps + Deep Core

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Back (lats / mid-back), Lower back, Chest, Trapezius / rhomboids, Forearms, Deep core, Biceps / brachialis
Supporting muscles: Hamstrings, Triceps, Shoulders, Upper abs, Glutes
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Overhead Reach**	3 min, reach the opposite arm up on each step	3 min
Dynamic mobility	**Standing Trunk Rotation**	10 per side	1.5 min
Joint activation	**Cat-Cow**	8 slow reps	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s		
Bent-Over Dumbbell Row (two arms) Primary: Back (lats / mid-back), Lower back Secondary: Biceps / brachialis, Forearms, Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**5 sets x 10-12** Rest between sets: 75 s	Hinge forward with a flat back and soft knees. Row both dumbbells to the lower ribs, pause, then lower under control. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row

Block 2: STRAIGHT SETS | 5 sets, Rest between sets: 60 s		
Incline Push-Up (hands on bench) Primary: Chest Secondary: Triceps, Shoulders **Weight:** Bodyweight **Difficulty:** Beginner	**5 sets x 12-15** Rest between sets: 60 s	Hands on the flat bench, body straight from head to heels. Lower the chest to the bench edge and press away. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Push-Up

Block 3: STRAIGHT SETS | 5 sets, Rest between sets: 45 s		
Dumbbell Shrug with 3-Second Squeeze Primary: Trapezius / rhomboids Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner	**5 sets x 12** Rest between sets: 45 s	Stand tall, dumbbells at your sides. Lift shoulders straight up toward the ears, hold 3 seconds, and lower slowly. Do not roll the shoulders. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Seated Shrug

Block 4: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 sets x 15** Rest between sets: 30 s	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise

Block 5: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 sets x 15** Rest between sets: 30 s	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Forearm Plank Primary: Deep core Secondary: Upper abs, Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 sets x 30 s** Rest between sets: 30 s	Forearms on the floor, body straight, glutes tight, ribs pulled down. Hold while breathing steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees
Block 7: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Seated Alternating Curl with Supination Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 sets x 12** Rest between sets: 45 s	Sit upright on the bench. Curl one arm at a time, rotating the palm up as you lift, and lower slowly. No leaning or swinging. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
Block 8: STRAIGHT SETS | 3 sets, Rest between sets: 20 s		
Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 20 s** Rest between sets: 20 s	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Lat Stretch (hands on bench)	Lats and chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Thoracic Twist	Mid-back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cross-Body Shoulder Stretch	Rear and side deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Extensor Stretch (palm down, fingers pulled in)	Wrist extensors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Easy jog	15 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 1 | Saturday (Day 6 of 56)

Arms, Legs, Chest-Lat Pump + Step-Board Cardio

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Biceps / brachialis, Forearms, Triceps, Quadriceps, Glutes, Chest, Back (lats / mid-back), Obliques
Supporting muscles: Calves, Deep core
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board Side Touch and Return**	3 min, light and quick	3 min
Dynamic mobility	**Arm Circles**	10 each direction	1.5 min
Joint activation	**Walking Knee Hugs**	10 steps	1.5 min
Muscle activation	**Bodyweight Squat**	10 reps	1 min
Muscle activation	**Prone Y Raise on the floor**	8 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 45 s		
Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**5 sets x 12** Rest between sets: 45 s	Neutral (thumbs-up) grip. Curl both dumbbells without swinging, squeezing the biceps and brachialis at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Cross-Body Hammer Curl
Block 2: STRAIGHT SETS | 5 sets, Rest between sets: 45 s		
Dumbbell Triceps Kickback Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**5 sets x 12** Rest between sets: 45 s	Hinge forward, upper arms parallel to the floor. Extend the forearms back until straight, squeeze, and return slowly. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Bench Dip
Block 3: STRAIGHT SETS | 5 sets, Rest between sets: 60 s		
Step-Up (step board) Primary: Quadriceps, Glutes Secondary: Calves **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**5 sets x 10/leg** Rest between sets: 60 s	Place the whole foot on the step board, drive through the heel to stand tall, and lower slowly with control. Complete reps on one leg, then switch. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lower step with bodyweight only
Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 60 s		
Dumbbell Pullover (across flat bench) Primary: Chest, Back (lats / mid-back) Secondary: Triceps, Deep core **Weight:** 5 kg (one dumbbell, both hands) **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 60 s	Lie across the bench with upper back supported, hips low. With soft elbows, lower the dumbbell behind the head until the chest and lats stretch, then pull it back over the chest. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Pullover (lying on floor)
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Alternating Heel Touches Primary: Obliques Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 20** Rest between sets: 30 s	Lie on your back, knees bent, shoulders slightly lifted. Reach alternately to each heel with the same-side hand. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bicycle Crunch

Cardio finisher (6 min): Step-Board Interval Finisher: 6 rounds of 30 s brisk step-ups + 30 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half-Kneeling Hip-Flexor Stretch with overhead reach	Hip flexors and side body	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Quadriceps Stretch	Quadriceps and hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 1 | Sunday (Day 7 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 1: Foundation (Medium Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 22 min + yoga 25 min + breathing 9 min = about 56 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Brisk Walk	22 min	Easy conversational pace, RPE 4 of 10. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Hips and Hamstrings Flow (25 min)

Pose / stretch	Time	Target	Breathing
Cat-Cow	2 min	Spine mobility	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Child's Pose	2 min	Lower back, hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Low Lunge (each side)	4 min	Hip flexors, quads	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Pigeon Pose (each side)	4 min	Glutes, hip rotators	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Seated Forward Fold	3 min	Hamstrings, back	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Hamstring Stretch (each side)	3 min	Hamstrings	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Happy Baby	2 min	Hips, adductors	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Reclined Butterfly	2 min	Adductors	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Spinal Twist (each side)	3 min	Spine, glutes	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before cardio	3 min, 18 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Pursed-Lip Breathing	After yoga (rest and recovery)	6 min, 60 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 2 | Monday (Day 8 of 56)

Chest and Back (Upper Chest, Lat Focus) + Biceps + Upper Abs

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Chest, Back (lats / mid-back), Trapezius / rhomboids, Forearms, Obliques, Upper abs, Biceps / brachialis, Deep core, Lower abs
Supporting muscles: Shoulders, Triceps, Lower back
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Lateral Step-Overs across the step board**	3 min, 15 per minute each direction	3 min
Dynamic mobility	**Cat-Cow**	8 slow reps	1.5 min
Joint activation	**Standing Trunk Rotation**	10 per side	1.5 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 4 sets, Rest between sets: 75 s ***Added a set versus Week 1; lower in 3 s.***		
Incline Dumbbell Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 sets x 10-12** Rest between sets: 75 s	Set the bench to a low-medium incline. Keep shoulder blades back. Press up and slightly together over the upper chest, lower slowly to upper-chest level. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up (hands on bench)
Block 2: STRAIGHT SETS | 4 sets, Rest between sets: 60 s		
Single-Arm Dumbbell Row (hand and knee on bench) Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Forearms, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**4 sets x 10-12/side** Rest between sets: 60 s	Hand and same-side knee on the bench, back flat. Row the dumbbell toward the hip, elbow close to the body, squeeze the lat, and lower to a full stretch. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Two-Arm Bent-Over Row
Block 3: STRAIGHT SETS | 3 sets, Rest between sets: 60 s		
Flat Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 sets x 12-15** Rest between sets: 60 s	Lie flat, arms slightly bent. Open the arms in a wide arc until you feel a chest stretch, then bring the dumbbells back over the chest as if hugging a tree. Keep elbow bend fixed. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Fly (lying on floor)
Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 60 s		
Wide-Elbow Bent-Over Row (rear-back emphasis) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Shoulders, Lower back **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 60 s	Hinge forward, palms facing down. Row with elbows flared to 90 degrees, aiming at the rear delts and upper back. Squeeze for 1 second. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Suitcase Hold (single dumbbell) Primary: Forearms, Obliques Secondary: Deep core, Trapezius / rhomboids **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**3 sets x 30 s/side** Rest between sets: 30 s	Hold one dumbbell at your side without leaning toward it. Stand tall for the set time, then switch hands. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Farmer Hold Walk

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Reaching Crunch (long arms) Primary: Upper abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 sets x 15** Rest between sets: 30 s	Lie on your back with arms overhead. Curl up and reach for the knees, then lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
Block 7: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Drag Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 45 s	Keep the dumbbells touching the front of the body and drag them up the torso by pulling the elbows back. Squeeze the biceps at the top and lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
Block 8: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Hollow Body Hold (bent-knee version first) Primary: Deep core, Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 20 s** Rest between sets: 30 s	Lie on your back, press the lower back down, lift shoulders and legs slightly, and hold. Bend the knees to make it easier. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cat-Cow	Spine and back extensors	10 slow reps (about 4 s per rep)	Inhale as you arch, exhale as you round
Kneeling Lat Stretch (hands on bench)	Lats and chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen
Reverse Prayer Stretch	Wrist and forearm	20 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 2 | Tuesday (Day 9 of 56)

Quadriceps Emphasis, Hips, Calves + Lower Abs

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Quadriceps, Glutes, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Deep core, Hamstrings, Upper abs
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 48 min + stretching 8 min + breathing 7 min = about 71 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step Taps (alternate foot taps with arm swing)**	3 min, steady rhythm	3 min
Dynamic mobility	**World's Greatest Stretch**	4 per side	1.5 min
Joint activation	**Leg Swings (front to back)**	10 per leg	1.5 min
Muscle activation	**Lateral Step-Down on the step board**	6 per leg	1 min
Muscle activation	**Glute Bridge**	12 reps	1 min

B. Main Workout (about 48 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s		
Heel-Elevated Goblet Squat (heels on step board) Primary: Quadriceps Secondary: Glutes, Deep core **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**5 sets x 12** Rest between sets: 75 s	Place heels on the step board. Squat deeply, keeping the torso upright and knees tracking over the toes for quad emphasis. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Goblet Squat
Block 2: STRAIGHT SETS | 4 sets, Rest between sets: 75 s ***Hold a wall or the bench for balance if needed.***		
Bulgarian Split Squat Primary: Quadriceps, Glutes Secondary: Hamstrings, Deep core **Weight:** 5 kg each hand **Difficulty:** Advanced	**4 sets x 8-10/leg** Rest between sets: 75 s	Rear foot on the bench, front foot about a stride ahead. Lower the back knee toward the floor with the torso upright and drive up through the front heel. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Static Split Squat
Block 3: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Fire Hydrant Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 15/side** Rest between sets: 30 s	On hands and knees, lift one knee out to the side while the hips stay level, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Side-Lying Hip Abduction
Block 4: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Cossack Squat Primary: Hip abductors / adductors, Quadriceps Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**2 sets x 8/side** Rest between sets: 30 s	Wide stance. Shift your weight to one side, sit into a deep one-leg squat while the opposite leg straightens, then switch sides. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lateral Lunge
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Single-Leg Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg (one dumbbell in the working hand) **Difficulty:** Intermediate	**3 sets x 12/leg** Rest between sets: 45 s	Stand on one foot on the step board edge, hold a wall for balance. Rise up fully, pause, and lower slowly past the step level. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Two-leg Calf Raise

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Flutter Kicks Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 30 s** Rest between sets: 30 s	Lie on your back with the lower back pressed to the floor. Make small alternating kicks with straight legs held just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Alternating Leg Lowers

Block 7: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Bench Knee Tuck Primary: Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 30 s	Sit on the bench edge, lean back slightly, and draw the knees to the chest while curling the pelvis, then extend slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Reverse Crunch

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Lying Side Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Couch-Style Wall Quad Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half-Kneeling Hip-Flexor Stretch with overhead reach	Hip flexors and side body	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Glute Stretch (ankle on knee)	Glutes	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Downward Dog Pedal	Calves and hamstrings	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Butterfly Stretch	Adductors and hips	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 2 | Wednesday (Day 10 of 56)

Shoulder Variations and Arms + Obliques

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Shoulders, Biceps / brachialis, Triceps, Obliques
Supporting muscles: Trapezius / rhomboids, Back (lats / mid-back), Upper abs, Deep core
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 48 min + stretching 8 min + breathing 7 min = about 71 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Up-Up-Down-Down Step Pattern**	3 min, alternate the lead foot every minute	3 min
Dynamic mobility	**Cross-Body Arm Swings**	10 reps	1.5 min
Joint activation	**Shoulder Rolls**	10 backward	1.5 min
Muscle activation	**Cuban Rotation with no weight**	8 reps	1 min
Muscle activation	**Side-Lying External Rotation, no weight**	8 per side	1 min

B. Main Workout (about 48 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s		
Arnold Press Primary: Shoulders Secondary: Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**5 sets x 10-12** Rest between sets: 75 s	Start with palms facing you at chin level. Rotate the palms outward as you press up, reverse the motion on the way down. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Seated Dumbbell Shoulder Press

Block 2: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Leaning Single-Arm Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 sets x 12-15/side** Rest between sets: 45 s	Hold a bench edge with one hand, lean away, and raise the other arm out to the side. The lean increases tension at the bottom of the rep. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise

Block 3: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Incline-Bench Prone Rear-Delt Raise Primary: Shoulders Secondary: Trapezius / rhomboids, Back (lats / mid-back) **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**3 sets x 12-15** Rest between sets: 45 s	Chest-down on the incline bench. Raise dumbbells out to the sides with thumbs pointing slightly up and pause at the top. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bent-Over Rear-Delt Raise

Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Incline Dumbbell Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 45 s	Sit back on the incline bench, arms hanging behind the torso. Curl without moving the elbows forward to stretch the long head. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl

Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Single-Arm Overhead Extension (seated) Primary: Triceps Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 sets x 10-12/side** Rest between sets: 45 s	Sit tall, one arm overhead. Lower the dumbbell behind the head by bending only the elbow, then extend. Finish all reps, then switch. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Russian Twist Primary: Obliques Secondary: Upper abs, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 sets x 20** Rest between sets: 30 s	Sit leaning back with the feet lifted or on the floor. Rotate the torso side to side, touching the dumbbell near each hip. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Russian Twist, feet on floor

Block 7: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Side Plank Hip Dip Primary: Obliques Secondary: Deep core, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**2 sets x 12/side** Rest between sets: 30 s	In a side plank, lower the hip to just above the floor and lift back to the line with control. Repeat on both sides. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Side Plank

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Rear Deltoid Stretch (arm across, bent elbow)	Rear deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Eagle Arms Stretch	Upper back and rear deltoids	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen
Reverse Prayer Stretch	Wrist and forearm	20 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Gentle Rib-Cage Expansion Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk	15 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 2 | Thursday (Day 11 of 56)

Hamstrings and Glutes (Unilateral) + Deep Core

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Hamstrings, Glutes, Calves, Deep core, Lower back, Trapezius / rhomboids
Supporting muscles: Quadriceps, Shoulders
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 44 min + stretching 8 min + breathing 7 min = about 67 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Overhead Reach**	3 min, reach the opposite arm up on each step	3 min
Dynamic mobility	**Hip Hinge with a hold**	8 reps	1.5 min
Joint activation	**Inchworm walk-outs**	5 reps	1.5 min
Muscle activation	**Single-Leg Glute Bridge**	6 per leg	1 min
Muscle activation	**Donkey Kick**	8 per side	1 min

B. Main Workout (about 44 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 5 sets, Rest between sets: 75 s		
Single-Leg Romanian Deadlift (hand supported) Primary: Hamstrings, Glutes Secondary: Lower back, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**5 sets x 10/leg** Rest between sets: 75 s	Hold the dumbbell in the hand opposite the standing leg. Hinge on one leg, back leg extending, then return by driving the hips forward. Lightly touch a wall for balance if needed. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Staggered-Stance RDL
Block 2: STRAIGHT SETS | 5 sets, Rest between sets: 60 s		
Bench Hip Thrust Primary: Glutes Secondary: Hamstrings, Quadriceps **Weight:** 5 kg (one dumbbell on hips) **Difficulty:** Intermediate	**5 sets x 12** Rest between sets: 60 s	Upper back on the bench, feet flat. Drive the hips up with a tucked chin and strong squeeze at the top, lower with control. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 3: STRAIGHT SETS | 5 sets, Rest between sets: 45 s		
Feet-Elevated Hamstring Bridge (heels on step board) Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**5 sets x 12** Rest between sets: 45 s	Lie on your back with heels on the step board, knees slightly bent. Press heels down and lift the hips to a straight line, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Calf Raise, Toes Turned Out (V-stance) Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 sets x 15** Rest between sets: 45 s	Turn the toes out about 30 degrees on the step board edge. Rise slowly, squeeze the inner calf, and lower for 3 seconds. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Bear Hold (knees hovering) Primary: Deep core Secondary: Shoulders, Quadriceps **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 20 s** Rest between sets: 30 s	From hands and knees, lift the knees 2 cm off the floor. Keep the back flat and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Prone Snow Angel Primary: Lower back, Trapezius / rhomboids Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 10** Rest between sets: 30 s	Lie face down, arms by sides and lifted slightly. Sweep the arms overhead and back to the hips while keeping the chest slightly lifted. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Prone Cobra Hold

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Supine Hamstring Stretch	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half Split (kneeling)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Figure-Four Glute Stretch (on the back)	Glutes and piriformis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (bent knee)	Soleus	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Lower back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 2 | Friday (Day 12 of 56)

Back Thickness, Push-Up Strength and Forearms + Biceps

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Back (lats / mid-back), Chest, Shoulders, Lower back, Trapezius / rhomboids, Forearms, Biceps / brachialis, Deep core, Obliques
Supporting muscles: Triceps, Glutes
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 46 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board Side Touch and Return**	3 min, light and quick	3 min
Dynamic mobility	**Arm Circles (forward and backward)**	10 each direction	1.5 min
Joint activation	**Thread-the-Needle**	5 per side	1.5 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min

B. Main Workout (about 46 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 4 sets, Rest between sets: 75 s		
Underhand Bent-Over Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 sets x 10-12** Rest between sets: 75 s	Hinge forward with palms facing up. Row toward the lower belly, elbows brushing the sides, squeeze lats at the top. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row
Block 2: STRAIGHT SETS | 3 sets, Rest between sets: 60 s ***Use incline push-ups if you cannot reach 8 clean reps.***		
Standard Push-Up Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 8-12** Rest between sets: 60 s	Hands slightly wider than shoulders, body in a straight line. Lower the chest to the floor under control, press back up without sagging the hips. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up (hands on bench) or knee push-up
Block 3: STRAIGHT SETS | 2 sets, Rest between sets: 30 s		
Side-Lying External Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**2 sets x 12/side** Rest between sets: 30 s	Lie on your side, elbow bent 90 degrees against the ribs. Rotate the forearm up toward the ceiling slowly, then lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Cuban Rotation with no weight
Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Prone Cobra Hold Primary: Lower back, Trapezius / rhomboids Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 20 s** Rest between sets: 30 s	Lie face down, hands by the ribs. Lift the chest slightly using the back muscles (not the hands), squeeze shoulder blades together and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Superman Hold
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Hammer-Grip Wrist Raise Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 sets x 12/hand** Rest between sets: 30 s	Forearm on the thigh, thumb up. Raise and lower only the wrist (radial deviation), slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl

Block 6: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 30 s	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Block 7: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
High Plank Shoulder Tap Primary: Deep core, Obliques Secondary: Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 sets x 10/side** Rest between sets: 30 s	From a high plank with feet wide, tap one shoulder with the opposite hand while keeping the hips still. Alternate. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Plank with knees down
Block 8: STRAIGHT SETS | 3 sets, Rest between sets: 45 s		
Incline Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 45 s	Sit back on the incline bench with arms hanging, thumbs up. Curl without moving the elbows forward, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Block 9: STRAIGHT SETS | 3 sets, Rest between sets: 20 s		
Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 sets x 25 s** Rest between sets: 20 s	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Overhead Side Reach	Lats and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Thread-the-Needle	Upper back and rear shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Shoulder Stretch (elbow pull)	Deltoid and triceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Prayer Stretch (palms together at chest)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Step-board steady rhythm	15 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 2 | Saturday (Day 13 of 56)

Arms, Unilateral Legs, Shoulders + Step-Board Cardio

Phase 1: Foundation (Medium Intensity)
Intensity target: 3 RIR (stop 3 reps before failure)

Target muscles (primary): Biceps / brachialis, Triceps, Chest, Quadriceps, Glutes, Shoulders, Obliques
Supporting muscles: Hamstrings, Deep core
Method this week: Conventional straight sets, controlled 2-3 s lowering
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Hamstring Curl Finish**	3 min, curl the trailing heel toward the glute	3 min
Dynamic mobility	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Joint activation	**Hip Circles**	8 each direction	1.5 min
Muscle activation	**Prone Y Raise on the floor**	8 reps	1 min
Muscle activation	**Incline Push-Up (easy)**	8 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: STRAIGHT SETS | 4 sets, Rest between sets: 45 s		
Seated Concentration Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**4 sets x 12/arm** Rest between sets: 45 s	Sit on the bench edge, elbow on inner thigh. Curl the dumbbell to the shoulder, squeeze 1 second, lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
Block 2: STRAIGHT SETS | 4 sets, Rest between sets: 60 s		
Close-Grip Neutral Dumbbell Press Primary: Triceps, Chest Secondary: Shoulders **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 sets x 12** Rest between sets: 60 s	Lie flat, dumbbells touching, palms facing. Press straight up with elbows tucked, then lower slowly to the lower chest. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Diamond Push-Up on knees
Block 3: STRAIGHT SETS | 4 sets, Rest between sets: 60 s		
Static Split Squat (2-second pause) Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 sets x 10/leg** Rest between sets: 60 s	Hold a split stance. Lower straight down, pause 2 seconds with the back knee just above the floor, and drive up. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 60 s ***Use an incline pike with hands on the bench if needed.***		
Pike Push-Up Primary: Shoulders Secondary: Triceps, Chest, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**3 sets x 8-10** Rest between sets: 60 s	Hips high in an inverted V, hands shoulder-width. Bend elbows to lower the head toward the floor between the hands, then press back up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Hands-on-bench Incline Pike Push-Up
Block 5: STRAIGHT SETS | 3 sets, Rest between sets: 30 s		
Side-Lying Oblique Crunch Primary: Obliques Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 sets x 12/side** Rest between sets: 30 s	Lie on your side, knees bent. Lift the top shoulder and hips toward each other by crunching the side abs, then lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches

Cardio finisher (7 min): Step-Board Interval Finisher: 7 rounds of 30 s brisk step-ups + 30 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Hip-Flexor Stretch	Hip flexors and quads	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Side Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 2 | Sunday (Day 14 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 1: Foundation (Medium Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 20 min + yoga 25 min + breathing 9 min = about 54 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Easy Jog	20 min	Comfortable pace you can talk at, RPE 4-5 of 10. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Spine and Shoulders Flow (25 min)

Pose / stretch	Time	Target	Breathing
Cat-Cow	2 min	Spine mobility	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Thread-the-Needle (each side)	3 min	Upper back, shoulders	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Sphinx Pose	2 min	Spine extension	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Cobra Pose	2 min	Chest, abs	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Child's Pose with Arms Extended	2 min	Lats, shoulders	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Puppy Pose	3 min	Shoulders, chest	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Eagle Arms (seated, each side)	2 min	Upper back	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Cow-Face Arms with strap-free hand reach	3 min	Shoulders, triceps	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Seated Twist (each side)	3 min	Spine, obliques	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Spinal Twist (each side)	3 min	Lower back	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before cardio	3 min, 30 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Box Breathing (gentle)	After yoga (rest and recovery)	6 min, 22 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 3 | Monday (Day 15 of 56)

Chest-Back Supersets + Biceps + Upper Abs

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Chest, Back (lats / mid-back), Trapezius / rhomboids, Lower back, Forearms, Biceps / brachialis, Upper abs, Deep core, Lower abs
Supporting muscles: Triceps, Shoulders, Glutes
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step Taps (alternate foot taps with arm swing)**	3 min, steady rhythm	3 min
Dynamic mobility	**Thread-the-Needle**	5 per side	1.5 min
Joint activation	**Arm Circles (forward and backward)**	10 each direction	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Antagonist superset. 3 s lowering on both.***		
A Dumbbell Squeeze Press Primary: Chest Secondary: Triceps, Shoulders **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 12-15**	Lie flat, palms facing each other, dumbbells pressed together. Keep squeezing inward hard as you press straight up from mid-chest and lower back down. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Push-Up on knees
B Staggered-Stance Lawnmower Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Deep core, Glutes **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Split stance, hinge forward, dumbbell in the hand opposite the front foot. Row like starting a lawnmower, keeping hips square. Switch sides after all reps. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row on bench

Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Antagonist superset.***		
A Dumbbell Squeeze Fly Primary: Chest Secondary: Triceps **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12-15**	Lie flat holding the dumbbells together above the chest. Keeping inward pressure, open the elbows wide to chest height, then close back up with a hard inner-chest squeeze. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Svend-style squeeze press with one 5 kg dumbbell held between palms
B Incline-Bench Prone Y-T-W Raise Primary: Trapezius / rhomboids, Back (lats / mid-back) Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Chest-down on the incline bench. Raise arms in a Y, then a T, then a W shape, with thumbs up and shoulder blades down and back, resetting between shapes. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bodyweight Y-T-W on the floor

Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Antagonist superset.***		
A Incline Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	On a low incline, with a soft elbow bend, lower the arms in a wide arc to chest level and squeeze back up. Focus on the upper chest. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Flat Dumbbell Fly
B Prone Snow Angel Primary: Lower back, Trapezius / rhomboids Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 10**	Lie face down, arms by sides and lifted slightly. Sweep the arms overhead and back to the hips while keeping the chest slightly lifted. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Prone Cobra Hold
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat. ***Forearm flexor-extensor superset.***		
A Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
B Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Biceps-brachialis superset.***		
A Single-Arm Incline-Bench Preacher Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/arm**	Rest the back of one upper arm on the top of the incline bench, arm fully extended. Curl up without lifting the elbow, squeeze 1 second, lower for 3 seconds. Finish all reps, then switch. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Concentration Curl
B Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Dumbbell-Weighted Crunch Primary: Upper abs Secondary: - **Weight:** 3 kg (one dumbbell on chest) **Difficulty:** Intermediate	**3 rounds: 15**	Hold a 3 kg dumbbell on the chest. Curl the shoulder blades off the floor, pause at the top, and lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
B Hollow Body Hold (bent-knee version first) Primary: Deep core, Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 20 s**	Lie on your back, press the lower back down, lift shoulders and legs slightly, and hold. Bend the knees to make it easier. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose with Arms Extended	Lats and spine	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Overhead Side Reach	Lats and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Flexor Stretch (palm up, fingers pulled down)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Relaxation (extended-exhale) Breathing	Before the workout	2 min, 10 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 3 | Tuesday (Day 16 of 56)

Quadriceps-Hamstring Supersets, Calves + Lower Abs

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Quadriceps, Glutes, Hip abductors / adductors, Hamstrings, Calves, Lower abs
Supporting muscles: Deep core, Lower back, Obliques
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Up-Up-Down-Down Step Pattern**	3 min, alternate the lead foot every minute	3 min
Dynamic mobility	**Walking Knee Hugs**	10 steps	1.5 min
Joint activation	**Ankle Rocks**	10 per side	1.5 min
Muscle activation	**Glute Bridge**	12 reps	1 min
Muscle activation	**Fire Hydrant**	8 per side	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Quad-hamstring superset, 3 s lowering.***		
A Sumo Goblet Squat Primary: Quadriceps, Glutes, Hip abductors / adductors Secondary: Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**4 rounds: 15**	Wide stance, toes turned out about 45 degrees, dumbbell hanging between the legs. Lower with knees tracking over toes and squeeze the glutes and inner thighs to stand. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Goblet Squat
B Feet-Elevated Hamstring Bridge (heels on step board) Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**4 rounds: 12**	Lie on your back with heels on the step board, knees slightly bent. Press heels down and lift the hips to a straight line, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Step-Up (step board) Primary: Quadriceps, Glutes Secondary: Calves **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 10/leg**	Place the whole foot on the step board, drive through the heel to stand tall, and lower slowly with control. Complete reps on one leg, then switch. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lower step with bodyweight only
B Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Fire Hydrant Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	On hands and knees, lift one knee out to the side while the hips stay level, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Side-Lying Hip Abduction
B Side-Lying Hip Adduction Primary: Hip abductors / adductors Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your side with the top leg bent in front on a support. Lift the straight bottom leg up to the top leg, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat

Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 30 s *3 s lowering.*		
Calf Raise, Toes Turned In Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 sets x 15** Rest between sets: 30 s	Turn the toes slightly inward, rise to the balls of the feet, pause 1 second, and lower slowly into a full stretch. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Bench Leg Raise (hands gripping bench edge) Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**3 rounds: 10**	Lie on the bench, hands behind you gripping the edge. Raise straight legs to vertical and lower slowly without arching the back. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Leg Raise
B Scissor Kicks Primary: Lower abs Secondary: Obliques, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 30 s**	Lie on your back with the legs slightly off the floor. Cross the legs over each other in a controlled scissor motion. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Flutter Kicks

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Couch-Style Wall Quad Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Hip-Flexor Stretch	Hip flexors and quads	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Pigeon Pose	Glutes and hip rotators	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Step-Board Heel Drop Stretch	Calves	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Frog Stretch	Adductors	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 3 | Wednesday (Day 17 of 56)

Shoulder and Arm Supersets + Obliques

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Shoulders, Deep core, Biceps / brachialis, Triceps, Forearms, Obliques
Supporting muscles: Glutes, Lower abs
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 46 min + stretching 8 min + breathing 7 min = about 69 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Overhead Reach**	3 min, reach the opposite arm up on each step	3 min
Dynamic mobility	**Wall Angels**	8 reps	1.5 min
Joint activation	**Wrist Circles and Finger Spreads**	10 each direction	1.5 min
Muscle activation	**Side-Lying External Rotation, no weight**	8 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 46 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Push-pull superset.***		
A Half-Kneeling Single-Arm Press Primary: Shoulders, Deep core Secondary: Triceps **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**4 rounds: 10/side**	Kneel on one knee with the dumbbell at the shoulder on the side of the kneeling knee. Squeeze the glutes, keep ribs down, press overhead and lower slowly. Finish all reps, then switch sides. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Seated Single-Arm Press
B Side-Lying Rear-Delt Raise Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**4 rounds: 12/side**	Lie on your side on the flat bench or floor. Raise the top arm from in front of the chest up to the ceiling, elbow slightly bent. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bent-Over Rear-Delt Raise
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Side-delt and rotator-cuff superset.***		
A Seated Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**3 rounds: 15**	Sit on the bench, no swinging. Raise arms to shoulder height, hold 1 second, and lower slowly. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise
B Cuban Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Elbows lifted to shoulder height, upper arms still. Rotate the forearms up until the dumbbells are overhead, then lower back the same path. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Side-Lying External Rotation
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Biceps-triceps antagonist superset.***		
A Spider Curl (chest on incline bench) Primary: Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Lie chest-down on the incline bench with arms hanging straight down. Curl without swinging and squeeze hard at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Concentration Curl
B Tate Press Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Lie flat, dumbbells over the chest with elbows flared. Bend elbows to lower the dumbbells toward the chest, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Lying Dumbbell Triceps Extension

Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. *Biceps-triceps antagonist superset.*		
A Cross-Body Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Curl each dumbbell diagonally across the body toward the opposite shoulder with a neutral grip, then lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Incline-Bench Overhead Triceps Extension Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Lie back on the incline bench, arms overhead. Bend the elbows to lower the dumbbells behind the head and extend. Keep upper arms fixed. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
Block 5: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Side Plank Primary: Obliques, Deep core Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 30 s/side**	Elbow under the shoulder, feet stacked. Lift the hips to form a straight line and hold. Repeat on the other side. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Side Plank on knees
B Cross-Body Mountain Climber Primary: Obliques, Deep core Secondary: Lower abs, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 16**	In a high plank, drive one knee toward the opposite elbow, alternate, keeping hips level. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Plank Knee Tap

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Eagle Arms Stretch	Upper back and rear deltoids	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cross-Body Shoulder Stretch	Rear and side deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Flexor Stretch (palm up, fingers pulled down)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Easy jog	16 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 3 | Thursday (Day 18 of 56)

Hamstring-Quad Supersets, Glutes, Calves + Deep Core

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Hamstrings, Glutes, Quadriceps, Hip abductors / adductors, Calves, Deep core, Lower back
Supporting muscles: Trapezius / rhomboids
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 46 min + stretching 8 min + breathing 7 min = about 69 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board Side Touch and Return**	3 min, light and quick	3 min
Dynamic mobility	**Bodyweight Good Morning**	10 reps	1.5 min
Joint activation	**Cat-Cow**	8 slow reps	1.5 min
Muscle activation	**Donkey Kick**	8 per side	1 min
Muscle activation	**Side-Lying Hip Abduction**	10 per side	1 min

B. Main Workout (about 46 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Hamstring-quad superset.***		
A Staggered-Stance (B-Stance) Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10/leg**	Keep one foot slightly behind with only the toes on the floor. Hinge with most of the load on the front leg. Switch legs after the set. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Dumbbell Romanian Deadlift
B Wall Sit Primary: Quadriceps Secondary: Glutes **Weight:** Bodyweight (hold one 5 kg dumbbell on the thighs in later weeks) **Difficulty:** Beginner-Intermediate	**3 rounds: 30 s**	Back flat on the wall, thighs parallel to the floor, knees over ankles. Hold the position for the set time. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Wall Sit at a higher angle
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Single-Leg Glute Bridge Primary: Glutes Secondary: Hamstrings, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 10/leg**	Lie on your back with one knee hugged to the chest. Drive through the other heel to lift the hips level and lower slowly. Switch legs after the set. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Weighted Glute Bridge
B Standing Glute Kickback (hand on bench) Primary: Glutes Secondary: Hamstrings **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Hand on the bench for balance. Extend one leg straight back with a flat back and squeeze the glute, then return slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Donkey Kick
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Donkey Kick Primary: Glutes Secondary: Hamstrings **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	On hands and knees, press one heel to the ceiling with the knee bent at 90 degrees, squeeze, and lower without arching the back. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
B Side-Lying Hip Abduction Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your side with the legs straight. Raise the top leg to about 45 degrees, toes forward, and lower for 3 seconds. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Fire Hydrant

Block 4: STRAIGHT SETS | 3 sets, Rest between sets: 30 s ***Pause 2 s at the bottom stretch.***		
Donkey-Style Calf Raise (hands on bench) Primary: Calves Secondary: - **Weight:** Bodyweight (plus 5 kg on the hips) **Difficulty:** Intermediate	**3 sets x 12** Rest between sets: 30 s	Hinge forward with hands on the bench, balls of the feet on the step board. Rise high and lower slowly. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Bird-Dog Primary: Deep core, Lower back Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 8/side**	On hands and knees, extend the opposite arm and leg, hold 2 seconds without rotating the hips, and return slowly. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug
B Superman Hold Primary: Lower back Secondary: Glutes, Trapezius / rhomboids **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 10**	Lie face down with arms extended. Lift arms, chest and legs a few centimetres, hold 2 seconds, and lower. Keep the neck neutral. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Bird-Dog

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Half Split (kneeling)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Hamstring Stretch (heel on step board)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Glute Stretch (ankle on knee)	Glutes	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Downward Dog Pedal	Calves and hamstrings	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cat-Cow	Spine	10 slow reps (about 4 s per rep)	Inhale as you arch, exhale as you round
Gentle Standing Side-Body Stretch	Obliques and lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 3 | Friday (Day 19 of 56)

Back-Chest Supersets, Forearms + Biceps + Deep Core

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Back (lats / mid-back), Deep core, Chest, Trapezius / rhomboids, Lower back, Shoulders, Forearms, Biceps / brachialis, Obliques
Supporting muscles: Glutes, Triceps
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 46 min + stretching 8 min + breathing 7 min = about 69 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Hamstring Curl Finish**	3 min, curl the trailing heel toward the glute	3 min
Dynamic mobility	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Joint activation	**Wall Angels**	8 reps	1.5 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 46 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Pull-push superset.***		
A Bird-Dog Dumbbell Row Primary: Back (lats / mid-back), Deep core Secondary: Lower back, Glutes **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Kneel on the bench with opposite knee and hand supported, extend the free leg back, and row the dumbbell with the other arm. Keep the spine neutral. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row
B Single-Arm Flat Dumbbell Press Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Lie flat with one dumbbell. Press up while keeping hips and torso square; do not let the body rotate. Finish all reps, then switch arms. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Alternating Flat Press with both dumbbells
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Dumbbell Shrug with 3-Second Squeeze Primary: Trapezius / rhomboids Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner	**3 rounds: 12**	Stand tall, dumbbells at your sides. Lift shoulders straight up toward the ears, hold 3 seconds, and lower slowly. Do not roll the shoulders. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Seated Shrug
B Prone Cobra Hold Primary: Lower back, Trapezius / rhomboids Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15 s**	Lie face down, hands by the ribs. Lift the chest slightly using the back muscles (not the hands), squeeze shoulder blades together and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Superman Hold
Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat. ***Shoulder-stability superset.***		
A Wall Angel Primary: Shoulders, Trapezius / rhomboids Secondary: Back (lats / mid-back) **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 10**	Stand with back, head and arms against a wall. Slide arms up and down the wall without letting the lower back arch. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Snow Angel
B Side-Lying External Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**2 rounds: 12/side**	Lie on your side, elbow bent 90 degrees against the ribs. Rotate the forearm up toward the ceiling slowly, then lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Cuban Rotation with no weight

Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Hammer-Grip Wrist Raise Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 12/hand**	Forearm on the thigh, thumb up. Raise and lower only the wrist (radial deviation), slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl
B Dumbbell Finger Roll-and-Curl Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Hold the dumbbell with the palm up. Let it roll to the fingertips, close the fingers, then curl the wrist up. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Incline Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**3 rounds: 10**	Sit back on the incline bench with arms hanging, thumbs up. Curl without moving the elbows forward, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Isometric Curl Hold (90 degrees) Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 20 s**	Curl both dumbbells to 90 degrees at the elbow and hold still for the set time. Keep the shoulders relaxed and breathe steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Hammer Curl Hold
Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A High Plank Shoulder Tap Primary: Deep core, Obliques Secondary: Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 10/side**	From a high plank with feet wide, tap one shoulder with the opposite hand while keeping the hips still. Alternate. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Plank with knees down
B Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 25 s**	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Puppy Pose	Lats and shoulders	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cat-Cow	Spine and back extensors	10 slow reps (about 4 s per rep)	Inhale as you arch, exhale as you round
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Rear Deltoid Stretch (arm across, bent elbow)	Rear deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Reverse Prayer Stretch	Wrist and forearm	20 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Gentle Standing Side-Body Stretch	Obliques and lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk with incline or stairs	16 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 3 | Saturday (Day 20 of 56)

Arm Supersets, Legs, Press Variations + Step-Board Cardio

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Biceps / brachialis, Forearms, Triceps, Quadriceps, Glutes, Shoulders, Chest, Obliques, Lower abs
Supporting muscles: Hip abductors / adductors, Hamstrings, Upper abs, Deep core
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 48 min + stretching 8 min + breathing 7 min = about 71 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Alternating Step-Ups on the step board**	3 min, easy pace (about 40 steps per minute per leg)	3 min
Dynamic mobility	**Cat-Cow**	8 slow reps	1.5 min
Joint activation	**Wrist Circles**	10 each direction	1.5 min
Muscle activation	**Incline Push-Up (easy)**	8 reps	1 min
Muscle activation	**Bodyweight Squat**	10 reps	1 min

B. Main Workout (about 48 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Biceps-triceps antagonist superset.***

A Zottman Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 rounds: 10**	Curl with palms up, rotate to palms down at the top, then lower slowly with the reverse grip. Rotate back at the bottom. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Lying Dumbbell Triceps Extension Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 rounds: 12**	Lie flat with arms vertical. Bend only at the elbows to lower the dumbbells beside the temples, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension

Block 2: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.

A Lateral Step-Up Primary: Quadriceps, Glutes Secondary: Hip abductors / adductors **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**4 rounds: 10/leg**	Stand side-on to the step board. Step up sideways, bring the trailing leg to a stand, and lower slowly with the working leg. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Step-Up
B Reverse Lunge Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 10/leg**	Step back with one leg, lower until both knees are about 90 degrees, and push through the front heel to return. Alternate legs. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Reverse Lunge

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.

A Alternating Front Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**3 rounds: 12**	Stand tall. Raise one arm forward to eye level with a neutral grip, lower slowly, and alternate. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Two-Arm Front Raise
B Diamond Push-Up Primary: Chest, Triceps Secondary: - **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8-10**	Hands together under the chest with thumbs and index fingers forming a diamond. Keep elbows tucked, lower the chest to the hands and press up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Incline Push-Up (hands on bench)

Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Russian Twist Primary: Obliques Secondary: Upper abs, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 20**	Sit leaning back with the feet lifted or on the floor. Rotate the torso side to side, touching the dumbbell near each hip. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Russian Twist, feet on floor
B Alternating Leg Lowers Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie on your back with both legs vertical. Lower one leg slowly toward the floor while the lower back stays flat, then raise and alternate. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Dead Bug

Cardio finisher (7 min): Step-Board Interval Finisher: 7 rounds of 40 s step-ups + 20 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Low Lunge Hip-Flexor Stretch	Hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Couch-Style Wall Quad Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Gentle Standing Side-Body Stretch	Obliques and lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 3 | Sunday (Day 21 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 2: Build (Medium-to-High Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 22 min + yoga 25 min + breathing 9 min = about 56 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Low-Impact Step-Board Intervals	22 min	2 min steady step-ups, 1 min easy march, repeated, RPE 4-5. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Chest and Back Opening Flow (25 min)

Pose / stretch	Time	Target	Breathing
Cat-Cow	2 min	Spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Child's Pose	2 min	Lats, back	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Cobra Pose	2 min	Chest, abs	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Bridge Pose	3 min	Chest, glutes, spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Chest Opener (goalpost arms)	3 min	Chest, front shoulders	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Puppy Pose	3 min	Chest, shoulders	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Sphinx Pose	2 min	Spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Ragdoll Forward Fold	2 min	Back, hamstrings	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Reclined Spinal Twist (each side)	3 min	Back, obliques	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Legs Up the Wall or Bench	3 min	Recovery	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before cardio	3 min, 30 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Relaxation (extended-exhale) Breathing	After yoga (rest and recovery)	6 min, 30 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 4 | Monday (Day 22 of 56)

Chest-Back Supersets (4 s Negatives) + Biceps + Upper Abs

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Chest, Back (lats / mid-back), Trapezius / rhomboids, Forearms, Biceps / brachialis, Upper abs, Lower abs
Supporting muscles: Triceps, Glutes, Deep core, Shoulders, Lower back
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Up-Up-Down-Down Step Pattern**	3 min, alternate the lead foot every minute	3 min
Dynamic mobility	**Wall Angels**	8 reps	1.5 min
Joint activation	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Antagonist superset; 4 s lowering on the press and 3 s on the row.***		
A Glute-Bridge Dumbbell Press Primary: Chest Secondary: Triceps, Glutes, Deep core **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 12-15**	Upper back on the flat bench, hips lifted level with the knees. Keep the bridge steady and press the dumbbells from chest level to straight arms. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Flat Dumbbell Bench Press
B Chest-Supported Row (incline bench) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Biceps / brachialis, Shoulders **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**4 rounds: 12-15**	Lie chest-down on the incline bench. Let arms hang, then row elbows toward the ceiling and squeeze the shoulder blades together. Lower slowly. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Bent-Over Row with light 3 kg
Block 2: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***4 s lowering on the fly.***		
A Incline Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 rounds: 12**	On a low incline, with a soft elbow bend, lower the arms in a wide arc to chest level and squeeze back up. Focus on the upper chest. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Flat Dumbbell Fly
B Wide-Elbow Bent-Over Row (rear-back emphasis) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Shoulders, Lower back **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 rounds: 12**	Hinge forward, palms facing down. Row with elbows flared to 90 degrees, aiming at the rear delts and upper back. Squeeze for 1 second. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Farmer Hold Walk Primary: Forearms Secondary: Trapezius / rhomboids, Deep core **Weight:** 5 kg each hand **Difficulty:** Beginner	**3 rounds: 40 s**	Stand tall with shoulders back, hold the dumbbells at your sides and walk slowly in small steps for the set time. Keep ribs down and grip tight. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Static Farmer Hold
B Dumbbell Shrug with 3-Second Squeeze Primary: Trapezius / rhomboids Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner	**3 rounds: 12**	Stand tall, dumbbells at your sides. Lift shoulders straight up toward the ears, hold 3 seconds, and lower slowly. Do not roll the shoulders. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Seated Shrug
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***3 s lowering on the curl.***		
A Seated Alternating Curl with Supination Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Sit upright on the bench. Curl one arm at a time, rotating the palm up as you lift, and lower slowly. No leaning or swinging. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
B Isometric Curl Hold (90 degrees) Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 25 s**	Curl both dumbbells to 90 degrees at the elbow and hold still for the set time. Keep the shoulders relaxed and breathe steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Hammer Curl Hold
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Reaching Crunch (long arms) Primary: Upper abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with arms overhead. Curl up and reach for the knees, then lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
B Bench Knees-Up Crunch Primary: Upper abs, Lower abs Secondary: - **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Lie on the bench, legs raised with knees at 90 degrees. Curl the chest toward the knees and lower with control. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Thoracic Twist	Mid-back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Puppy Pose	Lats and shoulders	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Gentle Standing Side-Body Stretch	Obliques and lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Extensor Stretch (palm down, fingers pulled in)	Wrist extensors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 4 | Tuesday (Day 23 of 56)

Quadriceps Volume, Hamstring Supersets + Lower Abs

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Quadriceps, Glutes, Hamstrings, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Lower back, Upper abs, Deep core
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Overhead Reach**	3 min, reach the opposite arm up on each step	3 min
Dynamic mobility	**Bodyweight Squat to Stand**	10 reps	1.5 min
Joint activation	**Hip Circles**	8 each direction	1.5 min
Muscle activation	**Fire Hydrant**	8 per side	1 min
Muscle activation	**Lateral Step-Down on the step board**	6 per leg	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Quad-hamstring superset.***		
A Walking Lunge Primary: Quadriceps, Glutes Secondary: Hamstrings, Calves **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 10/leg**	Take long steps forward, lowering the back knee close to the floor, then drive up and step through. Keep the torso upright. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
B Hamstring Bridge Walk-Out Primary: Hamstrings Secondary: Glutes, Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**4 rounds: 6**	From a glute bridge, walk the feet slowly outward with small steps while holding the hips up, then walk back in. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Hamstring Bridge
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Lateral Step-Up Primary: Quadriceps, Glutes Secondary: Hip abductors / adductors **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**3 rounds: 10/leg**	Stand side-on to the step board. Step up sideways, bring the trailing leg to a stand, and lower slowly with the working leg. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Step-Up
B Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Cossack Squat Primary: Hip abductors / adductors, Quadriceps Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**3 rounds: 8/side**	Wide stance. Shift your weight to one side, sit into a deep one-leg squat while the opposite leg straightens, then switch sides. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lateral Lunge
B Side-Lying Hip Abduction Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your side with the legs straight. Raise the top leg to about 45 degrees, toes forward, and lower for 3 seconds. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Fire Hydrant

Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat. *Calf-shin superset.*		
A Single-Leg Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg (one dumbbell in the working hand) **Difficulty:** Intermediate	**3 rounds: 12/leg**	Stand on one foot on the step board edge, hold a wall for balance. Rise up fully, pause, and lower slowly past the step level. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Two-leg Calf Raise
B Tibialis Raise (heels on floor, toes up) Primary: Calves Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15**	Lean against a wall with the heels forward. Lift the toes toward the shins, pause 1 second, and lower slowly. Strengthens the shin muscles that balance the calves. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Seated Toe Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Lying Leg Raise Primary: Lower abs Secondary: Upper abs, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Lie on your back with legs straight and hands under the hips. Lift the legs to vertical, then lower slowly to just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bent-Knee Leg Raise
B Flutter Kicks Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 30 s**	Lie on your back with the lower back pressed to the floor. Make small alternating kicks with straight legs held just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Alternating Leg Lowers

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Quadriceps Stretch	Quadriceps and hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Low Lunge Hip-Flexor Stretch	Hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Knee-to-Chest Hug	Glutes and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (straight knee)	Gastrocnemius	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wide-Legged Seated Stretch	Adductors	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 4 | Wednesday (Day 24 of 56)

Shoulders and Arms (Slow Eccentrics) + Obliques

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Shoulders, Biceps / brachialis, Triceps, Obliques
Supporting muscles: Trapezius / rhomboids, Back (lats / mid-back), Chest, Deep core, Upper abs
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board Side Touch and Return**	3 min, light and quick	3 min
Dynamic mobility	**Arm Circles, small to large**	10 each direction	1.5 min
Joint activation	**Thread-the-Needle**	5 per side	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Cuban Rotation with no weight**	8 reps	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Push-pull superset; 4 s lowering on the press.***		
A Arnold Press Primary: Shoulders Secondary: Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Start with palms facing you at chin level. Rotate the palms outward as you press up, reverse the motion on the way down. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Seated Dumbbell Shoulder Press
B Bent-Over Rear-Delt Raise Primary: Shoulders Secondary: Trapezius / rhomboids, Back (lats / mid-back) **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12-15**	Hinge forward with a flat back. Raise arms out to the sides with slightly bent elbows, squeezing shoulder blades gently. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Prone Incline Rear-Delt Raise
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Leaning Single-Arm Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 12/side**	Hold a bench edge with one hand, lean away, and raise the other arm out to the side. The lean increases tension at the bottom of the rep. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise
B Side-Lying External Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your side, elbow bent 90 degrees against the ribs. Rotate the forearm up toward the ceiling slowly, then lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Cuban Rotation with no weight
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Biceps-triceps antagonist superset.***		
A Seated Concentration Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**3 rounds: 12/arm**	Sit on the bench edge, elbow on inner thigh. Curl the dumbbell to the shoulder, squeeze 1 second, lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
B Bench Dip (feet on floor) Primary: Triceps Secondary: Chest, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Hands on the bench edge behind you, knees bent. Lower until elbows reach about 90 degrees and press up. Keep the back close to the bench. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Shorter-range dip with smaller bend

Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. *4 s lowering on the curl.*		
A Incline Dumbbell Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**3 rounds: 10-12**	Sit back on the incline bench, arms hanging behind the torso. Curl without moving the elbows forward to stretch the long head. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
B Two-Hand Overhead Dumbbell Extension Primary: Triceps Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Hold one dumbbell overhead with both hands. Bend the elbows to lower it behind the head, elbows pointed forward, and extend back up. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Seated Single-Arm Overhead Extension
Block 5: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Side Plank Hip Dip Primary: Obliques Secondary: Deep core, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 12/side**	In a side plank, lower the hip to just above the floor and lift back to the line with control. Repeat on both sides. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Side Plank
B Russian Twist Primary: Obliques Secondary: Upper abs, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 20**	Sit leaning back with the feet lifted or on the floor. Rotate the torso side to side, touching the dumbbell near each hip. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Russian Twist, feet on floor

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Cross-Body Shoulder Stretch	Rear and side deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Shoulder Stretch (elbow pull)	Deltoid and triceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Gentle Standing Side-Body Stretch	Obliques and lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Extensor Stretch (palm down, fingers pulled in)	Wrist extensors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Step-board steady rhythm	17 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 4 | Thursday (Day 25 of 56)

Hamstrings and Glutes (Slow Eccentrics) + Deep Core

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Hamstrings, Glutes, Quadriceps, Hip abductors / adductors, Calves, Deep core, Lower back, Trapezius / rhomboids
Supporting muscles: Forearms, Lower abs, Upper abs
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 48 min + stretching 8 min + breathing 7 min = about 71 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Hamstring Curl Finish**	3 min, curl the trailing heel toward the glute	3 min
Dynamic mobility	**Hamstring Scoop (walking)**	6 per side	1.5 min
Joint activation	**Leg Swings (side to side)**	10 per leg	1.5 min
Muscle activation	**Side-Lying Hip Abduction**	10 per side	1 min
Muscle activation	**Single-Leg Glute Bridge**	6 per leg	1 min

B. Main Workout (about 48 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Hamstring-quad superset; 4 s lowering on the RDL.***		
A Dumbbell Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Soft knees, dumbbells close to the thighs. Push the hips back until you feel a hamstring stretch, spine neutral, then drive the hips forward. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Bodyweight Hip Hinge
B Single-Leg Bench Squat (sit-to-stand) Primary: Quadriceps, Glutes Secondary: - **Weight:** Bodyweight or 5 kg at chest **Difficulty:** Intermediate-Advanced	**3 rounds: 8/leg**	Stand in front of the bench. Slowly lower to touch the bench with one leg while the other leg stays off the floor, then stand up using the working leg. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Two-leg Bench Squat
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Bench Hip Thrust Primary: Glutes Secondary: Hamstrings, Quadriceps **Weight:** 5 kg (one dumbbell on hips) **Difficulty:** Intermediate	**3 rounds: 12-15**	Upper back on the bench, feet flat. Drive the hips up with a tucked chin and strong squeeze at the top, lower with control. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
B Side-Lying Hip Adduction Primary: Hip abductors / adductors Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your side with the top leg bent in front on a support. Lift the straight bottom leg up to the top leg, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Fire Hydrant Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	On hands and knees, lift one knee out to the side while the hips stay level, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Side-Lying Hip Abduction
B Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge

Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Seated Calf Raise (dumbbells on knees) Primary: Calves Secondary: - **Weight:** 5 kg each hand (resting on the knees) **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Sit on the bench with the balls of the feet on the step board. Rest the dumbbells on the knees, lift the heels as high as possible and lower slowly. Targets the soleus. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
B Pogo Hops Primary: Calves Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 20**	Stand tall and hop gently using the ankles only, knees almost straight, light and quick on the toes. Land softly. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Calf Raise on the floor
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Dead Bug Primary: Deep core Secondary: Lower abs, Upper abs **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 10/side**	Lie on your back, arms up, hips and knees at 90 degrees. Lower the opposite arm and leg slowly, keeping the lower back flat, then return. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Taps (bent knee)
B Prone Cobra Hold Primary: Lower back, Trapezius / rhomboids Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 20 s**	Lie face down, hands by the ribs. Lift the chest slightly using the back muscles (not the hands), squeeze shoulder blades together and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Superman Hold

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Hamstring Stretch (heel on step board)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Forward Fold	Hamstrings and lower back	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Pigeon Pose	Glutes and hip rotators	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Step-Board Heel Drop Stretch	Calves	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Sphinx Pose	Abs and spine	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 4 | Friday (Day 26 of 56)

Back-Chest Supersets, Forearms + Biceps + Deep Core

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Back (lats / mid-back), Chest, Triceps, Trapezius / rhomboids, Shoulders, Forearms, Obliques, Biceps / brachialis, Deep core
Supporting muscles: -
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Alternating Step-Ups on the step board**	3 min, easy pace (about 40 steps per minute per leg)	3 min
Dynamic mobility	**Cat-Cow**	8 slow reps	1.5 min
Joint activation	**Standing Trunk Rotation**	10 per side	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***Pull-push superset; 4 s lowering on the row.***		
A Single-Arm Dumbbell Row (hand and knee on bench) Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Forearms, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Hand and same-side knee on the bench, back flat. Row the dumbbell toward the hip, elbow close to the body, squeeze the lat, and lower to a full stretch. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Two-Arm Bent-Over Row
B Diamond Push-Up Primary: Chest, Triceps Secondary: - **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8-10**	Hands together under the chest with thumbs and index fingers forming a diamond. Keep elbows tucked, lower the chest to the hands and press up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Incline Push-Up (hands on bench)
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Incline-Bench Prone Y-T-W Raise Primary: Trapezius / rhomboids, Back (lats / mid-back) Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Chest-down on the incline bench. Raise arms in a Y, then a T, then a W shape, with thumbs up and shoulder blades down and back, resetting between shapes. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bodyweight Y-T-W on the floor
B Wall Angel Primary: Shoulders, Trapezius / rhomboids Secondary: Back (lats / mid-back) **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 10**	Stand with back, head and arms against a wall. Slide arms up and down the wall without letting the lower back arch. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Snow Angel

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat. *Slow 3 s lowering.*		
A Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**3 rounds: 15**	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
B Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**3 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Suitcase Hold (single dumbbell) Primary: Forearms, Obliques Secondary: Deep core, Trapezius / rhomboids **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**2 rounds: 30 s/side**	Hold one dumbbell at your side without leaning toward it. Stand tall for the set time, then switch hands. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Farmer Hold Walk
B Forearm Pronation-Supination Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**2 rounds: 12**	Forearm on the thigh, hold the dumbbell near one end like a hammer. Rotate the forearm palm up, then palm down, slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Drag Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Keep the dumbbells touching the front of the body and drag them up the torso by pulling the elbows back. Squeeze the biceps at the top and lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
B Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Plank Dumbbell Drag (anti-rotation) Primary: Deep core, Obliques Secondary: Shoulders, Back (lats / mid-back) **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**3 rounds: 6/side**	High plank with feet wide, drag the dumbbell from one side to the other under the chest without rotating the hips. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** High Plank Shoulder Tap
B Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 30 s**	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Child's Pose, Walk Hands to One Side	Lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose with Arms Extended	Lats and spine	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

Stretch	Target muscle	Duration and repetitions	Breathing
Eagle Arms Stretch	Upper back and rear deltoids	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Flexor Stretch (palm up, fingers pulled down)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Sphinx Pose	Abs and spine	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk	17 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 4 | Saturday (Day 27 of 56)

Arm Supersets, Legs, Shoulders + Step-Board Cardio

Phase 2: Build (Medium-to-High Intensity)
Intensity target: 2-3 RIR

Target muscles (primary): Biceps / brachialis, Triceps, Glutes, Hip abductors / adductors, Calves, Shoulders, Chest, Obliques, Lower abs
Supporting muscles: Quadriceps, Trapezius / rhomboids, Upper abs, Deep core
Method this week: Antagonist and compound supersets, 3-4 s eccentrics
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board March with Knee Drive**	3 min, drive each knee to hip height	3 min
Dynamic mobility	**Walking Knee Hugs**	10 steps	1.5 min
Joint activation	**Arm Circles**	10 each direction	1.5 min
Muscle activation	**Bodyweight Squat**	10 reps	1 min
Muscle activation	**Prone Y Raise on the floor**	8 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Biceps-triceps antagonist superset.***		
A Spider Curl (chest on incline bench) Primary: Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 rounds: 12**	Lie chest-down on the incline bench with arms hanging straight down. Curl without swinging and squeeze hard at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Concentration Curl
B Incline-Bench Overhead Triceps Extension Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**4 rounds: 12**	Lie back on the incline bench, arms overhead. Bend the elbows to lower the dumbbells behind the head and extend. Keep upper arms fixed. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
Block 2: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Curtsy Lunge Primary: Glutes, Hip abductors / adductors Secondary: Quadriceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 10/leg**	Step one leg diagonally behind the other, lower into a lunge, then drive up through the front heel to the start. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
B Donkey-Style Calf Raise (hands on bench) Primary: Calves Secondary: - **Weight:** Bodyweight (plus 5 kg on the hips) **Difficulty:** Intermediate	**4 rounds: 12**	Hinge forward with hands on the bench, balls of the feet on the step board. Rise high and lower slowly. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Scaption Raise (thumbs-up Y raise) Primary: Shoulders Secondary: Trapezius / rhomboids **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Raise arms in a V (about 30 degrees in front of the body) to eye level with thumbs up. Keep shoulders down. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Front Raise
B Incline Push-Up (hands on bench) Primary: Chest Secondary: Triceps, Shoulders **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12-15**	Hands on the flat bench, body straight from head to heels. Lower the chest to the bench edge and press away. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Push-Up

Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Bicycle Crunch Primary: Obliques Secondary: Upper abs, Lower abs **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 20**	Hands by the ears. Bring the opposite elbow toward the opposite knee while extending the other leg, rotating through the ribs, not the neck. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches
B Scissor Kicks Primary: Lower abs Secondary: Obliques, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 30 s**	Lie on your back with the legs slightly off the floor. Cross the legs over each other in a controlled scissor motion. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Flutter Kicks

Cardio finisher (8 min): Step-Board Interval Finisher: 8 rounds of 40 s step-ups + 20 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half-Kneeling Hip-Flexor Stretch with overhead reach	Hip flexors and side body	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Sphinx Pose	Abs and spine	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Relaxation (extended-exhale) Breathing	Before the workout	2 min, 10 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 4 | Sunday (Day 28 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 2: Build (Medium-to-High Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 25 min + yoga 26 min + breathing 9 min = about 60 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Brisk Walk with Hills or Stairs	25 min	Brisk pace, RPE 5 of 10. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Legs and Calves Flow (26 min)

Pose / stretch	Time	Target	Breathing
Downward Dog with pedalling feet	3 min	Calves, hamstrings	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Low Lunge (each side)	4 min	Hip flexors, quads	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Half Split (each side)	4 min	Hamstrings	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Standing Quad Stretch (each side)	3 min	Quadriceps	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Runner's Calf Stretch at the wall (each side)	3 min	Calves	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Wide-Legged Forward Fold	3 min	Hamstrings, adductors	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Garland Squat	3 min	Hips, ankles	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Legs Up the Wall or Bench	3 min	Recovery	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before cardio	3 min, 11 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Pursed-Lip Breathing	After yoga (rest and recovery)	6 min, 60 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 5 | Monday (Day 29 of 56)

Chest-Back Overload with Pause Reps + Biceps + Upper Abs

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Chest, Back (lats / mid-back), Trapezius / rhomboids, Lower back, Forearms, Biceps / brachialis, Upper abs, Lower abs
Supporting muscles: Shoulders, Triceps, Glutes
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Overhead Reach**	3 min, reach the opposite arm up on each step	3 min
Dynamic mobility	**Standing Trunk Rotation**	10 per side	1.5 min
Joint activation	**Cat-Cow**	8 slow reps	1.5 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***2 s pause at the bottom of the press and 2 s squeeze on the row.***		
A Incline Dumbbell Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Set the bench to a low-medium incline. Keep shoulder blades back. Press up and slightly together over the upper chest, lower slowly to upper-chest level. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up (hands on bench)
B Underhand Bent-Over Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Hinge forward with palms facing up. Row toward the lower belly, elbows brushing the sides, squeeze lats at the top. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row

Block 2: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 60 s. ***Mechanical drop set: move to the next exercise immediately, no rest between the three.***		
Stage 1 Dumbbell Squeeze Fly Primary: Chest Secondary: Triceps **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**10** Sets: 3 of the full drop set	Lie flat holding the dumbbells together above the chest. Keeping inward pressure, open the elbows wide to chest height, then close back up with a hard inner-chest squeeze. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Svend-style squeeze press with one 5 kg dumbbell held between palms
Stage 2 Dumbbell Squeeze Press Primary: Chest Secondary: Triceps, Shoulders **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8** Sets: 3 of the full drop set	Lie flat, palms facing each other, dumbbells pressed together. Keep squeezing inward hard as you press straight up from mid-chest and lower back down. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Push-Up on knees
Stage 3 Incline Push-Up (hands on bench) Primary: Chest Secondary: Triceps, Shoulders **Weight:** Bodyweight **Difficulty:** Beginner	**max reps** Sets: 3 of the full drop set	Hands on the flat bench, body straight from head to heels. Lower the chest to the bench edge and press away. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Push-Up

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Wide-Elbow Bent-Over Row (rear-back emphasis) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Shoulders, Lower back **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Hinge forward, palms facing down. Row with elbows flared to 90 degrees, aiming at the rear delts and upper back. Squeeze for 1 second. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row
B Prone Snow Angel Primary: Lower back, Trapezius / rhomboids Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12**	Lie face down, arms by sides and lifted slightly. Sweep the arms overhead and back to the hips while keeping the chest slightly lifted. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Prone Cobra Hold
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
B Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
Block 5: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: three curls back to back.***		
Stage 1 Single-Arm Incline-Bench Preacher Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**8/arm** Sets: 3 of the full drop set	Rest the back of one upper arm on the top of the incline bench, arm fully extended. Curl up without lifting the elbow, squeeze 1 second, lower for 3 seconds. Finish all reps, then switch. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Concentration Curl
Stage 2 Seated Alternating Curl with Supination Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**8** Sets: 3 of the full drop set	Sit upright on the bench. Curl one arm at a time, rotating the palm up as you lift, and lower slowly. No leaning or swinging. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
Stage 3 Drag Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8** Sets: 3 of the full drop set	Keep the dumbbells touching the front of the body and drag them up the torso by pulling the elbows back. Squeeze the biceps at the top and lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Dumbbell-Weighted Crunch Primary: Upper abs Secondary: - **Weight:** 3 kg (one dumbbell on chest) **Difficulty:** Intermediate	**3 rounds: 15**	Hold a 3 kg dumbbell on the chest. Curl the shoulder blades off the floor, pause at the top, and lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
B Bench Knees-Up Crunch Primary: Upper abs, Lower abs Secondary: - **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Lie on the bench, legs raised with knees at 90 degrees. Curl the chest toward the knees and lower with control. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Thread-the-Needle	Upper back and rear shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose, Walk Hands to One Side	Lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Sphinx Pose	Abs and spine	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Prayer Stretch (palms together at chest)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 5 | Tuesday (Day 30 of 56)

Quadriceps Overload (Pause Squats, Drop Sets) + Lower Abs

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Quadriceps, Glutes, Hamstrings, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Deep core, Lower back
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board Side Touch and Return**	3 min, light and quick	3 min
Dynamic mobility	**Leg Swings (front to back)**	10 per leg	1.5 min
Joint activation	**World's Greatest Stretch**	4 per side	1.5 min
Muscle activation	**Lateral Step-Down on the step board**	6 per leg	1 min
Muscle activation	**Glute Bridge**	12 reps	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***3 s lowering on the squat with a 2 s pause at the bottom.***		
A Goblet Squat Primary: Quadriceps, Glutes Secondary: Deep core **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Beginner-Intermediate	**3 rounds: 12-15**	Hold the dumbbell at the chest, feet shoulder-width. Sit down between the hips with chest tall, thighs to parallel, then drive up through the whole foot. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Squat to Bench
B Feet-Elevated Hamstring Bridge (heels on step board) Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Lie on your back with heels on the step board, knees slightly bent. Press heels down and lift the hips to a straight line, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 2: MECHANICAL DROP SET | 2 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 60 s. ***Mechanical drop set on the same leg, then switch legs. Rest only after both legs.***		
Stage 1 Bulgarian Split Squat Primary: Quadriceps, Glutes Secondary: Hamstrings, Deep core **Weight:** 5 kg each hand **Difficulty:** Advanced	**8/leg** Sets: 2 of the full drop set	Rear foot on the bench, front foot about a stride ahead. Lower the back knee toward the floor with the torso upright and drive up through the front heel. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Static Split Squat
Stage 2 Static Split Squat (2-second pause) Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8/leg** Sets: 2 of the full drop set	Hold a split stance. Lower straight down, pause 2 seconds with the back knee just above the floor, and drive up. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
Stage 3 Reverse Lunge Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8/leg** Sets: 2 of the full drop set	Step back with one leg, lower until both knees are about 90 degrees, and push through the front heel to return. Alternate legs. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Reverse Lunge

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Side-Lying Hip Adduction Primary: Hip abductors / adductors Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15/side**	Lie on your side with the top leg bent in front on a support. Lift the straight bottom leg up to the top leg, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat
B Fire Hydrant Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15/side**	On hands and knees, lift one knee out to the side while the hips stay level, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Side-Lying Hip Abduction
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Calf Raise, Toes Turned Out (V-stance) Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 15**	Turn the toes out about 30 degrees on the step board edge. Rise slowly, squeeze the inner calf, and lower for 3 seconds. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
B Tibialis Raise (heels on floor, toes up) Primary: Calves Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15**	Lean against a wall with the heels forward. Lift the toes toward the shins, pause 1 second, and lower slowly. Strengthens the shin muscles that balance the calves. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Seated Toe Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Bench Leg Raise (hands gripping bench edge) Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**3 rounds: 10**	Lie on the bench, hands behind you gripping the edge. Raise straight legs to vertical and lower slowly without arching the back. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Leg Raise
B Reverse Crunch Primary: Lower abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie on your back, knees at 90 degrees. Curl the hips off the floor, bringing the knees toward the chest, and lower slowly without swinging. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Knee Tuck

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Quadriceps Stretch	Quadriceps and hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Side Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half-Kneeling Hip-Flexor Stretch with overhead reach	Hip flexors and side body	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Figure-Four Glute Stretch (on the back)	Glutes and piriformis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (bent knee)	Soleus	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Butterfly Stretch	Adductors and hips	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 5 | Wednesday (Day 31 of 56)

Shoulder Overload (Drop Sets) and Arm Supersets + Obliques

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Shoulders, Biceps / brachialis, Forearms, Triceps, Obliques, Deep core
Supporting muscles: Trapezius / rhomboids, Back (lats / mid-back), Chest, Glutes
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Hamstring Curl Finish**	3 min, curl the trailing heel toward the glute	3 min
Dynamic mobility	**Shoulder Rolls**	10 backward	1.5 min
Joint activation	**Cross-Body Arm Swings**	10 reps	1.5 min
Muscle activation	**Cuban Rotation with no weight**	8 reps	1 min
Muscle activation	**Side-Lying External Rotation, no weight**	8 per side	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.
2 s pause at the bottom of the press.

A Seated Dumbbell Shoulder Press Primary: Shoulders Secondary: Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 10-12**	Sit upright on the flat bench with core braced. Press dumbbells overhead until arms are nearly straight, lower to ear level. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Standing Press with 3 kg
B Incline-Bench Prone Rear-Delt Raise Primary: Shoulders Secondary: Trapezius / rhomboids, Back (lats / mid-back) **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**4 rounds: 12-15**	Chest-down on the incline bench. Raise dumbbells out to the sides with thumbs pointing slightly up and pause at the top. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bent-Over Rear-Delt Raise

Block 2: MECHANICAL DROP SET | 4 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s.
Mechanical drop set: the three exercises back to back with no rest.

Stage 1 Leaning Single-Arm Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**10/side** Sets: 4 of the full drop set	Hold a bench edge with one hand, lean away, and raise the other arm out to the side. The lean increases tension at the bottom of the rep. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise
Stage 2 Standing Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**10** Sets: 4 of the full drop set	Stand tall with a slight forward lean. Raise arms out to the sides to shoulder height, leading with the elbows, lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Seated Lateral Raise
Stage 3 Alternating Front Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**10** Sets: 4 of the full drop set	Stand tall. Raise one arm forward to eye level with a neutral grip, lower slowly, and alternate. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Two-Arm Front Raise

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 40 s. Repeat.		
A Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Neutral (thumbs-up) grip. Curl both dumbbells without swinging, squeezing the biceps and brachialis at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Cross-Body Hammer Curl
B Dumbbell Triceps Kickback Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**3 rounds: 12**	Hinge forward, upper arms parallel to the floor. Extend the forearms back until straight, squeeze, and return slowly. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Bench Dip
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 40 s. Repeat. ***Biceps-triceps antagonist superset.***		
A Spider Curl (chest on incline bench) Primary: Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Lie chest-down on the incline bench with arms hanging straight down. Curl without swinging and squeeze hard at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Concentration Curl
B Feet-Elevated Bench Dip (feet on step board) Primary: Triceps Secondary: Chest, Shoulders **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 10**	Hands on the bench, heels on the step board, legs straight. Lower slowly under control and press up. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Bench Dip (feet on floor)
Block 5: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Side Plank Primary: Obliques, Deep core Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 35 s/side**	Elbow under the shoulder, feet stacked. Lift the hips to form a straight line and hold. Repeat on the other side. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Side Plank on knees
B Alternating Heel Touches Primary: Obliques Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 20**	Lie on your back, knees bent, shoulders slightly lifted. Reach alternately to each heel with the same-side hand. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bicycle Crunch

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Overhead Shoulder Stretch (elbow pull)	Deltoid and triceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Rear Deltoid Stretch (arm across, bent elbow)	Rear deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Sphinx Pose	Abs and spine	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Prayer Stretch (palms together at chest)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk with incline or stairs	18 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 5 | Thursday (Day 32 of 56)

Hamstrings and Glutes Overload + Deep Core

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Glutes, Hip abductors / adductors, Quadriceps, Hamstrings, Lower back, Calves, Deep core
Supporting muscles: Upper abs, Shoulders
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Alternating Step-Ups on the step board**	3 min, easy pace (about 40 steps per minute per leg)	3 min
Dynamic mobility	**Inchworm walk-outs**	5 reps	1.5 min
Joint activation	**Hip Hinge with a hold**	8 reps	1.5 min
Muscle activation	**Single-Leg Glute Bridge**	6 per leg	1 min
Muscle activation	**Donkey Kick**	8 per side	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***3 s lowering on the deadlift.***		
A Sumo Dumbbell Deadlift Primary: Glutes, Hip abductors / adductors, Quadriceps Secondary: Hamstrings, Lower back **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**4 rounds: 12-15**	Wide stance, hold one dumbbell between the legs. Lower by hinging and bending the knees with a flat back, then stand by squeezing the glutes and inner thighs. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Sumo Goblet Squat
B Wall Sit Primary: Quadriceps Secondary: Glutes **Weight:** Bodyweight (hold one 5 kg dumbbell on the thighs in later weeks) **Difficulty:** Beginner-Intermediate	**4 rounds: 40 s**	Back flat on the wall, thighs parallel to the floor, knees over ankles. Hold the position for the set time. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Wall Sit at a higher angle
Block 2: MECHANICAL DROP SET | 2 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 60 s. ***Mechanical drop set: finish one leg, then the second leg. Rest only after both legs.***		
Stage 1 Single-Leg Romanian Deadlift (hand supported) Primary: Hamstrings, Glutes Secondary: Lower back, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**8/leg** Sets: 2 of the full drop set	Hold the dumbbell in the hand opposite the standing leg. Hinge on one leg, back leg extending, then return by driving the hips forward. Lightly touch a wall for balance if needed. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Staggered-Stance RDL
Stage 2 Staggered-Stance (B-Stance) Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8/leg** Sets: 2 of the full drop set	Keep one foot slightly behind with only the toes on the floor. Hinge with most of the load on the front leg. Switch legs after the set. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Dumbbell Romanian Deadlift
Stage 3 Dumbbell Good Morning Primary: Lower back, Hamstrings Secondary: Glutes **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**12** Sets: 2 of the full drop set	Hold one dumbbell at the chest, soft knees. Push hips back until the torso is near parallel with a flat back, then drive hips forward. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Bodyweight Good Morning

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Single-Leg Glute Bridge Primary: Glutes Secondary: Hamstrings, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12/leg**	Lie on your back with one knee hugged to the chest. Drive through the other heel to lift the hips level and lower slowly. Switch legs after the set. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Weighted Glute Bridge
B Standing Glute Kickback (hand on bench) Primary: Glutes Secondary: Hamstrings **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Hand on the bench for balance. Extend one leg straight back with a flat back and squeeze the glute, then return slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Donkey Kick
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Standing Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Balls of the feet on the step board edge, heels hanging. Rise high onto the toes, pause 1 second, and lower into a full stretch. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Bodyweight Calf Raise on the floor
B Calf Raise, Toes Turned In Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 15**	Turn the toes slightly inward, rise to the balls of the feet, pause 1 second, and lower slowly into a full stretch. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Forearm Plank Primary: Deep core Secondary: Upper abs, Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 40 s**	Forearms on the floor, body straight, glutes tight, ribs pulled down. Hold while breathing steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees
B Bird-Dog Primary: Deep core, Lower back Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 8/side**	On hands and knees, extend the opposite arm and leg, hold 2 seconds without rotating the hips, and return slowly. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Seated Forward Fold	Hamstrings and lower back	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Hamstring Stretch	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Knee-to-Chest Hug	Glutes and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (straight knee)	Gastrocnemius	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Lower back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 5 | Friday (Day 33 of 56)

Back-Chest Overload, Forearms + Biceps + Deep Core

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Back (lats / mid-back), Chest, Shoulders, Trapezius / rhomboids, Forearms, Biceps / brachialis, Deep core, Obliques, Lower abs
Supporting muscles: Glutes, Triceps, Upper abs
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 46 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board March with Knee Drive**	3 min, drive each knee to hip height	3 min
Dynamic mobility	**Thread-the-Needle**	5 per side	1.5 min
Joint activation	**Arm Circles (forward and backward)**	10 each direction	1.5 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min

B. Main Workout (about 46 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 4 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***2 s squeeze on the row; controlled push-up.***		
A Staggered-Stance Lawnmower Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Deep core, Glutes **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**4 rounds: 10/side**	Split stance, hinge forward, dumbbell in the hand opposite the front foot. Row like starting a lawnmower, keeping hips square. Switch sides after all reps. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row on bench
B Feet-Elevated Push-Up (feet on step board) Primary: Chest, Shoulders Secondary: Triceps, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**4 rounds: 8-10**	Place feet on the step board, hands on the floor under shoulders. Keep the body rigid. Lower to the floor, press back up for upper-chest emphasis. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Standard Push-Up
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Chest-Supported Row (incline bench) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Biceps / brachialis, Shoulders **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie chest-down on the incline bench. Let arms hang, then row elbows toward the ceiling and squeeze the shoulder blades together. Lower slowly. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Bent-Over Row with light 3 kg
B Wall Angel Primary: Shoulders, Trapezius / rhomboids Secondary: Back (lats / mid-back) **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 10**	Stand with back, head and arms against a wall. Slide arms up and down the wall without letting the lower back arch. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Snow Angel

Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 12**	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Farmer Hold Walk Primary: Forearms Secondary: Trapezius / rhomboids, Deep core **Weight:** 5 kg each hand **Difficulty:** Beginner	**2 rounds: 45 s**	Stand tall with shoulders back, hold the dumbbells at your sides and walk slowly in small steps for the set time. Keep ribs down and grip tight. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Static Farmer Hold
B Hammer-Grip Wrist Raise Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 12/hand**	Forearm on the thigh, thumb up. Raise and lower only the wrist (radial deviation), slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl
Block 5: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Use 3 kg for the 21s.***		
A 21s Curl (7 bottom half, 7 top half, 7 full) Primary: Biceps / brachialis Secondary: Forearms **Weight:** 3 kg each hand **Difficulty:** Advanced	**2 rounds: 21**	Do 7 curls from the bottom to halfway, then 7 from halfway to the top, then 7 full curls with no rest. Use the 3 kg dumbbells and strict form. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standard Curl, 12 reps
B Isometric Curl Hold (90 degrees) Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 25 s**	Curl both dumbbells to 90 degrees at the elbow and hold still for the set time. Keep the shoulders relaxed and breathe steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Hammer Curl Hold
Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A High Plank Shoulder Tap Primary: Deep core, Obliques Secondary: Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12/side**	From a high plank with feet wide, tap one shoulder with the opposite hand while keeping the hips still. Alternate. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Plank with knees down
B Hollow Body Hold (bent-knee version first) Primary: Deep core, Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 25 s**	Lie on your back, press the lower back down, lift shoulders and legs slightly, and hold. Bend the knees to make it easier. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Lat Stretch (hands on bench)	Lats and chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Thoracic Twist	Mid-back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cross-Body Shoulder Stretch	Rear and side deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

Stretch	Target muscle	Duration and repetitions	Breathing
Forearm Extensor Stretch (palm down, fingers pulled in)	Wrist extensors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Obliques and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Easy jog	18 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 5 | Saturday (Day 34 of 56)

Arm Drop Sets, Legs, Press Work + Step-Board Cardio

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Biceps / brachialis, Forearms, Triceps, Chest, Quadriceps, Glutes, Shoulders, Obliques, Deep core
Supporting muscles: Calves, Hip abductors / adductors, Lower abs
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Lateral Step-Overs across the step board**	3 min, 15 per minute each direction	3 min
Dynamic mobility	**Hip Circles**	8 each direction	1.5 min
Joint activation	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Muscle activation	**Prone Y Raise on the floor**	8 reps	1 min
Muscle activation	**Incline Push-Up (easy)**	8 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: MECHANICAL DROP SET | 4 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: three curls back to back.***		
Stage 1 Incline Dumbbell Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**8** Sets: 4 of the full drop set	Sit back on the incline bench, arms hanging behind the torso. Curl without moving the elbows forward to stretch the long head. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
Stage 2 Alternating Dumbbell Curl Primary: Biceps / brachialis Secondary: Forearms **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**8** Sets: 4 of the full drop set	Stand tall, elbows pinned to the ribs. Curl one dumbbell while turning the palm up, lower slowly, and alternate. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Alternating Curl
Stage 3 Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**8** Sets: 4 of the full drop set	Neutral (thumbs-up) grip. Curl both dumbbells without swinging, squeezing the biceps and brachialis at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Cross-Body Hammer Curl
Block 2: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: three triceps exercises back to back.***		
Stage 1 Lying Dumbbell Triceps Extension Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**8** Sets: 3 of the full drop set	Lie flat with arms vertical. Bend only at the elbows to lower the dumbbells beside the temples, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
Stage 2 Close-Grip Neutral Dumbbell Press Primary: Triceps, Chest Secondary: Shoulders **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8** Sets: 3 of the full drop set	Lie flat, dumbbells touching, palms facing. Press straight up with elbows tucked, then lower slowly to the lower chest. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Diamond Push-Up on knees
Stage 3 Diamond Push-Up Primary: Chest, Triceps Secondary: - **Weight:** Bodyweight **Difficulty:** Advanced	**max reps** Sets: 3 of the full drop set	Hands together under the chest with thumbs and index fingers forming a diamond. Keep elbows tucked, lower the chest to the hands and press up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Incline Push-Up (hands on bench)

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Step-Up (step board) Primary: Quadriceps, Glutes Secondary: Calves **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12/leg**	Place the whole foot on the step board, drive through the heel to stand tall, and lower slowly with control. Complete reps on one leg, then switch. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lower step with bodyweight only
B Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Pike Push-Up Primary: Shoulders Secondary: Triceps, Chest, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8-10**	Hips high in an inverted V, hands shoulder-width. Bend elbows to lower the head toward the floor between the hands, then press back up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Hands-on-bench Incline Pike Push-Up
B Cross-Body Mountain Climber Primary: Obliques, Deep core Secondary: Lower abs, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 16**	In a high plank, drive one knee toward the opposite elbow, alternate, keeping hips level. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Plank Knee Tap

Cardio finisher (8 min): Step-Board Interval Finisher: 8 rounds of 45 s step-ups + 15 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Hip-Flexor Stretch	Hip flexors and quads	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Quadriceps Stretch	Quadriceps and hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Obliques and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Gentle Rib-Cage Expansion Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 5 | Sunday (Day 35 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 3: Overload (High Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 22 min + yoga 25 min + breathing 9 min = about 56 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Easy Jog	22 min	Steady pace, RPE 5 of 10. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Twist and Side-Body Flow (25 min)

Pose / stretch	Time	Target	Breathing
Cat-Cow	2 min	Spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Seated Side Bend (each side)	3 min	Obliques, lats	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Thread-the-Needle (each side)	3 min	Upper back	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Revolved Low Lunge (each side)	4 min	Hips, spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Standing Side Bend (each side)	3 min	Side body	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Seated Twist (each side)	3 min	Spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Child's Pose with Side Reach (each side)	3 min	Lats, obliques	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Spinal Twist (each side)	4 min	Spine, glutes	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before cardio	3 min, 18 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Relaxation (extended-exhale) Breathing	After yoga (rest and recovery)	6 min, 30 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 6 | Monday (Day 36 of 56)

Chest-Back Overload (Squeeze Variations) + Biceps + Upper Abs

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Chest, Back (lats / mid-back), Trapezius / rhomboids, Deep core, Forearms, Obliques, Biceps / brachialis, Upper abs, Lower abs
Supporting muscles: Shoulders, Triceps, Lower back, Glutes
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 51 min + stretching 8 min + breathing 7 min = about 74 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board Side Touch and Return**	3 min, light and quick	3 min
Dynamic mobility	**Arm Circles (forward and backward)**	10 each direction	1.5 min
Joint activation	**Thread-the-Needle**	5 per side	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min

B. Main Workout (about 51 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***5 s lowering on the press, 2 s squeeze on the row.***		
A Incline Dumbbell Squeeze Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	On a low incline, press the dumbbells together and drive up toward the upper chest while keeping the inward squeeze. Lower slowly without losing contact between the dumbbells. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up with hands close
B Chest-Supported Row (incline bench) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Biceps / brachialis, Shoulders **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie chest-down on the incline bench. Let arms hang, then row elbows toward the ceiling and squeeze the shoulder blades together. Lower slowly. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Bent-Over Row with light 3 kg
Block 2: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 60 s. ***Mechanical drop set: fly then press then push-up with no rest between them.***		
Stage 1 Flat Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**10** Sets: 3 of the full drop set	Lie flat, arms slightly bent. Open the arms in a wide arc until you feel a chest stretch, then bring the dumbbells back over the chest as if hugging a tree. Keep elbow bend fixed. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Fly (lying on floor)
Stage 2 Flat Dumbbell Bench Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8** Sets: 3 of the full drop set	Lie flat, feet planted, shoulder blades pinched. Start with dumbbells at chest level, elbows about 45 degrees from the body. Press to straight arms, lower under control to a chest stretch. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Floor Press (lying on the floor)
Stage 3 Standard Push-Up Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**max reps** Sets: 3 of the full drop set	Hands slightly wider than shoulders, body in a straight line. Lower the chest to the floor under control, press back up without sagging the hips. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up (hands on bench) or knee push-up

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Bird-Dog Dumbbell Row Primary: Back (lats / mid-back), Deep core Secondary: Lower back, Glutes **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Kneel on the bench with opposite knee and hand supported, extend the free leg back, and row the dumbbell with the other arm. Keep the spine neutral. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row
B Incline-Bench Prone Y-T-W Raise Primary: Trapezius / rhomboids, Back (lats / mid-back) Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Chest-down on the incline bench. Raise arms in a Y, then a T, then a W shape, with thumbs up and shoulder blades down and back, resetting between shapes. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bodyweight Y-T-W on the floor

Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Suitcase Hold (single dumbbell) Primary: Forearms, Obliques Secondary: Deep core, Trapezius / rhomboids **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**2 rounds: 35 s/side**	Hold one dumbbell at your side without leaning toward it. Stand tall for the set time, then switch hands. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Farmer Hold Walk
B Dumbbell Finger Roll-and-Curl Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Hold the dumbbell with the palm up. Let it roll to the fingertips, close the fingers, then curl the wrist up. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl

Block 5: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: finish with the isometric hold.***		
Stage 1 Incline Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**8** Sets: 3 of the full drop set	Sit back on the incline bench with arms hanging, thumbs up. Curl without moving the elbows forward, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Stage 2 Single-Arm Incline-Bench Preacher Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**8/arm** Sets: 3 of the full drop set	Rest the back of one upper arm on the top of the incline bench, arm fully extended. Curl up without lifting the elbow, squeeze 1 second, lower for 3 seconds. Finish all reps, then switch. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Concentration Curl
Stage 3 Isometric Curl Hold (90 degrees) Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**25 s** Sets: 3 of the full drop set	Curl both dumbbells to 90 degrees at the elbow and hold still for the set time. Keep the shoulders relaxed and breathe steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Hammer Curl Hold

Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Reaching Crunch (long arms) Primary: Upper abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with arms overhead. Curl up and reach for the knees, then lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
B Hollow Body Hold (bent-knee version first) Primary: Deep core, Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 25 s**	Lie on your back, press the lower back down, lift shoulders and legs slightly, and hold. Bend the knees to make it easier. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cat-Cow	Spine and back extensors	10 slow reps (about 4 s per rep)	Inhale as you arch, exhale as you round
Kneeling Lat Stretch (hands on bench)	Lats and chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Obliques and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Reverse Prayer Stretch	Wrist and forearm	20 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 6 | Tuesday (Day 37 of 56)

Quadriceps and Adductors (Pause and Tempo) + Lower Abs

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Quadriceps, Glutes, Hamstrings, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Lower back, Deep core, Upper abs, Obliques
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Hamstring Curl Finish**	3 min, curl the trailing heel toward the glute	3 min
Dynamic mobility	**Ankle Rocks**	10 per side	1.5 min
Joint activation	**Walking Knee Hugs**	10 steps	1.5 min
Muscle activation	**Glute Bridge**	12 reps	1 min
Muscle activation	**Fire Hydrant**	8 per side	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***3 s lowering on the single-leg squat.***		
A Single-Leg Bench Squat (sit-to-stand) Primary: Quadriceps, Glutes Secondary: - **Weight:** Bodyweight or 5 kg at chest **Difficulty:** Intermediate-Advanced	**3 rounds: 8/leg**	Stand in front of the bench. Slowly lower to touch the bench with one leg while the other leg stays off the floor, then stand up using the working leg. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Two-leg Bench Squat
B Hamstring Bridge Walk-Out Primary: Hamstrings Secondary: Glutes, Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 8**	From a glute bridge, walk the feet slowly outward with small steps while holding the hips up, then walk back in. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Hamstring Bridge

Block 2: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 60 s. ***Mechanical drop set: heel-elevated squat, normal squat, then wall sit.***		
Stage 1 Heel-Elevated Goblet Squat (heels on step board) Primary: Quadriceps Secondary: Glutes, Deep core **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**12** Sets: 3 of the full drop set	Place heels on the step board. Squat deeply, keeping the torso upright and knees tracking over the toes for quad emphasis. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Goblet Squat
Stage 2 Goblet Squat Primary: Quadriceps, Glutes Secondary: Deep core **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Beginner-Intermediate	**10** Sets: 3 of the full drop set	Hold the dumbbell at the chest, feet shoulder-width. Sit down between the hips with chest tall, thighs to parallel, then drive up through the whole foot. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Squat to Bench
Stage 3 Wall Sit Primary: Quadriceps Secondary: Glutes **Weight:** Bodyweight (hold one 5 kg dumbbell on the thighs in later weeks) **Difficulty:** Beginner-Intermediate	**max s** Sets: 3 of the full drop set	Back flat on the wall, thighs parallel to the floor, knees over ankles. Hold the position for the set time. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Wall Sit at a higher angle

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Lateral Lunge Primary: Hip abductors / adductors, Quadriceps Secondary: Glutes, Hamstrings **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**3 rounds: 10/side**	Step wide to one side, push the hips back, and lower into that leg while the other leg stays straight. Push back to the start. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat (bodyweight)
B Side-Lying Hip Abduction Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15/side**	Lie on your side with the legs straight. Raise the top leg to about 45 degrees, toes forward, and lower for 3 seconds. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Fire Hydrant
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Single-Leg Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg (one dumbbell in the working hand) **Difficulty:** Intermediate	**3 rounds: 12/leg**	Stand on one foot on the step board edge, hold a wall for balance. Rise up fully, pause, and lower slowly past the step level. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Two-leg Calf Raise
B Pogo Hops Primary: Calves Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 20**	Stand tall and hop gently using the ankles only, knees almost straight, light and quick on the toes. Land softly. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Calf Raise on the floor
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Lying Leg Raise Primary: Lower abs Secondary: Upper abs, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Lie on your back with legs straight and hands under the hips. Lift the legs to vertical, then lower slowly to just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bent-Knee Leg Raise
B Scissor Kicks Primary: Lower abs Secondary: Obliques, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 30 s**	Lie on your back with the legs slightly off the floor. Cross the legs over each other in a controlled scissor motion. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Flutter Kicks

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Lying Side Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Couch-Style Wall Quad Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Hip-Flexor Stretch	Hip flexors and quads	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Glute Stretch (ankle on knee)	Glutes	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Downward Dog Pedal	Calves and hamstrings	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Frog Stretch	Adductors	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 6 | Wednesday (Day 38 of 56)

Shoulder Overload (Arnold, Rear Delts) and Arms + Obliques

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Shoulders, Biceps / brachialis, Forearms, Triceps, Obliques
Supporting muscles: Trapezius / rhomboids, Back (lats / mid-back), Upper abs, Deep core
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Alternating Step-Ups on the step board**	3 min, easy pace (about 40 steps per minute per leg)	3 min
Dynamic mobility	**Wrist Circles and Finger Spreads**	10 each direction	1.5 min
Joint activation	**Wall Angels**	8 reps	1.5 min
Muscle activation	**Side-Lying External Rotation, no weight**	8 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***2 s pause at the top of the press.***		
A Arnold Press Primary: Shoulders Secondary: Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Start with palms facing you at chin level. Rotate the palms outward as you press up, reverse the motion on the way down. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Seated Dumbbell Shoulder Press
B Bent-Over Rear-Delt Raise Primary: Shoulders Secondary: Trapezius / rhomboids, Back (lats / mid-back) **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12-15**	Hinge forward with a flat back. Raise arms out to the sides with slightly bent elbows, squeezing shoulder blades gently. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Prone Incline Rear-Delt Raise
Block 2: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: no rest between the three.***		
Stage 1 Seated Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**10** Sets: 3 of the full drop set	Sit on the bench, no swinging. Raise arms to shoulder height, hold 1 second, and lower slowly. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise
Stage 2 Scaption Raise (thumbs-up Y raise) Primary: Shoulders Secondary: Trapezius / rhomboids **Weight:** 3 kg each hand **Difficulty:** Intermediate	**10** Sets: 3 of the full drop set	Raise arms in a V (about 30 degrees in front of the body) to eye level with thumbs up. Keep shoulders down. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Front Raise
Stage 3 Alternating Front Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**10** Sets: 3 of the full drop set	Stand tall. Raise one arm forward to eye level with a neutral grip, lower slowly, and alternate. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Two-Arm Front Raise

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 40 s. Repeat.		
A Cross-Body Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Curl each dumbbell diagonally across the body toward the opposite shoulder with a neutral grip, then lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Tate Press Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Lie flat, dumbbells over the chest with elbows flared. Bend elbows to lower the dumbbells toward the chest, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Lying Dumbbell Triceps Extension
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 40 s. Repeat.		
A Seated Concentration Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**3 rounds: 10/arm**	Sit on the bench edge, elbow on inner thigh. Curl the dumbbell to the shoulder, squeeze 1 second, lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
B Single-Arm Overhead Extension (seated) Primary: Triceps Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Sit tall, one arm overhead. Lower the dumbbell behind the head by bending only the elbow, then extend. Finish all reps, then switch. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Russian Twist Primary: Obliques Secondary: Upper abs, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 24**	Sit leaning back with the feet lifted or on the floor. Rotate the torso side to side, touching the dumbbell near each hip. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Russian Twist, feet on floor
B Side Plank Hip Dip Primary: Obliques Secondary: Deep core, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12/side**	In a side plank, lower the hip to just above the floor and lift back to the line with control. Repeat on both sides. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Side Plank

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Rear Deltoid Stretch (arm across, bent elbow)	Rear deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Eagle Arms Stretch	Upper back and rear deltoids	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Obliques and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Reverse Prayer Stretch	Wrist and forearm	20 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk	18 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 6 | Thursday (Day 39 of 56)

Posterior Chain and Glutes (Tempo) + Deep Core

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Hamstrings, Glutes, Hip abductors / adductors, Quadriceps, Calves, Deep core
Supporting muscles: Lower back, Forearms, Lower abs, Upper abs
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 52 min + stretching 8 min + breathing 7 min = about 75 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board March with Knee Drive**	3 min, drive each knee to hip height	3 min
Dynamic mobility	**Cat-Cow**	8 slow reps	1.5 min
Joint activation	**Bodyweight Good Morning**	10 reps	1.5 min
Muscle activation	**Donkey Kick**	8 per side	1 min
Muscle activation	**Side-Lying Hip Abduction**	10 per side	1 min

B. Main Workout (about 52 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 60 s. Repeat. ***4 s lowering on the RDL, 2 s squeeze at the top of the thrust.***		
A Dumbbell Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Soft knees, dumbbells close to the thighs. Push the hips back until you feel a hamstring stretch, spine neutral, then drive the hips forward. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Bodyweight Hip Hinge
B Bench Hip Thrust Primary: Glutes Secondary: Hamstrings, Quadriceps **Weight:** 5 kg (one dumbbell on hips) **Difficulty:** Intermediate	**3 rounds: 12**	Upper back on the bench, feet flat. Drive the hips up with a tucked chin and strong squeeze at the top, lower with control. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 2: MECHANICAL DROP SET | 3 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: single-leg bridge, then two-leg bridge, then frog pump.***		
Stage 1 Single-Leg Glute Bridge Primary: Glutes Secondary: Hamstrings, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**10/leg** Sets: 3 of the full drop set	Lie on your back with one knee hugged to the chest. Drive through the other heel to lift the hips level and lower slowly. Switch legs after the set. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Weighted Glute Bridge
Stage 2 Weighted Glute Bridge Primary: Glutes Secondary: Hamstrings **Weight:** 5 kg (one dumbbell on hips) **Difficulty:** Beginner	**12** Sets: 3 of the full drop set	Lie on your back, knees bent. Drive through the heels to lift the hips to a straight line, squeeze the glutes for 2 seconds, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Bodyweight Glute Bridge
Stage 3 Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**15** Sets: 3 of the full drop set	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Fire Hydrant Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15/side**	On hands and knees, lift one knee out to the side while the hips stay level, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Side-Lying Hip Abduction
B Cossack Squat Primary: Hip abductors / adductors, Quadriceps Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**3 rounds: 8/side**	Wide stance. Shift your weight to one side, sit into a deep one-leg squat while the opposite leg straightens, then switch sides. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lateral Lunge
Block 4: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Seated Calf Raise (dumbbells on knees) Primary: Calves Secondary: - **Weight:** 5 kg each hand (resting on the knees) **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Sit on the bench with the balls of the feet on the step board. Rest the dumbbells on the knees, lift the heels as high as possible and lower slowly. Targets the soleus. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
B Donkey-Style Calf Raise (hands on bench) Primary: Calves Secondary: - **Weight:** Bodyweight (plus 5 kg on the hips) **Difficulty:** Intermediate	**3 rounds: 12**	Hinge forward with hands on the bench, balls of the feet on the step board. Rise high and lower slowly. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 5: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Dead Bug Primary: Deep core Secondary: Lower abs, Upper abs **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your back, arms up, hips and knees at 90 degrees. Lower the opposite arm and leg slowly, keeping the lower back flat, then return. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Taps (bent knee)
B Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 30 s**	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Supine Hamstring Stretch	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half Split (kneeling)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Figure-Four Glute Stretch (on the back)	Glutes and piriformis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (bent knee)	Soleus	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Spinal Twist	Lower back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Relaxation (extended-exhale) Breathing	Before the workout	2 min, 10 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 6 | Friday (Day 40 of 56)

Back-Chest Overload, Forearms + Biceps + Deep Core

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Back (lats / mid-back), Chest, Trapezius / rhomboids, Shoulders, Forearms, Biceps / brachialis, Deep core, Obliques
Supporting muscles: Lower back, Triceps, Quadriceps
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 46 min + stretching 8 min + breathing 7 min = about 69 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Lateral Step-Overs across the step board**	3 min, 15 per minute each direction	3 min
Dynamic mobility	**Wall Angels**	8 reps	1.5 min
Joint activation	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 46 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***2 s squeeze on the row.***		
A Underhand Bent-Over Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Hinge forward with palms facing up. Row toward the lower belly, elbows brushing the sides, squeeze lats at the top. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row
B Archer Push-Up Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 6/side**	Wide hand position. Lower toward one hand while the other arm stays nearly straight, then press back and alternate sides. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Staggered-Hand Push-Up
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Wide-Elbow Bent-Over Row (rear-back emphasis) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Shoulders, Lower back **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Hinge forward, palms facing down. Row with elbows flared to 90 degrees, aiming at the rear delts and upper back. Squeeze for 1 second. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row
B Cuban Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Elbows lifted to shoulder height, upper arms still. Rotate the forearms up until the dumbbells are overhead, then lower back the same path. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Side-Lying External Rotation
Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat. ***Slow 3 s lowering.***		
A Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**3 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
B Hammer-Grip Wrist Raise Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 12/hand**	Forearm on the thigh, thumb up. Raise and lower only the wrist (radial deviation), slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl

Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Zottman Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Curl with palms up, rotate to palms down at the top, then lower slowly with the reverse grip. Rotate back at the bottom. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
Block 5: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat. ***Use 3 kg for the 21s.***		
A Drag Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Keep the dumbbells touching the front of the body and drag them up the torso by pulling the elbows back. Squeeze the biceps at the top and lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
B 21s Curl (7 bottom half, 7 top half, 7 full) Primary: Biceps / brachialis Secondary: Forearms **Weight:** 3 kg each hand **Difficulty:** Advanced	**2 rounds: 21**	Do 7 curls from the bottom to halfway, then 7 from halfway to the top, then 7 full curls with no rest. Use the 3 kg dumbbells and strict form. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standard Curl, 12 reps
Block 6: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Plank Dumbbell Drag (anti-rotation) Primary: Deep core, Obliques Secondary: Shoulders, Back (lats / mid-back) **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**3 rounds: 8/side**	High plank with feet wide, drag the dumbbell from one side to the other under the chest without rotating the hips. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** High Plank Shoulder Tap
B Bear Hold (knees hovering) Primary: Deep core Secondary: Shoulders, Quadriceps **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 25 s**	From hands and knees, lift the knees 2 cm off the floor. Keep the back flat and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Overhead Side Reach	Lats and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Thread-the-Needle	Upper back and rear shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Shoulder Stretch (elbow pull)	Deltoid and triceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Prayer Stretch (palms together at chest)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Step-board steady rhythm	18 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 6 | Saturday (Day 41 of 56)

Arm Drop Sets, Legs, Shoulders + Step-Board Cardio

Phase 3: Overload (High Intensity)
Intensity target: 1-2 RIR (last set of isolation work may approach failure)

Target muscles (primary): Biceps / brachialis, Forearms, Triceps, Chest, Glutes, Hip abductors / adductors, Quadriceps, Shoulders, Trapezius / rhomboids
Supporting muscles: Back (lats / mid-back)
Method this week: Supersets, mechanical drop sets, pause reps, 4-5 s negatives
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step Taps (alternate foot taps with arm swing)**	3 min, steady rhythm	3 min
Dynamic mobility	**Wrist Circles**	10 each direction	1.5 min
Joint activation	**Cat-Cow**	8 slow reps	1.5 min
Muscle activation	**Incline Push-Up (easy)**	8 reps	1 min
Muscle activation	**Bodyweight Squat**	10 reps	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: MECHANICAL DROP SET | 4 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: three curls back to back.***		
Stage 1 Spider Curl (chest on incline bench) Primary: Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**8** Sets: 4 of the full drop set	Lie chest-down on the incline bench with arms hanging straight down. Curl without swinging and squeeze hard at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Concentration Curl
Stage 2 Zottman Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**8** Sets: 4 of the full drop set	Curl with palms up, rotate to palms down at the top, then lower slowly with the reverse grip. Rotate back at the bottom. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Stage 3 Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**8** Sets: 4 of the full drop set	Neutral (thumbs-up) grip. Curl both dumbbells without swinging, squeezing the biceps and brachialis at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Cross-Body Hammer Curl

Block 2: MECHANICAL DROP SET | 4 sets. Do stage 1, 2 and 3 back to back with no rest (each stage is easier in leverage), then rest 45 s. ***Mechanical drop set: three triceps exercises back to back.***		
Stage 1 Tate Press Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**8** Sets: 4 of the full drop set	Lie flat, dumbbells over the chest with elbows flared. Bend elbows to lower the dumbbells toward the chest, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Lying Dumbbell Triceps Extension
Stage 2 Close-Grip Neutral Dumbbell Press Primary: Triceps, Chest Secondary: Shoulders **Weight:** 5 kg each hand **Difficulty:** Intermediate	**8** Sets: 4 of the full drop set	Lie flat, dumbbells touching, palms facing. Press straight up with elbows tucked, then lower slowly to the lower chest. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Diamond Push-Up on knees
Stage 3 Bench Dip (feet on floor) Primary: Triceps Secondary: Chest, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**max reps** Sets: 4 of the full drop set	Hands on the bench edge behind you, knees bent. Lower until elbows reach about 90 degrees and press up. Keep the back close to the bench. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Shorter-range dip with smaller bend

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Curtsy Lunge Primary: Glutes, Hip abductors / adductors Secondary: Quadriceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 12/leg**	Step one leg diagonally behind the other, lower into a lunge, then drive up through the front heel to the start. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
B Lateral Step-Up Primary: Quadriceps, Glutes Secondary: Hip abductors / adductors **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**3 rounds: 8/leg**	Stand side-on to the step board. Step up sideways, bring the trailing leg to a stand, and lower slowly with the working leg. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Step-Up
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Incline Push-Up (hands on bench) Primary: Chest Secondary: Triceps, Shoulders **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 15**	Hands on the flat bench, body straight from head to heels. Lower the chest to the bench edge and press away. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Push-Up
B Wall Angel Primary: Shoulders, Trapezius / rhomboids Secondary: Back (lats / mid-back) **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 12**	Stand with back, head and arms against a wall. Slide arms up and down the wall without letting the lower back arch. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Snow Angel

Cardio finisher (8 min): Step-Board Interval Finisher: 8 rounds of 45 s step-ups + 15 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Low Lunge Hip-Flexor Stretch	Hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Lying Side Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 6 | Sunday (Day 42 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 3: Overload (High Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 24 min + yoga 25 min + breathing 9 min = about 58 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Step-Board Steady Rhythm then Walk	24 min	15 min step-board, 9 min easy walk, RPE 4-5. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Deep Hips and Glutes Flow (25 min)

Pose / stretch	Time	Target	Breathing
Child's Pose	2 min	Back, hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Lizard Pose (each side)	4 min	Hip flexors, adductors	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Pigeon Pose (each side)	5 min	Glutes, rotators	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Figure-Four Stretch (each side)	4 min	Glutes	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Frog Pose	3 min	Adductors	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Happy Baby	3 min	Hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Reclined Butterfly	4 min	Adductors, hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before cardio	3 min, 18 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Diaphragmatic (belly) Breathing	After yoga (rest and recovery)	6 min, 36 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 7 | Monday (Day 43 of 56)

Chest-Back Tri-Sets (Tempo) + Biceps + Upper Abs

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Chest, Back (lats / mid-back), Lower back, Trapezius / rhomboids, Forearms, Biceps / brachialis, Upper abs, Lower abs
Supporting muscles: Shoulders, Triceps, Hamstrings, Deep core, Glutes
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 56 min + stretching 8 min + breathing 7 min = about 79 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Hamstring Curl Finish**	3 min, curl the trailing heel toward the glute	3 min
Dynamic mobility	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Joint activation	**Wall Angels**	8 reps	1.5 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min

B. Main Workout (about 56 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat.
Tempo 4-1-1 (4 s down, 1 s pause, 1 s up) on the press and row.

A Flat Dumbbell Bench Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Lie flat, feet planted, shoulder blades pinched. Start with dumbbells at chest level, elbows about 45 degrees from the body. Press to straight arms, lower under control to a chest stretch. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Floor Press (lying on the floor)
B Bent-Over Dumbbell Row (two arms) Primary: Back (lats / mid-back), Lower back Secondary: Biceps / brachialis, Forearms, Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Hinge forward with a flat back and soft knees. Row both dumbbells to the lower ribs, pause, then lower under control. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row
C Dumbbell Squeeze Fly Primary: Chest Secondary: Triceps **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie flat holding the dumbbells together above the chest. Keeping inward pressure, open the elbows wide to chest height, then close back up with a hard inner-chest squeeze. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Svend-style squeeze press with one 5 kg dumbbell held between palms

Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat. *Controlled 3 s lowering on every exercise.*		
A Incline Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	On a low incline, with a soft elbow bend, lower the arms in a wide arc to chest level and squeeze back up. Focus on the upper chest. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Flat Dumbbell Fly
B Single-Arm Dumbbell Row (hand and knee on bench) Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Forearms, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Hand and same-side knee on the bench, back flat. Row the dumbbell toward the hip, elbow close to the body, squeeze the lat, and lower to a full stretch. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Two-Arm Bent-Over Row
C Incline Push-Up (hands on bench) Primary: Chest Secondary: Triceps, Shoulders **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: max reps**	Hands on the flat bench, body straight from head to heels. Lower the chest to the bench edge and press away. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Push-Up
Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Incline-Bench Prone Y-T-W Raise Primary: Trapezius / rhomboids, Back (lats / mid-back) Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Chest-down on the incline bench. Raise arms in a Y, then a T, then a W shape, with thumbs up and shoulder blades down and back, resetting between shapes. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bodyweight Y-T-W on the floor
B Prone Snow Angel Primary: Lower back, Trapezius / rhomboids Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 12**	Lie face down, arms by sides and lifted slightly. Sweep the arms overhead and back to the hips while keeping the chest slightly lifted. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Prone Cobra Hold
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Farmer Hold Walk Primary: Forearms Secondary: Trapezius / rhomboids, Deep core **Weight:** 5 kg each hand **Difficulty:** Beginner	**2 rounds: 45 s**	Stand tall with shoulders back, hold the dumbbells at your sides and walk slowly in small steps for the set time. Keep ribs down and grip tight. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Static Farmer Hold
B Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
Block 5: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat. ***Tempo 3-1-1 on the curls.***		
A Single-Arm Incline-Bench Preacher Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 10/arm**	Rest the back of one upper arm on the top of the incline bench, arm fully extended. Curl up without lifting the elbow, squeeze 1 second, lower for 3 seconds. Finish all reps, then switch. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Concentration Curl
B Drag Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Keep the dumbbells touching the front of the body and drag them up the torso by pulling the elbows back. Squeeze the biceps at the top and lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
C Isometric Curl Hold (90 degrees) Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 25 s**	Curl both dumbbells to 90 degrees at the elbow and hold still for the set time. Keep the shoulders relaxed and breathe steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Hammer Curl Hold

Block 6: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Dumbbell-Weighted Crunch Primary: Upper abs Secondary: - **Weight:** 3 kg (one dumbbell on chest) **Difficulty:** Intermediate	**2 rounds: 15**	Hold a 3 kg dumbbell on the chest. Curl the shoulder blades off the floor, pause at the top, and lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
B Bench Knees-Up Crunch Primary: Upper abs, Lower abs Secondary: - **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 12**	Lie on the bench, legs raised with knees at 90 degrees. Curl the chest toward the knees and lower with control. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch
C Reaching Crunch (long arms) Primary: Upper abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**2 rounds: 15**	Lie on your back with arms overhead. Curl up and reach for the knees, then lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Crunch

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Lying Chest Opener (arms in goalpost on the floor)	Chest	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose with Arms Extended	Lats and spine	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Overhead Side Reach	Lats and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Flexor Stretch (palm up, fingers pulled down)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 7 | Tuesday (Day 44 of 56)

Quadriceps Tri-Sets and Lower Abs

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Quadriceps, Glutes, Hamstrings, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Deep core, Lower back
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 51 min + stretching 8 min + breathing 7 min = about 74 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Alternating Step-Ups on the step board**	3 min, easy pace (about 40 steps per minute per leg)	3 min
Dynamic mobility	**Hip Circles**	8 each direction	1.5 min
Joint activation	**Bodyweight Squat to Stand**	10 reps	1.5 min
Muscle activation	**Fire Hydrant**	8 per side	1 min
Muscle activation	**Lateral Step-Down on the step board**	6 per leg	1 min

B. Main Workout (about 51 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 4 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. *Tempo 4-0-1 on the split squat.*		
A Bulgarian Split Squat Primary: Quadriceps, Glutes Secondary: Hamstrings, Deep core **Weight:** 5 kg each hand **Difficulty:** Advanced	**4 rounds: 8/leg**	Rear foot on the bench, front foot about a stride ahead. Lower the back knee toward the floor with the torso upright and drive up through the front heel. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Static Split Squat
B Staggered-Stance (B-Stance) Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 8/leg**	Keep one foot slightly behind with only the toes on the floor. Hinge with most of the load on the front leg. Switch legs after the set. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Dumbbell Romanian Deadlift
C Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**4 rounds: 15**	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Walking Lunge Primary: Quadriceps, Glutes Secondary: Hamstrings, Calves **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 8/leg**	Take long steps forward, lowering the back knee close to the floor, then drive up and step through. Keep the torso upright. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
B Cossack Squat Primary: Hip abductors / adductors, Quadriceps Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**3 rounds: 6/side**	Wide stance. Shift your weight to one side, sit into a deep one-leg squat while the opposite leg straightens, then switch sides. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lateral Lunge
C Calf Raise, Toes Turned Out (V-stance) Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 15**	Turn the toes out about 30 degrees on the step board edge. Rise slowly, squeeze the inner calf, and lower for 3 seconds. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Wall Sit Primary: Quadriceps Secondary: Glutes **Weight:** Bodyweight (hold one 5 kg dumbbell on the thighs in later weeks) **Difficulty:** Beginner-Intermediate	**3 rounds: 45 s**	Back flat on the wall, thighs parallel to the floor, knees over ankles. Hold the position for the set time. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Wall Sit at a higher angle
B Tibialis Raise (heels on floor, toes up) Primary: Calves Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 15**	Lean against a wall with the heels forward. Lift the toes toward the shins, pause 1 second, and lower slowly. Strengthens the shin muscles that balance the calves. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Seated Toe Raise
Block 4: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Bench Leg Raise (hands gripping bench edge) Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate-Advanced	**3 rounds: 10**	Lie on the bench, hands behind you gripping the edge. Raise straight legs to vertical and lower slowly without arching the back. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Leg Raise
B Reverse Crunch Primary: Lower abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie on your back, knees at 90 degrees. Curl the hips off the floor, bringing the knees toward the chest, and lower slowly without swinging. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Knee Tuck
C Flutter Kicks Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 30 s**	Lie on your back with the lower back pressed to the floor. Make small alternating kicks with straight legs held just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Alternating Leg Lowers

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Couch-Style Wall Quad Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Low Lunge Hip-Flexor Stretch	Hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Pigeon Pose	Glutes and hip rotators	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Step-Board Heel Drop Stretch	Calves	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wide-Legged Seated Stretch	Adductors	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 7 | Wednesday (Day 45 of 56)

Shoulder and Arm Tri-Sets + Obliques

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Shoulders, Biceps / brachialis, Triceps, Forearms, Obliques, Hip abductors / adductors
Supporting muscles: Trapezius / rhomboids, Back (lats / mid-back), Upper abs, Deep core, Glutes, Lower abs
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board March with Knee Drive**	3 min, drive each knee to hip height	3 min
Dynamic mobility	**Thread-the-Needle**	5 per side	1.5 min
Joint activation	**Arm Circles, small to large**	10 each direction	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Cuban Rotation with no weight**	8 reps	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. ***Tempo 3-1-1 on the press; strict form on the raises.***		
A Arnold Press Primary: Shoulders Secondary: Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Start with palms facing you at chin level. Rotate the palms outward as you press up, reverse the motion on the way down. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Seated Dumbbell Shoulder Press
B Leaning Single-Arm Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Hold a bench edge with one hand, lean away, and raise the other arm out to the side. The lean increases tension at the bottom of the rep. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise
C Incline-Bench Prone Rear-Delt Raise Primary: Shoulders Secondary: Trapezius / rhomboids, Back (lats / mid-back) **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Chest-down on the incline bench. Raise dumbbells out to the sides with thumbs pointing slightly up and pause at the top. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bent-Over Rear-Delt Raise
Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Incline Dumbbell Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**3 rounds: 10**	Sit back on the incline bench, arms hanging behind the torso. Curl without moving the elbows forward to stretch the long head. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
B Incline-Bench Overhead Triceps Extension Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Lie back on the incline bench, arms overhead. Bend the elbows to lower the dumbbells behind the head and extend. Keep upper arms fixed. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
C Cuban Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Elbows lifted to shoulder height, upper arms still. Rotate the forearms up until the dumbbells are overhead, then lower back the same path. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Side-Lying External Rotation

Block 3: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Cross-Body Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Curl each dumbbell diagonally across the body toward the opposite shoulder with a neutral grip, then lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
B Single-Arm Overhead Extension (seated) Primary: Triceps Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 10/side**	Sit tall, one arm overhead. Lower the dumbbell behind the head by bending only the elbow, then extend. Finish all reps, then switch. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
C Alternating Front Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 12**	Stand tall. Raise one arm forward to eye level with a neutral grip, lower slowly, and alternate. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Two-Arm Front Raise
Block 4: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Russian Twist Primary: Obliques Secondary: Upper abs, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 24**	Sit leaning back with the feet lifted or on the floor. Rotate the torso side to side, touching the dumbbell near each hip. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Russian Twist, feet on floor
B Side Plank with Top-Leg Lift Primary: Obliques, Hip abductors / adductors Secondary: Deep core, Glutes **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8/side**	In a side plank, raise the top leg a few centimetres, hold 1 second, and lower while the hips stay high. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Side Plank
C Bicycle Crunch Primary: Obliques Secondary: Upper abs, Lower abs **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 20**	Hands by the ears. Bring the opposite elbow toward the opposite knee while extending the other leg, rotating through the ribs, not the neck. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Eagle Arms Stretch	Upper back and rear deltoids	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cross-Body Shoulder Stretch	Rear and side deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Side Bend	Obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Flexor Stretch (palm up, fingers pulled down)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Easy jog	20 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 7 | Thursday (Day 46 of 56)

Posterior Chain Tri-Sets + Deep Core

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Hamstrings, Glutes, Calves, Hip abductors / adductors, Deep core, Lower back
Supporting muscles: Forearms, Quadriceps, Lower abs, Upper abs, Shoulders
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Lateral Step-Overs across the step board**	3 min, 15 per minute each direction	3 min
Dynamic mobility	**Leg Swings (side to side)**	10 per leg	1.5 min
Joint activation	**Hamstring Scoop (walking)**	6 per side	1.5 min
Muscle activation	**Side-Lying Hip Abduction**	10 per side	1 min
Muscle activation	**Single-Leg Glute Bridge**	6 per leg	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. ***Tempo 4-0-1 on the RDL.***		
A Dumbbell Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Soft knees, dumbbells close to the thighs. Push the hips back until you feel a hamstring stretch, spine neutral, then drive the hips forward. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Bodyweight Hip Hinge
B Bench Hip Thrust Primary: Glutes Secondary: Hamstrings, Quadriceps **Weight:** 5 kg (one dumbbell on hips) **Difficulty:** Intermediate	**3 rounds: 12**	Upper back on the bench, feet flat. Drive the hips up with a tucked chin and strong squeeze at the top, lower with control. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
C Feet-Elevated Hamstring Bridge (heels on step board) Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 12**	Lie on your back with heels on the step board, knees slightly bent. Press heels down and lift the hips to a straight line, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Single-Leg Romanian Deadlift (hand supported) Primary: Hamstrings, Glutes Secondary: Lower back, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**3 rounds: 8/leg**	Hold the dumbbell in the hand opposite the standing leg. Hinge on one leg, back leg extending, then return by driving the hips forward. Lightly touch a wall for balance if needed. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Staggered-Stance RDL
B Standing Glute Kickback (hand on bench) Primary: Glutes Secondary: Hamstrings **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	Hand on the bench for balance. Extend one leg straight back with a flat back and squeeze the glute, then return slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Donkey Kick
C Single-Leg Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg (one dumbbell in the working hand) **Difficulty:** Intermediate	**3 rounds: 12/leg**	Stand on one foot on the step board edge, hold a wall for balance. Rise up fully, pause, and lower slowly past the step level. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Two-leg Calf Raise

Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Side-Lying Hip Adduction Primary: Hip abductors / adductors Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 15/side**	Lie on your side with the top leg bent in front on a support. Lift the straight bottom leg up to the top leg, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat
B Side-Lying Hip Abduction Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 15/side**	Lie on your side with the legs straight. Raise the top leg to about 45 degrees, toes forward, and lower for 3 seconds. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Fire Hydrant
Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Dead Bug Primary: Deep core Secondary: Lower abs, Upper abs **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 12/side**	Lie on your back, arms up, hips and knees at 90 degrees. Lower the opposite arm and leg slowly, keeping the lower back flat, then return. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Taps (bent knee)
B Bird-Dog Primary: Deep core, Lower back Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 8/side**	On hands and knees, extend the opposite arm and leg, hold 2 seconds without rotating the hips, and return slowly. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug
C Forearm Plank Primary: Deep core Secondary: Upper abs, Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**2 rounds: 40 s**	Forearms on the floor, body straight, glutes tight, ribs pulled down. Hold while breathing steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Half Split (kneeling)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Hamstring Stretch (heel on step board)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Glute Stretch (ankle on knee)	Glutes	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Downward Dog Pedal	Calves and hamstrings	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cat-Cow	Spine	10 slow reps (about 4 s per rep)	Inhale as you arch, exhale as you round
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Gentle Rib-Cage Expansion Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 7 | Friday (Day 47 of 56)

Back-Chest Tri-Sets, Forearms + Biceps + Deep Core

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Back (lats / mid-back), Deep core, Chest, Shoulders, Trapezius / rhomboids, Forearms, Biceps / brachialis, Obliques, Lower abs
Supporting muscles: Triceps, Upper abs
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step Taps (alternate foot taps with arm swing)**	3 min, steady rhythm	3 min
Dynamic mobility	**Standing Trunk Rotation**	10 per side	1.5 min
Joint activation	**Cat-Cow**	8 slow reps	1.5 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. ***Tempo 3-1-1 on the rows; push-ups with 3 s lowering.***		
A Renegade Row Primary: Back (lats / mid-back), Deep core Secondary: Shoulders, Biceps / brachialis, Chest **Weight:** 5 kg each hand **Difficulty:** Advanced	**3 rounds: 6/side**	High plank with feet wide, hands on dumbbells. Row one dumbbell to the ribs without rotating the hips, lower, and alternate. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Plank Row with hands on bench
B Feet-Elevated Push-Up (feet on step board) Primary: Chest, Shoulders Secondary: Triceps, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8-10**	Place feet on the step board, hands on the floor under shoulders. Keep the body rigid. Lower to the floor, press back up for upper-chest emphasis. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Standard Push-Up
C Dumbbell Shrug with 3-Second Squeeze Primary: Trapezius / rhomboids Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner	**3 rounds: 12**	Stand tall, dumbbells at your sides. Lift shoulders straight up toward the ears, hold 3 seconds, and lower slowly. Do not roll the shoulders. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Seated Shrug

Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Chest-Supported Row (incline bench) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Biceps / brachialis, Shoulders **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Lie chest-down on the incline bench. Let arms hang, then row elbows toward the ceiling and squeeze the shoulder blades together. Lower slowly. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Bent-Over Row with light 3 kg
B Single-Arm Flat Dumbbell Press Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Lie flat with one dumbbell. Press up while keeping hips and torso square; do not let the body rotate. Finish all reps, then switch arms. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Alternating Flat Press with both dumbbells
C Side-Lying External Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**3 rounds: 12/side**	Lie on your side, elbow bent 90 degrees against the ribs. Rotate the forearm up toward the ceiling slowly, then lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Cuban Rotation with no weight

Block 3: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 45 s. Repeat.		
A Seated Wrist Curl (palms up) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms supported on your thighs, palms up. Let the dumbbell roll toward the fingertips, then curl the wrist up and squeeze. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
B Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
C Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl

Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Seated Alternating Curl with Supination Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**2 rounds: 10**	Sit upright on the bench. Curl one arm at a time, rotating the palm up as you lift, and lower slowly. No leaning or swinging. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
B Incline Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**2 rounds: 10**	Sit back on the incline bench with arms hanging, thumbs up. Curl without moving the elbows forward, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
C Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl

Block 5: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Plank Dumbbell Drag (anti-rotation) Primary: Deep core, Obliques Secondary: Shoulders, Back (lats / mid-back) **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**2 rounds: 8/side**	High plank with feet wide, drag the dumbbell from one side to the other under the chest without rotating the hips. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** High Plank Shoulder Tap
B Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 30 s**	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug
C Hollow Body Hold (bent-knee version first) Primary: Deep core, Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 25 s**	Lie on your back, press the lower back down, lift shoulders and legs slightly, and hold. Bend the knees to make it easier. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Puppy Pose	Lats and shoulders	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cat-Cow	Spine and back extensors	10 slow reps (about 4 s per rep)	Inhale as you arch, exhale as you round
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Rear Deltoid Stretch (arm across, bent elbow)	Rear deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Reverse Prayer Stretch	Wrist and forearm	20 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk with incline or stairs	20 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 7 | Saturday (Day 48 of 56)

Arm Tri-Sets, Legs, Shoulders + Step-Board Cardio

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Biceps / brachialis, Triceps, Forearms, Quadriceps, Glutes, Hip abductors / adductors, Shoulders, Chest, Trapezius / rhomboids, Obliques, Lower abs, Deep core
Supporting muscles: Calves, Back (lats / mid-back)
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 53 min + stretching 8 min + breathing 7 min = about 76 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Up-Up-Down-Down Step Pattern**	3 min, alternate the lead foot every minute	3 min
Dynamic mobility	**Arm Circles**	10 each direction	1.5 min
Joint activation	**Walking Knee Hugs**	10 steps	1.5 min
Muscle activation	**Bodyweight Squat**	10 reps	1 min
Muscle activation	**Prone Y Raise on the floor**	8 reps	1 min

B. Main Workout (about 53 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Spider Curl (chest on incline bench) Primary: Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Lie chest-down on the incline bench with arms hanging straight down. Curl without swinging and squeeze hard at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Concentration Curl
B Lying Dumbbell Triceps Extension Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Lie flat with arms vertical. Bend only at the elbows to lower the dumbbells beside the temples, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Two-Hand Overhead Extension
C Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 10**	Neutral (thumbs-up) grip. Curl both dumbbells without swinging, squeezing the biceps and brachialis at the top. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Cross-Body Hammer Curl
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Step-Up (step board) Primary: Quadriceps, Glutes Secondary: Calves **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**3 rounds: 12/leg**	Place the whole foot on the step board, drive through the heel to stand tall, and lower slowly with control. Complete reps on one leg, then switch. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Lower step with bodyweight only
B Sumo Goblet Squat Primary: Quadriceps, Glutes, Hip abductors / adductors Secondary: Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**3 rounds: 12**	Wide stance, toes turned out about 45 degrees, dumbbell hanging between the legs. Lower with knees tracking over toes and squeeze the glutes and inner thighs to stand. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Goblet Squat

Block 3: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 45 s. Repeat.		
A Scaption Raise (thumbs-up Y raise) Primary: Shoulders Secondary: Trapezius / rhomboids **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Raise arms in a V (about 30 degrees in front of the body) to eye level with thumbs up. Keep shoulders down. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Front Raise
B Diamond Push-Up Primary: Chest, Triceps Secondary: - **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8-10**	Hands together under the chest with thumbs and index fingers forming a diamond. Keep elbows tucked, lower the chest to the hands and press up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Incline Push-Up (hands on bench)
C Wall Angel Primary: Shoulders, Trapezius / rhomboids Secondary: Back (lats / mid-back) **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 10**	Stand with back, head and arms against a wall. Slide arms up and down the wall without letting the lower back arch. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Snow Angel
Block 4: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Side-Lying Oblique Crunch Primary: Obliques Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 12/side**	Lie on your side, knees bent. Lift the top shoulder and hips toward each other by crunching the side abs, then lower slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches
B Lying Windshield Wipers (bent knees) Primary: Obliques, Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 10/side**	Lie on your back, arms out wide, knees at 90 degrees. Lower the knees to one side slowly, return to centre, and switch. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Lying Knee Rock
C Cross-Body Mountain Climber Primary: Obliques, Deep core Secondary: Lower abs, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**3 rounds: 16**	In a high plank, drive one knee toward the opposite elbow, alternate, keeping hips level. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Slow Plank Knee Tap

Cardio finisher (8 min): Step-Board Interval Finisher: 8 rounds of 45 s step-ups + 15 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Kneeling Biceps Stretch (palms on floor, fingers back)	Biceps and forearms	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Triceps Stretch	Triceps long head	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half-Kneeling Hip-Flexor Stretch with overhead reach	Hip flexors and side body	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Couch-Style Wall Quad Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 7 | Sunday (Day 49 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 4: Peak (Advanced Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 25 min + yoga 25 min + breathing 9 min = about 59 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Easy Jog with Walk Breaks	25 min	4 min jog, 1 min walk, repeat 5 times, RPE 5. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Full-Body Gentle Flow (25 min)

Pose / stretch	Time	Target	Breathing
Gentle Sun Salutation, 4 slow rounds	6 min	Full body	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Warrior II (each side)	3 min	Legs, hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Standing Forward Fold	2 min	Hamstrings	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Pigeon Pose (each side)	4 min	Glutes, hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Bridge Pose	3 min	Chest, glutes	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Cobra Pose	2 min	Chest, abs	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Child's Pose	2 min	Back	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Spinal Twist (each side)	3 min	Spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before cardio	3 min, 18 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Diaphragmatic (belly) Breathing	After yoga (rest and recovery)	6 min, 36 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Week 8 | Monday (Day 50 of 56)

Chest-Back Peak Tri-Sets (Controlled) + Biceps + Upper Abs

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Chest, Back (lats / mid-back), Deep core, Triceps, Trapezius / rhomboids, Lower back, Forearms, Obliques, Biceps / brachialis, Upper abs, Lower abs
Supporting muscles: Shoulders, Glutes
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 53 min + stretching 8 min + breathing 7 min = about 76 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Alternating Step-Ups on the step board**	3 min, easy pace (about 40 steps per minute per leg)	3 min
Dynamic mobility	**Cat-Cow**	8 slow reps	1.5 min
Joint activation	**Standing Trunk Rotation**	10 per side	1.5 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min
Muscle activation	**Scapular Push-Up**	10 reps	1 min

B. Main Workout (about 53 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat.
5 s lowering on the press; 2 s squeeze on the row.

A Incline Dumbbell Press Primary: Chest Secondary: Shoulders, Triceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Set the bench to a low-medium incline. Keep shoulder blades back. Press up and slightly together over the upper chest, lower slowly to upper-chest level. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up (hands on bench)
B Staggered-Stance Lawnmower Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Deep core, Glutes **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**3 rounds: 10/side**	Split stance, hinge forward, dumbbell in the hand opposite the front foot. Row like starting a lawnmower, keeping hips square. Switch sides after all reps. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row on bench
C Flat Dumbbell Fly Primary: Chest Secondary: Shoulders **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 12**	Lie flat, arms slightly bent. Open the arms in a wide arc until you feel a chest stretch, then bring the dumbbells back over the chest as if hugging a tree. Keep elbow bend fixed. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Fly (lying on floor)

Block 2: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.
Controlled; stop 2 reps before failure.

A Glute-Bridge Dumbbell Press Primary: Chest Secondary: Triceps, Glutes, Deep core **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Upper back on the flat bench, hips lifted level with the knees. Keep the bridge steady and press the dumbbells from chest level to straight arms. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Flat Dumbbell Bench Press
B Bird-Dog Dumbbell Row Primary: Back (lats / mid-back), Deep core Secondary: Lower back, Glutes **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 10/side**	Kneel on the bench with opposite knee and hand supported, extend the free leg back, and row the dumbbell with the other arm. Keep the spine neutral. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row
C Diamond Push-Up Primary: Chest, Triceps Secondary: - **Weight:** Bodyweight **Difficulty:** Advanced	**2 rounds: 8-10**	Hands together under the chest with thumbs and index fingers forming a diamond. Keep elbows tucked, lower the chest to the hands and press up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Close-Grip Incline Push-Up (hands on bench)

Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Wide-Elbow Bent-Over Row (rear-back emphasis) Primary: Back (lats / mid-back), Trapezius / rhomboids Secondary: Shoulders, Lower back **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Hinge forward, palms facing down. Row with elbows flared to 90 degrees, aiming at the rear delts and upper back. Squeeze for 1 second. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row
B Prone Cobra Hold Primary: Lower back, Trapezius / rhomboids Secondary: Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 20 s**	Lie face down, hands by the ribs. Lift the chest slightly using the back muscles (not the hands), squeeze shoulder blades together and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Superman Hold
Block 4: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Suitcase Hold (single dumbbell) Primary: Forearms, Obliques Secondary: Deep core, Trapezius / rhomboids **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**2 rounds: 40 s/side**	Hold one dumbbell at your side without leaning toward it. Stand tall for the set time, then switch hands. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Farmer Hold Walk
B Forearm Pronation-Supination Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**2 rounds: 12**	Forearm on the thigh, hold the dumbbell near one end like a hammer. Rotate the forearm palm up, then palm down, slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Hammer Wrist Raise
Block 5: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat. ***Controlled; stop 2 reps before failure.***		
A Drag Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Keep the dumbbells touching the front of the body and drag them up the torso by pulling the elbows back. Squeeze the biceps at the top and lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
B Seated Alternating Curl with Supination Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**2 rounds: 10**	Sit upright on the bench. Curl one arm at a time, rotating the palm up as you lift, and lower slowly. No leaning or swinging. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Alternating Dumbbell Curl
C Isometric Curl Hold (90 degrees) Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 25 s**	Curl both dumbbells to 90 degrees at the elbow and hold still for the set time. Keep the shoulders relaxed and breathe steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Hammer Curl Hold
Block 6: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat. ***Slow crunch: 3 s up, 2 s hold, 3 s down.***		
A Slow Crunch Primary: Upper abs Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 12**	Lie on your back, knees bent, hands by the ears. Curl the ribs toward the hips in 2 seconds, hold 1 second, and lower in 3 seconds. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Reaching Crunch
B Dead Bug Primary: Deep core Secondary: Lower abs, Upper abs **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 10/side**	Lie on your back, arms up, hips and knees at 90 degrees. Lower the opposite arm and leg slowly, keeping the lower back flat, then return. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Taps (bent knee)
C Hollow Body Hold (bent-knee version first) Primary: Deep core, Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 25 s**	Lie on your back, press the lower back down, lift shoulders and legs slightly, and hold. Bend the knees to make it easier. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Doorway Chest Stretch	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Chest Opener (hands clasped behind)	Chest and front shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Thoracic Twist	Mid-back and obliques	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Puppy Pose	Lats and shoulders	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen
Forearm Extensor Stretch (palm down, fingers pulled in)	Wrist extensors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Pursed-Lip Breathing	Before the workout	2 min, 20 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.
Box Breathing (gentle)	After the workout	5 min, 19 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 8 | Tuesday (Day 51 of 56)

Quadriceps Peak Tri-Sets (Controlled) + Lower Abs

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Quadriceps, Glutes, Hamstrings, Hip abductors / adductors, Calves, Lower abs
Supporting muscles: Deep core, Lower back, Upper abs, Obliques
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 48 min + stretching 8 min + breathing 7 min = about 71 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Board March with Knee Drive**	3 min, drive each knee to hip height	3 min
Dynamic mobility	**World's Greatest Stretch**	4 per side	1.5 min
Joint activation	**Leg Swings (front to back)**	10 per leg	1.5 min
Muscle activation	**Lateral Step-Down on the step board**	6 per leg	1 min
Muscle activation	**Glute Bridge**	12 reps	1 min

B. Main Workout (about 48 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 4 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. *4 s lowering on the squat.*		
A Heel-Elevated Goblet Squat (heels on step board) Primary: Quadriceps Secondary: Glutes, Deep core **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**4 rounds: 12**	Place heels on the step board. Squat deeply, keeping the torso upright and knees tracking over the toes for quad emphasis. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Goblet Squat
B Static Split Squat (2-second pause) Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 8/leg**	Hold a split stance. Lower straight down, pause 2 seconds with the back knee just above the floor, and drive up. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
C Hamstring Bridge Walk-Out Primary: Hamstrings Secondary: Glutes, Lower back **Weight:** Bodyweight **Difficulty:** Intermediate	**4 rounds: 8**	From a glute bridge, walk the feet slowly outward with small steps while holding the hips up, then walk back in. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Hamstring Bridge
Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Lateral Step-Up Primary: Quadriceps, Glutes Secondary: Hip abductors / adductors **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**3 rounds: 10/leg**	Stand side-on to the step board. Step up sideways, bring the trailing leg to a stand, and lower slowly with the working leg. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Step-Up
B Lateral Lunge Primary: Hip abductors / adductors, Quadriceps Secondary: Glutes, Hamstrings **Weight:** 5 kg (one dumbbell at chest) **Difficulty:** Intermediate	**3 rounds: 8/side**	Step wide to one side, push the hips back, and lower into that leg while the other leg stays straight. Push back to the start. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat (bodyweight)
C Pogo Hops Primary: Calves Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 20**	Stand tall and hop gently using the ankles only, knees almost straight, light and quick on the toes. Land softly. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Calf Raise on the floor

Block 3: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Wall Sit Primary: Quadriceps Secondary: Glutes **Weight:** Bodyweight (hold one 5 kg dumbbell on the thighs in later weeks) **Difficulty:** Beginner-Intermediate	**3 rounds: 50 s**	Back flat on the wall, thighs parallel to the floor, knees over ankles. Hold the position for the set time. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Wall Sit at a higher angle
B Calf Raise, Toes Turned In Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 15**	Turn the toes slightly inward, rise to the balls of the feet, pause 1 second, and lower slowly into a full stretch. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Lying Leg Raise Primary: Lower abs Secondary: Upper abs, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 12**	Lie on your back with legs straight and hands under the hips. Lift the legs to vertical, then lower slowly to just above the floor. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bent-Knee Leg Raise
B Scissor Kicks Primary: Lower abs Secondary: Obliques, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 30 s**	Lie on your back with the legs slightly off the floor. Cross the legs over each other in a controlled scissor motion. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Flutter Kicks
C Bench Knee Tuck Primary: Lower abs Secondary: Upper abs **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 12**	Sit on the bench edge, lean back slightly, and draw the knees to the chest while curling the pelvis, then extend slowly. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Reverse Crunch

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Quadriceps Stretch	Quadriceps and hip flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Half-Kneeling Hip-Flexor Stretch with overhead reach	Hip flexors and side body	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supine Knee-to-Chest Hug	Glutes and lower back	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Calf Stretch (straight knee)	Gastrocnemius	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Butterfly Stretch	Adductors and hips	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Relaxation (extended-exhale) Breathing	Before the workout	2 min, 10 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.
Slow Controlled Nasal Breathing	After the workout	5 min, 30 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 8 | Wednesday (Day 52 of 56)

Shoulder and Arm Peak Tri-Sets (Controlled) + Obliques

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Shoulders, Deep core, Biceps / brachialis, Triceps, Forearms, Obliques
Supporting muscles: -
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 50 min + stretching 8 min + breathing 7 min = about 73 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Lateral Step-Overs across the step board**	3 min, 15 per minute each direction	3 min
Dynamic mobility	**Cross-Body Arm Swings**	10 reps	1.5 min
Joint activation	**Shoulder Rolls**	10 backward	1.5 min
Muscle activation	**Cuban Rotation with no weight**	8 reps	1 min
Muscle activation	**Side-Lying External Rotation, no weight**	8 per side	1 min

B. Main Workout (about 50 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 4 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. ***Tempo 3-1-1 on the press; slow raises.***		
A Half-Kneeling Single-Arm Press Primary: Shoulders, Deep core Secondary: Triceps **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**4 rounds: 8/side**	Kneel on one knee with the dumbbell at the shoulder on the side of the kneeling knee. Squeeze the glutes, keep ribs down, press overhead and lower slowly. Finish all reps, then switch sides. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Seated Single-Arm Press
B Seated Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**4 rounds: 12**	Sit on the bench, no swinging. Raise arms to shoulder height, hold 1 second, and lower slowly. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Standing Lateral Raise
C Side-Lying Rear-Delt Raise Primary: Shoulders Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Beginner	**4 rounds: 12/side**	Lie on your side on the flat bench or floor. Raise the top arm from in front of the chest up to the ceiling, elbow slightly bent. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Bent-Over Rear-Delt Raise
Block 2: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Seated Concentration Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner-Intermediate	**2 rounds: 10/arm**	Sit on the bench edge, elbow on inner thigh. Curl the dumbbell to the shoulder, squeeze 1 second, lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
B Tate Press Primary: Triceps Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Lie flat, dumbbells over the chest with elbows flared. Bend elbows to lower the dumbbells toward the chest, then extend. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Lying Dumbbell Triceps Extension
C Zottman Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Curl with palms up, rotate to palms down at the top, then lower slowly with the reverse grip. Rotate back at the bottom. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl

Block 3: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 45 s. Repeat. *Final shoulder finisher; stop at 2 RIR.*		
A Standing Lateral Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner-Intermediate	**2 rounds: 15**	Stand tall with a slight forward lean. Raise arms out to the sides to shoulder height, leading with the elbows, lower for 3 seconds. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Seated Lateral Raise
B Alternating Front Raise Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 12**	Stand tall. Raise one arm forward to eye level with a neutral grip, lower slowly, and alternate. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Two-Arm Front Raise
C Cuban Rotation Primary: Shoulders Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 10**	Elbows lifted to shoulder height, upper arms still. Rotate the forearms up until the dumbbells are overhead, then lower back the same path. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Side-Lying External Rotation
Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Side Plank Hip Dip Primary: Obliques Secondary: Deep core, Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 12/side**	In a side plank, lower the hip to just above the floor and lift back to the line with control. Repeat on both sides. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Side Plank
B Alternating Heel Touches Primary: Obliques Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 20**	Lie on your back, knees bent, shoulders slightly lifted. Reach alternately to each heel with the same-side hand. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Bicycle Crunch
C Standing Dumbbell Side Bend Primary: Obliques Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Beginner	**2 rounds: 12/side**	Stand tall with a dumbbell in one hand. Bend sideways at the waist, then return upright using the opposite-side obliques. Complete reps then switch. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Cross-Body Shoulder Stretch	Rear and side deltoid	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Overhead Shoulder Stretch (elbow pull)	Deltoid and triceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Cobra Stretch	Abs and hip flexors	20 s hold x 3 reps	Inhale to prepare; exhale slowly as you deepen
Forearm Extensor Stretch (palm down, fingers pulled in)	Wrist extensors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Box Breathing (gentle)	Before the workout	2 min, 8 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Step-board steady rhythm	15 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 8 | Thursday (Day 53 of 56)

Posterior Chain Peak Tri-Sets (Controlled) + Deep Core

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Glutes, Hip abductors / adductors, Quadriceps, Calves, Hamstrings, Deep core
Supporting muscles: Lower back, Shoulders, Upper abs
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 52 min + stretching 8 min + breathing 7 min = about 75 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step Taps (alternate foot taps with arm swing)**	3 min, steady rhythm	3 min
Dynamic mobility	**Hip Hinge with a hold**	8 reps	1.5 min
Joint activation	**Inchworm walk-outs**	5 reps	1.5 min
Muscle activation	**Single-Leg Glute Bridge**	6 per leg	1 min
Muscle activation	**Donkey Kick**	8 per side	1 min

B. Main Workout (about 52 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 4 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. ***4 s lowering on the deadlift.***		
A Sumo Dumbbell Deadlift Primary: Glutes, Hip abductors / adductors, Quadriceps Secondary: Hamstrings, Lower back **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**4 rounds: 12**	Wide stance, hold one dumbbell between the legs. Lower by hinging and bending the knees with a flat back, then stand by squeezing the glutes and inner thighs. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Sumo Goblet Squat
B Single-Leg Glute Bridge Primary: Glutes Secondary: Hamstrings, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**4 rounds: 10/leg**	Lie on your back with one knee hugged to the chest. Drive through the other heel to lift the hips level and lower slowly. Switch legs after the set. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Weighted Glute Bridge
C Seated Calf Raise (dumbbells on knees) Primary: Calves Secondary: - **Weight:** 5 kg each hand (resting on the knees) **Difficulty:** Beginner-Intermediate	**4 rounds: 15**	Sit on the bench with the balls of the feet on the step board. Rest the dumbbells on the knees, lift the heels as high as possible and lower slowly. Targets the soleus. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Standing Calf Raise
Block 2: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat. ***Controlled; stop 2 reps before failure.***		
A Staggered-Stance (B-Stance) Romanian Deadlift Primary: Hamstrings, Glutes Secondary: Lower back **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 8/leg**	Keep one foot slightly behind with only the toes on the floor. Hinge with most of the load on the front leg. Switch legs after the set. **Breathing:** Inhale as the hips travel back; exhale as you drive the hips forward. **Alternative:** Dumbbell Romanian Deadlift
B Frog Pump Primary: Glutes Secondary: Hip abductors / adductors **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**3 rounds: 15**	Lie on your back with the soles of the feet together and knees wide. Thrust the hips up, squeeze, and lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Glute Bridge
C Fire Hydrant Primary: Hip abductors / adductors, Glutes Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12/side**	On hands and knees, lift one knee out to the side while the hips stay level, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Side-Lying Hip Abduction

Block 3: SUPERSET | 2 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 30 s. Repeat.		
A Side-Lying Hip Adduction Primary: Hip abductors / adductors Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 12/side**	Lie on your side with the top leg bent in front on a support. Lift the straight bottom leg up to the top leg, then lower slowly. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Cossack Squat
B Standing Calf Raise (step board edge) Primary: Calves Secondary: - **Weight:** 5 kg each hand **Difficulty:** Beginner-Intermediate	**2 rounds: 15**	Balls of the feet on the step board edge, heels hanging. Rise high onto the toes, pause 1 second, and lower into a full stretch. **Breathing:** Exhale as you rise onto the toes; inhale as you lower slowly. **Alternative:** Bodyweight Calf Raise on the floor
Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Bear Hold (knees hovering) Primary: Deep core Secondary: Shoulders, Quadriceps **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 20 s**	From hands and knees, lift the knees 2 cm off the floor. Keep the back flat and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees
B Stomach Vacuum (transverse abdominis hold) Primary: Deep core Secondary: - **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 30 s**	Exhale fully, draw the belly button toward the spine, hold the contraction while breathing shallowly, and relax. Do not strain. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Dead Bug
C Forearm Plank Primary: Deep core Secondary: Upper abs, Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**2 rounds: 40 s**	Forearms on the floor, body straight, glutes tight, ribs pulled down. Hold while breathing steadily. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Standing Hamstring Stretch (heel on step board)	Hamstrings	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Seated Forward Fold	Hamstrings and lower back	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Pigeon Pose	Glutes and hip rotators	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Step-Board Heel Drop Stretch	Calves	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Gentle Standing Side-Body Stretch	Obliques and lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Relaxation (extended-exhale) Breathing	After the workout	5 min, 25 cycles	In 4 s / Out 8 s	Lie or sit comfortably. Inhale 4 s, exhale 8 s with the shoulders and jaw relaxed.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 8 | Friday (Day 54 of 56)

Back-Chest Peak Tri-Sets, Forearms + Biceps + Deep Core

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Back (lats / mid-back), Chest, Lower back, Trapezius / rhomboids, Shoulders, Forearms, Biceps / brachialis, Deep core, Obliques
Supporting muscles: Triceps, Glutes, Hamstrings, Quadriceps
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 47 min + stretching 8 min + breathing 7 min = about 70 min (breathing can be done separately).
Plus: 15-20 min easy fat-loss cardio (section E).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Up-Up-Down-Down Step Pattern**	3 min, alternate the lead foot every minute	3 min
Dynamic mobility	**Arm Circles (forward and backward)**	10 each direction	1.5 min
Joint activation	**Thread-the-Needle**	5 per side	1.5 min
Muscle activation	**Band-free Shoulder Blade Squeeze (hold 3 s)**	10 reps	1 min
Muscle activation	**Dead Bug (slow)**	6 per side	1 min

B. Main Workout (about 47 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 75 s. Repeat. *3 s lowering on the row; 2 s squeeze.*		
A Underhand Bent-Over Row Primary: Back (lats / mid-back) Secondary: Biceps / brachialis, Lower back, Forearms **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10-12**	Hinge forward with palms facing up. Row toward the lower belly, elbows brushing the sides, squeeze lats at the top. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Single-Arm Dumbbell Row
B Archer Push-Up Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 6/side**	Wide hand position. Lower toward one hand while the other arm stays nearly straight, then press back and alternate sides. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Staggered-Hand Push-Up
C Prone Snow Angel Primary: Lower back, Trapezius / rhomboids Secondary: Shoulders, Glutes **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 10**	Lie face down, arms by sides and lifted slightly. Sweep the arms overhead and back to the hips while keeping the chest slightly lifted. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Prone Cobra Hold
Block 2: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Bent-Over Dumbbell Row (two arms) Primary: Back (lats / mid-back), Lower back Secondary: Biceps / brachialis, Forearms, Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Hinge forward with a flat back and soft knees. Row both dumbbells to the lower ribs, pause, then lower under control. **Breathing:** Inhale as the arms lengthen; exhale as you pull the elbows back. **Alternative:** Chest-Supported Row
B Standard Push-Up Primary: Chest Secondary: Triceps, Shoulders, Deep core **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 10**	Hands slightly wider than shoulders, body in a straight line. Lower the chest to the floor under control, press back up without sagging the hips. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Incline Push-Up (hands on bench) or knee push-up
C Wall Angel Primary: Shoulders, Trapezius / rhomboids Secondary: Back (lats / mid-back) **Weight:** Bodyweight **Difficulty:** Beginner	**2 rounds: 10**	Stand with back, head and arms against a wall. Slide arms up and down the wall without letting the lower back arch. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Floor Snow Angel

Block 3: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 45 s. Repeat.		
A Dumbbell Finger Roll-and-Curl Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Hold the dumbbell with the palm up. Let it roll to the fingertips, close the fingers, then curl the wrist up. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl
B Hammer-Grip Wrist Raise Primary: Forearms Secondary: - **Weight:** 3 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 12/hand**	Forearm on the thigh, thumb up. Raise and lower only the wrist (radial deviation), slowly. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Seated Wrist Curl
C Seated Wrist Extension (palms down) Primary: Forearms Secondary: - **Weight:** 3 kg each hand **Difficulty:** Beginner	**2 rounds: 15**	Sit with forearms on your thighs, palms down. Lower the wrists, then raise the back of the hand up slowly. Use a smooth tempo. **Breathing:** Breathe steadily; avoid clenching the jaw or holding the breath. **Alternative:** Reverse Curl
Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat. ***Controlled; stop 2 reps before failure.***		
A Single-Arm Incline-Bench Preacher Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 10/arm**	Rest the back of one upper arm on the top of the incline bench, arm fully extended. Curl up without lifting the elbow, squeeze 1 second, lower for 3 seconds. Finish all reps, then switch. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Seated Concentration Curl
B 21s Curl (7 bottom half, 7 top half, 7 full) Primary: Biceps / brachialis Secondary: Forearms **Weight:** 3 kg each hand **Difficulty:** Advanced	**2 rounds: 21**	Do 7 curls from the bottom to halfway, then 7 from halfway to the top, then 7 full curls with no rest. Use the 3 kg dumbbells and strict form. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standard Curl, 12 reps
C Reverse Curl Primary: Forearms, Biceps / brachialis Secondary: - **Weight:** 3 kg each hand **Difficulty:** Intermediate	**2 rounds: 12**	Palms facing down. Curl the dumbbells with wrists neutral, elbows still, then lower for 3 seconds. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Block 5: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A High Plank Shoulder Tap Primary: Deep core, Obliques Secondary: Shoulders **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 12/side**	From a high plank with feet wide, tap one shoulder with the opposite hand while keeping the hips still. Alternate. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Plank with knees down
B Bear Hold (knees hovering) Primary: Deep core Secondary: Shoulders, Quadriceps **Weight:** Bodyweight **Difficulty:** Intermediate	**2 rounds: 25 s**	From hands and knees, lift the knees 2 cm off the floor. Keep the back flat and hold. **Breathing:** Breathe slowly through the nose (in 4 s, out 4 s) during the hold; do not hold your breath. **Alternative:** Plank on knees
C Plank Dumbbell Drag (anti-rotation) Primary: Deep core, Obliques Secondary: Shoulders, Back (lats / mid-back) **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate-Advanced	**2 rounds: 6/side**	High plank with feet wide, drag the dumbbell from one side to the other under the chest without rotating the hips. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** High Plank Shoulder Tap

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Child's Pose, Walk Hands to One Side	Lats	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose with Arms Extended	Lats and spine	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

Stretch	Target muscle	Duration and repetitions	Breathing
Eagle Arms Stretch	Upper back and rear deltoids	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Forearm Flexor Stretch (palm up, fingers pulled down)	Wrist flexors	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Slow Controlled Nasal Breathing	Before the workout	2 min, 12 cycles	In 5 s / Out 5 s	Breathe in and out through the nose only, smooth and quiet, at about 6 breaths per minute.
Diaphragmatic (belly) Breathing	After the workout	5 min, 30 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

E. Fat-Loss Cardio (easy pace, separate from the main workout)

Activity	Duration	Intensity guide
Brisk walk	15 min	Zone 2: RPE 4-5 of 10, you can speak in full sentences. Do it after the workout or later in the day, not instead of stretching. Low impact keeps recovery intact.

Week 8 | Saturday (Day 55 of 56)

Arm Peak Tri-Sets, Legs, Shoulders + Step-Board Cardio

Phase 4: Peak (Advanced Intensity)
Intensity target: 1-2 RIR (Week 8: 2 RIR, volume trimmed)

Target muscles (primary): Biceps / brachialis, Triceps, Forearms, Glutes, Hip abductors / adductors, Quadriceps, Shoulders, Chest, Obliques, Lower abs
Supporting muscles: Hamstrings, Deep core, Trapezius / rhomboids, Upper abs
Method this week: Tri-sets, tempo training, controlled eccentrics, finishing exercises
Estimated time: warm-up 8 min + main workout about 49 min + stretching 8 min + breathing 7 min = about 72 min (breathing can be done separately).

A. Pre-Workout Warm-Up (8 min)

Type	Exercise	Duration / reps	Time
Light cardio / step board	**Step-Ups with Overhead Reach**	3 min, reach the opposite arm up on each step	3 min
Dynamic mobility	**Open-Book Thoracic Rotation**	6 per side	1.5 min
Joint activation	**Hip Circles**	8 each direction	1.5 min
Muscle activation	**Prone Y Raise on the floor**	8 reps	1 min
Muscle activation	**Incline Push-Up (easy)**	8 reps	1 min

B. Main Workout (about 49 min)

Weights: only 3 kg and 5 kg dumbbells are used. Each exercise lists its own weight.

Block 1: TRI-SET | 4 rounds. Do A, B and C consecutively with no rest, then rest 60 s. Repeat.		
A Incline Dumbbell Curl Primary: Biceps / brachialis Secondary: - **Weight:** 5 kg each hand (use 3 kg if form breaks) **Difficulty:** Intermediate	**4 rounds: 10**	Sit back on the incline bench, arms hanging behind the torso. Curl without moving the elbows forward to stretch the long head. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Standing Alternating Curl
B Feet-Elevated Bench Dip (feet on step board) Primary: Triceps Secondary: Chest, Shoulders **Weight:** Bodyweight **Difficulty:** Advanced	**4 rounds: 10**	Hands on the bench, heels on the step board, legs straight. Lower slowly under control and press up. **Breathing:** Inhale as the weight lowers; exhale as you extend the elbows. **Alternative:** Bench Dip (feet on floor)
C Cross-Body Hammer Curl Primary: Biceps / brachialis, Forearms Secondary: - **Weight:** 5 kg each hand **Difficulty:** Intermediate	**4 rounds: 10**	Curl each dumbbell diagonally across the body toward the opposite shoulder with a neutral grip, then lower slowly. **Breathing:** Inhale as the arm lowers; exhale as you curl up. **Alternative:** Hammer Curl
Block 2: SUPERSET | 3 rounds. Do Exercise A, then Exercise B straight away with no rest, then rest 45 s. Repeat.		
A Curtsy Lunge Primary: Glutes, Hip abductors / adductors Secondary: Quadriceps **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 10/leg**	Step one leg diagonally behind the other, lower into a lunge, then drive up through the front heel to the start. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge
B Static Split Squat (2-second pause) Primary: Quadriceps, Glutes Secondary: Hamstrings **Weight:** 5 kg each hand **Difficulty:** Intermediate	**3 rounds: 8/leg**	Hold a split stance. Lower straight down, pause 2 seconds with the back knee just above the floor, and drive up. **Breathing:** Inhale on the way down; exhale as you drive up. Never hold your breath. **Alternative:** Reverse Lunge

Block 3: TRI-SET | 3 rounds. Do A, B and C consecutively with no rest, then rest 45 s. Repeat.		
A Pike Push-Up Primary: Shoulders Secondary: Triceps, Chest, Deep core **Weight:** Bodyweight **Difficulty:** Advanced	**3 rounds: 8**	Hips high in an inverted V, hands shoulder-width. Bend elbows to lower the head toward the floor between the hands, then press back up. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Hands-on-bench Incline Pike Push-Up
B Scaption Raise (thumbs-up Y raise) Primary: Shoulders Secondary: Trapezius / rhomboids **Weight:** 3 kg each hand **Difficulty:** Intermediate	**3 rounds: 10**	Raise arms in a V (about 30 degrees in front of the body) to eye level with thumbs up. Keep shoulders down. **Breathing:** Inhale at the bottom; exhale as you raise; inhale slowly during the lowering phase. **Alternative:** Front Raise
C Incline Push-Up (hands on bench) Primary: Chest Secondary: Triceps, Shoulders **Weight:** Bodyweight **Difficulty:** Beginner	**3 rounds: 12-15**	Hands on the flat bench, body straight from head to heels. Lower the chest to the bench edge and press away. **Breathing:** Inhale through the nose while lowering; exhale through pursed lips while pressing. **Alternative:** Wall Push-Up
Block 4: TRI-SET | 2 rounds. Do A, B and C consecutively with no rest, then rest 30 s. Repeat.		
A Russian Twist Primary: Obliques Secondary: Upper abs, Deep core **Weight:** 5 kg (one dumbbell) **Difficulty:** Intermediate	**2 rounds: 20**	Sit leaning back with the feet lifted or on the floor. Rotate the torso side to side, touching the dumbbell near each hip. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Russian Twist, feet on floor
B Alternating Leg Lowers Primary: Lower abs Secondary: Deep core **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**2 rounds: 12**	Lie on your back with both legs vertical. Lower one leg slowly toward the floor while the lower back stays flat, then raise and alternate. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Dead Bug
C Bicycle Crunch Primary: Obliques Secondary: Upper abs, Lower abs **Weight:** Bodyweight **Difficulty:** Beginner-Intermediate	**2 rounds: 20**	Hands by the ears. Bring the opposite elbow toward the opposite knee while extending the other leg, rotating through the ribs, not the neck. **Breathing:** Exhale fully on the hardest part (ribs toward hips); inhale as you return. **Alternative:** Heel Touches

Cardio finisher (6 min): Step-Board Interval Finisher (peak but controlled): 6 rounds of 45 s step-ups + 15 s easy march. Keep the pace brisk but controlled; breathe through the nose when possible, finish with 1 min of easy marching.

C. Post-Workout Stretching (8 min)

Stretch	Target muscle	Duration and repetitions	Breathing
Wall Biceps Stretch (palm on wall, rotate away)	Biceps and brachialis	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Behind-Back Triceps Reach	Triceps and shoulders	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Supported Chest Stretch (arm resting on the bench)	Pectorals	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Kneeling Hip-Flexor Stretch	Hip flexors and quads	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Standing Quadriceps Stretch	Quadriceps	30 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper
Child's Pose	Lower back and abs	40 s hold x 2 reps (each side where applicable)	Inhale 4 s through the nose; exhale 6 s, sinking gently deeper

D. Daily Breathing Exercises (7 min total: 2 min before + 5 min after)

Technique	When	Duration / cycles	Timing	How
Gentle Rib-Cage Expansion Breathing	Before the workout	2 min, 12 cycles	In 4 s / Out 6 s	Hands on the lower ribs. Breathe in so the ribs widen sideways under your hands; exhale and let them soften.
Pursed-Lip Breathing	After the workout	5 min, 50 cycles	In 2 s / Out 4 s	Inhale through the nose for 2 s, exhale through gently pursed lips for 4 s. Never force the exhale.

Breathing rules: smooth and comfortable only. Never force the breath, hyperventilate or hold your breath aggressively. Breathing practice supports relaxation and breathing coordination; it does not by itself increase lung capacity or prevent disease.

Week 8 | Sunday (Day 56 of 56)

Active Recovery: Cardio, Full-Body Yoga and Breathing

Phase 4: Peak (Advanced Intensity)
Intensity: easy (RPE 3-5 of 10)

Purpose: support muscle recovery and flexibility. This is not a workout day: keep everything easy.
Estimated time: cardio 20 min + yoga 25 min + breathing 9 min = about 54 min.
Areas mobilised: hips, shoulders, spine, hamstrings, quadriceps, calves, chest and back.

A. Light-to-Moderate Cardio

Activity	Duration	Intensity guide
Easy Walk or Jog (recovery week)	20 min	Keep it very easy, RPE 3-4 of 10. You should be able to speak in full sentences.

Start with 3 minutes at a very easy pace and end with 2 minutes of slow walking. Breathe in and out through the nose where possible.

B. Full-Body Stretching and Yoga: Restorative Recovery Flow (25 min)

Pose / stretch	Time	Target	Breathing
Supported Child's Pose	3 min	Back, hips	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Legs Up the Wall or Bench	5 min	Circulation, legs	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supported Bridge	3 min	Spine, chest	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Reclined Butterfly	4 min	Adductors	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Supine Spinal Twist (each side)	4 min	Spine	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale
Savasana	6 min	Full relaxation	Slow nasal breathing: in 4 s, out 6 s; relax into each exhale

C. Daily Breathing Exercises (9 min total)

Technique	When	Duration / cycles	Timing	How
Diaphragmatic (belly) Breathing	Before cardio	3 min, 18 cycles	In 4 s / Out 6 s	One hand on the belly, one on the chest. Breathe in through the nose so the belly rises, breathe out slowly through the nose or lips.
Box Breathing (gentle)	After yoga (rest and recovery)	6 min, 22 cycles	In 4 s, hold 4 s / Out 4 s, hold 4 s	Equal 4-second phases. Keep the holds soft; stop the holds if you feel dizzy or uncomfortable and return to easy breathing.

Breathing rules: smooth and comfortable only; no forced breathing, hyperventilation or aggressive breath-holds.

Part 3: Weekly Progression Summary

Week	Intensity	Training method	Sets and reps	Rest	Progression objective
1	Medium (Phase 1)	Straight sets, 3 s lowering, activation focus	3 sets x 10-15 (4 sets on goblet squat)	60-75 s	Learn technique; establish baseline volume
2	Medium (Phase 1)	Straight sets with new movement patterns; +1 set on primary lifts	3-4 sets x 8-15	60-75 s	Progressive overload via added set and new angles
3	Medium-High (Phase 2)	Antagonist supersets begin; 3 s eccentrics	3 rounds x 10-15	45 s in round, 60 s after pair	Higher density, endurance and hypertrophy
4	Medium-High (Phase 2)	Supersets with 4 s eccentrics, unilateral emphasis	3 rounds x 8-15	45 s in round, 60 s after pair	More time under tension without adding load
5	High (Phase 3)	Supersets + mechanical drop sets, 2 s pauses	3 rounds / 3 drop sets x 8-15	30-45 s	Maximise hypertrophy stimulus
6	High (Phase 3)	Supersets + drop sets with 4-5 s negatives and different angles	3 rounds / 3 drop sets x 8-15	30-45 s	Increase difficulty with tempo and unilateral work
7	Advanced (Phase 4)	Tri-sets, tempo 4-1-1, controlled eccentrics	3 tri-set rounds x 8-15	20-30 s in tri-set, 60-75 s after round	Highest sustainable stimulus
8	Advanced, controlled (Phase 4)	Tri-sets with trimmed volume (2-3 rounds), finishing exercises	2-3 tri-set rounds x 8-12	20-30 s in tri-set, 60-75 s after round	Consolidate gains without overtraining

Duplicate-Workout Validation

All 8 weeks were compared against each other by script before this PDF was generated. The tables below show the percentage of exercises shared between consecutive weeks (0% = completely different selection, 100% = identical).

Overlap between consecutive weeks, by training day

Day	W1-W2	W2-W3	W3-W4	W4-W5	W5-W6	W6-W7	W7-W8
Mon	0%	5%	5%	14%	4%	20%	7%
Tue	0%	7%	6%	5%	5%	5%	5%
Wed	0%	0%	0%	5%	5%	28%	9%
Thu	0%	0%	0%	0%	5%	16%	10%
Fri	6%	40%	9%	14%	14%	13%	12%
Sat	0%	0%	0%	0%	11%	17%	5%
Whole week	1%	13%	23%	19%	20%	29%	22%

Highest overlap in any single training day between consecutive weeks: 40%. Highest whole-week overlap between any two weeks: 45%. No two weeks share an identical exercise list or identical day.

Overlap between consecutive weeks, by muscle group (primary exercises)

Muscle	W1-W2	W2-W3	W3-W4	W4-W5	W5-W6	W6-W7	W7-W8
Chest	0%	0%	29%	22%	17%	17%	17%
Back (lats / mid-back)	0%	0%	17%	33%	50%	25%	11%
Shoulders	0%	9%	18%	17%	15%	45%	29%
Biceps / brachialis	0%	20%	27%	55%	43%	54%	54%
Triceps	0%	0%	33%	12%	12%	14%	17%
Forearms	0%	30%	33%	56%	42%	50%	31%
Quadriceps	0%	0%	12%	0%	17%	18%	9%
Hamstrings	0%	33%	0%	0%	0%	20%	20%
Glutes	0%	12%	24%	10%	20%	21%	11%
Calves	0%	0%	17%	12%	0%	17%	0%
Upper abs	0%	0%	0%	33%	0%	33%	0%
Lower abs	0%	17%	14%	14%	17%	12%	10%
Obliques	0%	29%	12%	0%	0%	22%	25%
Deep core	12%	33%	10%	0%	9%	40%	42%
Lower back	0%	50%	25%	0%	0%	0%	50%
Hip abductors / adductors	0%	20%	50%	33%	14%	25%	11%
Trapezius / rhomboids	0%	33%	57%	43%	60%	50%	29%

Small muscle groups with few suitable exercises (trapezius/rhomboids, lower back, hip abductors) naturally share a few movements between some weeks. In those cases the stimulus changes through a different tempo, unilateral/bilateral setup or technique, as logged below.

Exercise recurrence log (why exercises return and what changes)

An exercise returns only to keep a fundamental movement pattern measurable or because the equipment-limited exercise pool is finite. Each return changes the stimulus (phase method, tempo, pause, unilateral setup, superset pairing or position in the session). No exercise repeats in the same slot in consecutive weeks for the same muscle group except where listed with a changed method.

Exercise	Appearances and stimulus
21s Curl (7 bottom half, 7 top half, 7 full)	W5 Fri: superset, 21 (Use 3 kg for the 21s.); W6 Fri: superset, 21 (Use 3 kg for the 21s.); W8 Fri: tri-set, 21 (Controlled; stop 2 reps before failure.)
Alternating Dumbbell Curl	W1 Wed: straight sets, 12; W5 Sat: drop set, 8 (Mechanical drop set: three curls back to)
Alternating Front Raise	W3 Sat: superset, 12; W5 Wed: drop set, 10 (Mechanical drop set: the three exercises); W6 Wed: drop set, 10 (Mechanical drop set: no rest between the); W7 Wed: tri-set, 12; W8 Wed: tri-set, 12 (Final shoulder finisher; stop at 2 RIR.)
Alternating Heel Touches	W1 Sat: straight sets, 20; W5 Wed: superset, 20; W8 Wed: tri-set, 20
Alternating Leg Lowers	W3 Sat: superset, 12; W8 Sat: tri-set, 12
Archer Push-Up	W6 Fri: superset, 6/side (2 s squeeze on the row.); W8 Fri: tri-set, 6/side (3 s lowering on the row; 2 s squeeze.)
Arnold Press	W2 Wed: straight sets, 10-12; W4 Wed: superset, 10-12 (Push-pull superset; 4 s lowering on the); W6 Wed: superset, 10-12 (2 s pause at the top of the press.); W7 Wed: tri-set, 10 (Tempo 3-1-1 on the press; strict form on)
Bear Hold (knees hovering)	W2 Thu: straight sets, 20 s; W6 Fri: superset, 25 s; W8 Thu: tri-set, 20 s; W8 Fri: tri-set, 25 s
Bench Dip (feet on floor)	W4 Wed: superset, 12 (Biceps-triceps antagonist superset.); W6 Sat: drop set, max reps (Mechanical drop set: three triceps exerc)
Bench Hip Thrust	W2 Thu: straight sets, 12; W4 Thu: superset, 12-15; W6 Thu: superset, 12 (4 s lowering on the RDL, 2 s squeeze at); W7 Thu: tri-set, 12 (Tempo 4-0-1 on the RDL.)
Bench Knee Tuck	W2 Tue: straight sets, 12; W8 Tue: tri-set, 12
Bench Knees-Up Crunch	W4 Mon: superset, 12; W5 Mon: superset, 12; W7 Mon: tri-set, 12
Bench Leg Raise (hands gripping bench edge)	W3 Tue: superset, 10; W5 Tue: superset, 10; W7 Tue: tri-set, 10
Bent-Over Dumbbell Row (two arms)	W1 Fri: straight sets, 10-12; W7 Mon: tri-set, 10-12 (Tempo 4-1-1 (4 s down, 1 s pause, 1 s up); W8 Fri: tri-set, 12
Bent-Over Rear-Delt Raise	W1 Wed: straight sets, 12-15; W4 Wed: superset, 12-15 (Push-pull superset; 4 s lowering on the); W6 Wed: superset, 12-15 (2 s pause at the top of the press.)
Bicycle Crunch	W1 Wed: straight sets, 20; W4 Sat: superset, 20; W7 Wed: tri-set, 20; W8 Sat: tri-set, 20
Bird-Dog	W1 Thu: straight sets, 8/side; W3 Thu: superset, 8/side; W5 Thu: superset, 8/side; W7 Thu: tri-set, 8/side
Bird-Dog Dumbbell Row	W3 Fri: superset, 10/side (Pull-push superset.); W6 Mon: superset, 10/side; W8 Mon: tri-set, 10/side (Controlled; stop 2 reps before failure.)
Bulgarian Split Squat	W2 Tue: straight sets, 8-10/leg (Hold a wall or the bench for balance if); W5 Tue: drop set, 8/leg (Mechanical drop set on the same leg, the); W7 Tue: tri-set, 8/leg (Tempo 4-0-1 on the split squat.)
Calf Raise, Toes Turned In	W3 Tue: straight sets, 15 (3 s lowering.); W5 Thu: superset, 15; W8 Tue: superset, 15
Calf Raise, Toes Turned Out (V-stance)	W2 Thu: straight sets, 15; W5 Tue: superset, 15; W7 Tue: tri-set, 15
Chest-Supported Row (incline bench)	W1 Mon: straight sets, 10-12 (Squeeze shoulder blades for 1 s at the t); W4 Mon: superset, 12-15 (Antagonist superset; 4 s lowering on the); W5 Fri: superset, 12; W6 Mon: superset, 12 (5 s lowering on the press, 2 s squeeze o); W7 Fri: tri-set, 12
Close-Grip Neutral Dumbbell Press	W2 Sat: straight sets, 12; W5 Sat: drop set, 8 (Mechanical drop set: three triceps exerc); W6 Sat: drop set, 8 (Mechanical drop set: three triceps exerc)
Cossack Squat	W2 Tue: straight sets, 8/side; W4 Tue: superset, 8/side; W6 Thu: superset, 8/side; W7 Tue: tri-set, 6/side
Cross-Body Hammer Curl	W3 Wed: superset, 12 (Biceps-triceps antagonist superset.); W6 Wed: superset, 12; W7 Wed: tri-set, 10; W8 Sat: tri-set, 10
Cross-Body Mountain Climber	W3 Wed: superset, 16; W5 Sat: superset, 16; W7 Sat: tri-set, 16
Cuban Rotation	W3 Wed: superset, 10 (Side-delt and rotator-cuff superset.); W6 Fri: superset, 10; W7 Wed: tri-set, 10; W8 Wed: tri-set, 10 (Final shoulder finisher; stop at 2 RIR.)
Curtsy Lunge	W4 Sat: superset, 10/leg; W6 Sat: superset, 12/leg; W8 Sat: superset, 10/leg
Dead Bug	W1 Mon: straight sets, 8/side; W4 Thu: superset, 10/side; W6 Thu: superset, 12/side; W7 Thu: tri-set, 12/side; W8 Mon: tri-set, 10/side (Slow crunch: 3 s up, 2 s hold, 3 s down.)

Exercise	Appearances and stimulus
Diamond Push-Up	W3 Sat: superset, 8-10; W4 Fri: superset, 8-10 (Pull-push superset; 4 s lowering on the); W5 Sat: drop set, max reps (Mechanical drop set: three triceps exerc); W7 Sat: tri-set, 8-10; W8 Mon: tri-set, 8-10 (Controlled; stop 2 reps before failure.)
Donkey Kick	W1 Thu: straight sets, 15/side; W3 Thu: superset, 12/side
Donkey-Style Calf Raise (hands on bench)	W3 Thu: straight sets, 12 (Pause 2 s at the bottom stretch.); W4 Sat: superset, 12; W6 Thu: superset, 12
Drag Curl	W2 Mon: straight sets, 12; W4 Fri: superset, 12; W5 Mon: drop set, 8 (Mechanical drop set: three curls back to); W6 Fri: superset, 10 (Use 3 kg for the 21s.); W7 Mon: tri-set, 10 (Tempo 3-1-1 on the curls.); W8 Mon: tri-set, 10 (Controlled; stop 2 reps before failure.)
Dumbbell Finger Roll-and-Curl	W3 Fri: superset, 12; W6 Mon: superset, 12; W8 Fri: tri-set, 12
Dumbbell Romanian Deadlift	W1 Thu: straight sets, 12 (Feel the stretch behind the thighs; flat); W4 Thu: superset, 10-12 (Hamstring-quad superset; 4 s lowering on); W6 Thu: superset, 12 (4 s lowering on the RDL, 2 s squeeze at); W7 Thu: tri-set, 10-12 (Tempo 4-0-1 on the RDL.)
Dumbbell Shrug with 3-Second Squeeze	W1 Fri: straight sets, 12; W3 Fri: superset, 12; W4 Mon: superset, 12; W7 Fri: tri-set, 12 (Tempo 3-1-1 on the rows; push-ups with 3)
Dumbbell Squeeze Fly	W3 Mon: superset, 12-15 (Antagonist superset.); W5 Mon: drop set, 10 (Mechanical drop set: move to the next ex); W7 Mon: tri-set, 12 (Tempo 4-1-1 (4 s down, 1 s pause, 1 s up)
Dumbbell Squeeze Press	W3 Mon: superset, 12-15 (Antagonist superset. 3 s lowering on bot); W5 Mon: drop set, 8 (Mechanical drop set: move to the next ex)
Dumbbell Triceps Kickback	W1 Sat: straight sets, 12; W5 Wed: superset, 12
Dumbbell-Weighted Crunch	W3 Mon: superset, 15; W5 Mon: superset, 15; W7 Mon: tri-set, 15
Farmer Hold Walk	W1 Mon: straight sets, 40 s; W4 Mon: superset, 40 s; W5 Fri: superset, 45 s; W7 Mon: superset, 45 s
Feet-Elevated Bench Dip (feet on step board)	W5 Wed: superset, 10 (Biceps-triceps antagonist superset.); W8 Sat: tri-set, 10
Feet-Elevated Hamstring Bridge (heels on step board)	W2 Thu: straight sets, 12; W3 Tue: superset, 12 (Quad-hamstring superset, 3 s lowering.); W5 Tue: superset, 12 (3 s lowering on the squat with a 2 s pau); W7 Thu: tri-set, 12 (Tempo 4-0-1 on the RDL.)
Feet-Elevated Push-Up (feet on step board)	W5 Fri: superset, 8-10 (2 s squeeze on the row; controlled push-); W7 Fri: tri-set, 8-10 (Tempo 3-1-1 on the rows; push-ups with 3)
Fire Hydrant	W2 Tue: straight sets, 15/side; W3 Tue: superset, 12/side; W4 Thu: superset, 12/side; W5 Tue: superset, 15/side; W6 Thu: superset, 15/side; W8 Thu: tri-set, 12/side (Controlled; stop 2 reps before failure.)
Flat Dumbbell Bench Press	W1 Mon: straight sets, 10-12 (Lower in 3 s, press in 1 s.); W6 Mon: drop set, 8 (Mechanical drop set: fly then press then); W7 Mon: tri-set, 10-12 (Tempo 4-1-1 (4 s down, 1 s pause, 1 s up)
Flat Dumbbell Fly	W2 Mon: straight sets, 12-15; W6 Mon: drop set, 10 (Mechanical drop set: fly then press then); W8 Mon: tri-set, 12 (5 s lowering on the press; 2 s squeeze o)
Flutter Kicks	W2 Tue: straight sets, 30 s; W4 Tue: superset, 30 s; W7 Tue: tri-set, 30 s
Forearm Plank	W1 Fri: straight sets, 30 s; W5 Thu: superset, 40 s; W7 Thu: tri-set, 40 s; W8 Thu: tri-set, 40 s
Forearm Pronation-Supination	W4 Fri: superset, 12; W8 Mon: superset, 12
Frog Pump	W3 Tue: superset, 15; W4 Tue: superset, 15; W4 Thu: superset, 15; W5 Sat: superset, 15; W6 Thu: drop set, 15 (Mechanical drop set: single-leg bridge,); W7 Tue: tri-set, 15 (Tempo 4-0-1 on the split squat.); W8 Thu: tri-set, 15 (Controlled; stop 2 reps before failure.)
Glute-Bridge Dumbbell Press	W4 Mon: superset, 12-15 (Antagonist superset; 4 s lowering on the); W8 Mon: tri-set, 12 (Controlled; stop 2 reps before failure.)
Goblet Squat	W1 Tue: straight sets, 12 (Lower in 3 s; keep chest tall.); W5 Tue: superset, 12-15 (3 s lowering on the squat with a 2 s pau); W6 Tue: drop set, 10 (Mechanical drop set: heel-elevated squat)
Half-Kneeling Single-Arm Press	W3 Wed: superset, 10/side (Push-pull superset.); W8 Wed: tri-set, 8/side (Tempo 3-1-1 on the press; slow raises.)
Hammer Curl	W1 Sat: straight sets, 12; W5 Wed: superset, 12; W5 Sat: drop set, 8 (Mechanical drop set: three curls back to); W6 Sat: drop set, 8 (Mechanical drop set: three curls back to); W7 Sat: tri-set, 10
Hammer-Grip Wrist Raise	W2 Fri: straight sets, 12/hand; W3 Fri: superset, 12/hand; W5 Fri: superset, 12/hand; W6 Fri: superset, 12/hand (Slow 3 s lowering.); W8 Fri: tri-set, 12/hand
Hamstring Bridge Walk-Out	W4 Tue: superset, 6 (Quad-hamstring superset.); W6 Tue: superset, 8 (3 s lowering on the single-leg squat.); W8 Tue: tri-set, 8 (4 s lowering on the squat.)
Heel-Elevated Goblet Squat (heels on step board)	W2 Tue: straight sets, 12; W6 Tue: drop set, 12 (Mechanical drop set: heel-elevated squat); W8 Tue: tri-set, 12 (4 s lowering on the squat.)

Exercise	Appearances and stimulus
High Plank Shoulder Tap	W2 Fri: straight sets, 10/side; W3 Fri: superset, 10/side; W5 Fri: superset, 12/side; W8 Fri: tri-set, 12/side
Hollow Body Hold (bent-knee version first)	W2 Mon: straight sets, 20 s; W3 Mon: superset, 20 s; W5 Fri: superset, 25 s; W6 Mon: superset, 25 s; W7 Fri: tri-set, 25 s; W8 Mon: tri-set, 25 s (Slow crunch: 3 s up, 2 s hold, 3 s down.)
Incline Dumbbell Curl	W2 Wed: straight sets, 12; W4 Wed: superset, 10-12 (4 s lowering on the curl.); W5 Sat: drop set, 8 (Mechanical drop set: three curls back to); W7 Wed: tri-set, 10; W8 Sat: tri-set, 10
Incline Dumbbell Fly	W1 Mon: straight sets, 12 (Slow 3 s lowering; stop at a comfortable); W3 Mon: superset, 12 (Antagonist superset.); W4 Mon: superset, 12 (4 s lowering on the fly.); W7 Mon: tri-set, 12 (Controlled 3 s lowering on every exercis)
Incline Dumbbell Press	W2 Mon: straight sets, 10-12 (Added a set versus Week 1; lower in 3 s.); W5 Mon: superset, 10-12 (2 s pause at the bottom of the press and); W8 Mon: tri-set, 10 (5 s lowering on the press; 2 s squeeze o)
Incline Hammer Curl	W2 Fri: straight sets, 12; W3 Fri: superset, 10; W6 Mon: drop set, 8 (Mechanical drop set: finish with the iso); W7 Fri: tri-set, 10
Incline Push-Up (hands on bench)	W1 Fri: straight sets, 12-15; W4 Sat: superset, 12-15; W5 Mon: drop set, max reps (Mechanical drop set: move to the next ex); W6 Sat: superset, 15; W7 Mon: tri-set, max reps (Controlled 3 s lowering on every exercis); W8 Sat: tri-set, 12-15
Incline-Bench Overhead Triceps Extension	W3 Wed: superset, 12 (Biceps-triceps antagonist superset.); W4 Sat: superset, 12 (Biceps-triceps antagonist superset.); W7 Wed: tri-set, 10
Incline-Bench Prone Rear-Delt Raise	W2 Wed: straight sets, 12-15; W5 Wed: superset, 12-15 (2 s pause at the bottom of the press.); W7 Wed: tri-set, 12 (Tempo 3-1-1 on the press; strict form on)
Incline-Bench Prone Y-T-W Raise	W1 Mon: straight sets, 10 (Move slowly; resting between each shape.); W3 Mon: superset, 10 (Antagonist superset.); W4 Fri: superset, 10; W6 Mon: superset, 10; W7 Mon: superset, 10
Isometric Curl Hold (90 degrees)	W3 Fri: superset, 20 s; W4 Mon: superset, 25 s (3 s lowering on the curl.); W5 Fri: superset, 25 s (Use 3 kg for the 21s.); W6 Mon: drop set, 25 s (Mechanical drop set: finish with the iso); W7 Mon: tri-set, 25 s (Tempo 3-1-1 on the curls.); W8 Mon: tri-set, 25 s (Controlled; stop 2 reps before failure.)
Lateral Lunge	W6 Tue: superset, 10/side; W8 Tue: tri-set, 8/side
Lateral Step-Up	W3 Sat: superset, 10/leg; W4 Tue: superset, 10/leg; W6 Sat: superset, 8/leg; W8 Tue: tri-set, 10/leg
Leaning Single-Arm Lateral Raise	W2 Wed: straight sets, 12-15/side; W4 Wed: superset, 12/side; W5 Wed: drop set, 10/side (Mechanical drop set: the three exercises); W7 Wed: tri-set, 10/side (Tempo 3-1-1 on the press; strict form on)
Lying Dumbbell Triceps Extension	W3 Sat: superset, 12 (Biceps-triceps antagonist superset.); W5 Sat: drop set, 8 (Mechanical drop set: three triceps exerc); W7 Sat: tri-set, 10
Lying Leg Raise	W1 Tue: straight sets, 10; W4 Tue: superset, 12; W6 Tue: superset, 12; W8 Tue: tri-set, 12
Pike Push-Up	W2 Sat: straight sets, 8-10 (Use an incline pike with hands on the be); W5 Sat: superset, 8-10; W8 Sat: tri-set, 8
Plank Dumbbell Drag (anti-rotation)	W4 Fri: superset, 6/side; W6 Fri: superset, 8/side; W7 Fri: tri-set, 8/side; W8 Fri: tri-set, 6/side
Pogo Hops	W4 Thu: superset, 20; W6 Tue: superset, 20; W8 Tue: tri-set, 20
Prone Cobra Hold	W2 Fri: straight sets, 20 s; W3 Fri: superset, 15 s; W4 Thu: superset, 20 s; W8 Mon: superset, 20 s
Prone Snow Angel	W2 Thu: straight sets, 10; W3 Mon: superset, 10 (Antagonist superset.); W5 Mon: superset, 12; W7 Mon: superset, 12; W8 Fri: tri-set, 10 (3 s lowering on the row; 2 s squeeze.)
Reaching Crunch (long arms)	W2 Mon: straight sets, 15; W4 Mon: superset, 15; W6 Mon: superset, 15; W7 Mon: tri-set, 15
Reverse Crunch	W1 Tue: straight sets, 12; W5 Tue: superset, 12; W7 Tue: tri-set, 12
Reverse Curl	W2 Fri: straight sets, 12; W3 Mon: superset, 12 (Biceps-brachialis superset.); W4 Fri: superset, 12; W5 Fri: superset, 12; W7 Fri: tri-set, 12; W7 Fri: tri-set, 12; W8 Fri: tri-set, 12 (Controlled; stop 2 reps before failure.)
Reverse Lunge	W1 Tue: straight sets, 10/leg; W3 Sat: superset, 10/leg; W5 Tue: drop set, 8/leg (Mechanical drop set on the same leg, the)
Russian Twist	W2 Wed: straight sets, 20; W3 Sat: superset, 20; W4 Wed: superset, 20; W6 Wed: superset, 24; W7 Wed: tri-set, 24; W8 Sat: tri-set, 20
Scaption Raise (thumbs-up Y raise)	W4 Sat: superset, 12; W6 Wed: drop set, 10 (Mechanical drop set: no rest between the); W7 Sat: tri-set, 10; W8 Sat: tri-set, 10
Scissor Kicks	W3 Tue: superset, 30 s; W4 Sat: superset, 30 s; W6 Tue: superset, 30 s; W8 Tue: tri-set, 30 s

Exercise	Appearances and stimulus
Seated Alternating Curl with Supination	W1 Fri: straight sets, 12; W4 Mon: superset, 12 (3 s lowering on the curl.); W5 Mon: drop set, 8 (Mechanical drop set: three curls back to); W7 Fri: tri-set, 10; W8 Mon: tri-set, 10 (Controlled; stop 2 reps before failure.)
Seated Calf Raise (dumbbells on knees)	W1 Thu: straight sets, 15; W4 Thu: superset, 15; W6 Thu: superset, 15; W8 Thu: tri-set, 15 (4 s lowering on the deadlift.)
Seated Concentration Curl	W2 Sat: straight sets, 12/arm; W4 Wed: superset, 12/arm (Biceps-triceps antagonist superset.); W6 Wed: superset, 10/arm; W8 Wed: tri-set, 10/arm
Seated Dumbbell Shoulder Press	W1 Wed: straight sets, 10-12; W5 Wed: superset, 10-12 (2 s pause at the bottom of the press.)
Seated Lateral Raise	W3 Wed: superset, 15 (Side-delt and rotator-cuff superset.); W6 Wed: drop set, 10 (Mechanical drop set: no rest between the); W8 Wed: tri-set, 12 (Tempo 3-1-1 on the press; slow raises.)
Seated Wrist Curl (palms up)	W1 Fri: straight sets, 15; W3 Mon: superset, 15 (Forearm flexor-extensor superset.); W4 Fri: superset, 15 (Slow 3 s lowering.); W5 Mon: superset, 15; W5 Fri: superset, 12; W6 Fri: superset, 15; W7 Fri: tri-set, 15
Seated Wrist Extension (palms down)	W1 Fri: straight sets, 15; W3 Mon: superset, 15 (Forearm flexor-extensor superset.); W4 Fri: superset, 15 (Slow 3 s lowering.); W5 Mon: superset, 15; W6 Fri: superset, 15 (Slow 3 s lowering.); W7 Mon: superset, 15; W7 Fri: tri-set, 15; W8 Fri: tri-set, 15
Side Plank	W1 Wed: straight sets, 25 s/side; W3 Wed: superset, 30 s/side; W5 Wed: superset, 35 s/side
Side Plank Hip Dip	W2 Wed: straight sets, 12/side; W4 Wed: superset, 12/side; W6 Wed: superset, 12/side; W8 Wed: tri-set, 12/side
Side-Lying External Rotation	W2 Fri: straight sets, 12/side; W3 Fri: superset, 12/side (Shoulder-stability superset.); W4 Wed: superset, 12/side; W7 Fri: tri-set, 12/side
Side-Lying Hip Abduction	W1 Tue: straight sets, 15/side; W3 Thu: superset, 12/side; W4 Tue: superset, 12/side; W6 Tue: superset, 15/side; W7 Thu: superset, 15/side
Side-Lying Hip Adduction	W1 Tue: straight sets, 15/side; W3 Tue: superset, 12/side; W4 Thu: superset, 12/side; W5 Tue: superset, 15/side; W7 Thu: superset, 15/side; W8 Thu: superset, 12/side
Side-Lying Oblique Crunch	W2 Sat: straight sets, 12/side; W7 Sat: tri-set, 12/side
Side-Lying Rear-Delt Raise	W3 Wed: superset, 12/side (Push-pull superset.); W8 Wed: tri-set, 12/side (Tempo 3-1-1 on the press; slow raises.)
Single-Arm Dumbbell Row (hand and knee on bench)	W2 Mon: straight sets, 10-12/side; W4 Fri: superset, 10/side (Pull-push superset; 4 s lowering on the); W7 Mon: tri-set, 10/side (Controlled 3 s lowering on every exercis)
Single-Arm Flat Dumbbell Press	W3 Fri: superset, 10/side (Pull-push superset.); W7 Fri: tri-set, 10/side
Single-Arm Incline-Bench Preacher Curl	W1 Mon: straight sets, 12/arm (Slow 3 s lowering.); W3 Mon: superset, 10/arm (Biceps-brachialis superset.); W5 Mon: drop set, 8/arm (Mechanical drop set: three curls back to); W6 Mon: drop set, 8/arm (Mechanical drop set: finish with the iso); W7 Mon: tri-set, 10/arm (Tempo 3-1-1 on the curls.); W8 Fri: tri-set, 10/arm (Controlled; stop 2 reps before failure.)
Single-Arm Overhead Extension (seated)	W2 Wed: straight sets, 10-12/side; W6 Wed: superset, 10/side; W7 Wed: tri-set, 10/side
Single-Leg Bench Squat (sit-to-stand)	W4 Thu: superset, 8/leg (Hamstring-quad superset; 4 s lowering on); W6 Tue: superset, 8/leg (3 s lowering on the single-leg squat.)
Single-Leg Calf Raise (step board edge)	W2 Tue: straight sets, 12/leg; W4 Tue: superset, 12/leg (Calf-shin superset.); W6 Tue: superset, 12/leg; W7 Thu: tri-set, 12/leg
Single-Leg Glute Bridge	W3 Thu: superset, 10/leg; W5 Thu: superset, 12/leg; W6 Thu: drop set, 10/leg (Mechanical drop set: single-leg bridge,); W8 Thu: tri-set, 10/leg (4 s lowering on the deadlift.)
Single-Leg Romanian Deadlift (hand supported)	W2 Thu: straight sets, 10/leg; W5 Thu: drop set, 8/leg (Mechanical drop set: finish one leg, the); W7 Thu: tri-set, 8/leg
Slow Crunch	W1 Mon: straight sets, 15; W8 Mon: tri-set, 12 (Slow crunch: 3 s up, 2 s hold, 3 s down.)
Spider Curl (chest on incline bench)	W3 Wed: superset, 12 (Biceps-triceps antagonist superset.); W4 Sat: superset, 12 (Biceps-triceps antagonist superset.); W5 Wed: superset, 10 (Biceps-triceps antagonist superset.); W6 Sat: drop set, 8 (Mechanical drop set: three curls back to); W7 Sat: tri-set, 10
Staggered-Stance (B-Stance) Romanian Deadlift	W3 Thu: superset, 10/leg (Hamstring-quad superset.); W5 Thu: drop set, 8/leg (Mechanical drop set: finish one leg, the); W7 Tue: tri-set, 8/leg (Tempo 4-0-1 on the split squat.); W8 Thu: tri-set, 8/leg (Controlled; stop 2 reps before failure.)
Staggered-Stance Lawnmower Row	W3 Mon: superset, 10/side (Antagonist superset. 3 s lowering on bot); W5 Fri: superset, 10/side (2 s squeeze on the row; controlled push-); W8 Mon: tri-set, 10/side (5 s lowering on the press; 2 s squeeze o)
Standard Push-Up	W2 Fri: straight sets, 8-12 (Use incline push-ups if you cannot reach); W6 Mon: drop set, max reps (Mechanical drop set: fly then press then); W8 Fri: tri-set, 10
Standing Calf Raise (step board edge)	W1 Tue: straight sets, 15 (1 s pause at the top.); W5 Thu: superset, 15; W8 Thu: superset, 15

Exercise	Appearances and stimulus
Standing Glute Kickback (hand on bench)	W3 Thu: superset, 12/side; W5 Thu: superset, 12/side; W7 Thu: tri-set, 12/side
Standing Lateral Raise	W1 Wed: straight sets, 12-15 (Lead with the elbows; 3 s lowering.); W5 Wed: drop set, 10 (Mechanical drop set: the three exercises); W8 Wed: tri-set, 15 (Final shoulder finisher; stop at 2 RIR.)
Static Split Squat (2-second pause)	W2 Sat: straight sets, 10/leg; W5 Tue: drop set, 8/leg (Mechanical drop set on the same leg, the); W8 Tue: tri-set, 8/leg (4 s lowering on the squat.); W8 Sat: superset, 8/leg
Step-Up (step board)	W1 Sat: straight sets, 10/leg; W3 Tue: superset, 10/leg; W5 Sat: superset, 12/leg; W7 Sat: superset, 12/leg
Stomach Vacuum (transverse abdominis hold)	W1 Fri: straight sets, 20 s; W2 Fri: straight sets, 25 s; W3 Fri: superset, 25 s; W4 Fri: superset, 30 s; W6 Thu: superset, 30 s; W7 Fri: tri-set, 30 s; W8 Thu: tri-set, 30 s
Suitcase Hold (single dumbbell)	W2 Mon: straight sets, 30 s/side; W4 Fri: superset, 30 s/side; W6 Mon: superset, 35 s/side; W8 Mon: superset, 40 s/side
Sumo Dumbbell Deadlift	W5 Thu: superset, 12-15 (3 s lowering on the deadlift.); W8 Thu: tri-set, 12 (4 s lowering on the deadlift.)
Sumo Goblet Squat	W3 Tue: superset, 15 (Quad-hamstring superset, 3 s lowering.); W7 Sat: superset, 12
Superman Hold	W1 Thu: straight sets, 10; W3 Thu: superset, 10
Tate Press	W3 Wed: superset, 12 (Biceps-triceps antagonist superset.); W6 Wed: superset, 12; W6 Sat: drop set, 8 (Mechanical drop set: three triceps exerc); W8 Wed: tri-set, 10
Tibialis Raise (heels on floor, toes up)	W4 Tue: superset, 15 (Calf-shin superset.); W5 Tue: superset, 15; W7 Tue: superset, 15
Two-Hand Overhead Dumbbell Extension	W1 Wed: straight sets, 12; W4 Wed: superset, 12 (4 s lowering on the curl.)
Underhand Bent-Over Row	W2 Fri: straight sets, 10-12; W5 Mon: superset, 10-12 (2 s pause at the bottom of the press and); W6 Fri: superset, 10-12 (2 s squeeze on the row.); W8 Fri: tri-set, 10-12 (3 s lowering on the row; 2 s squeeze.)
Walking Lunge	W4 Tue: superset, 10/leg (Quad-hamstring superset.); W7 Tue: tri-set, 8/leg
Wall Angel	W3 Fri: superset, 10 (Shoulder-stability superset.); W4 Fri: superset, 10; W5 Fri: superset, 10; W6 Sat: superset, 12; W7 Sat: tri-set, 10; W8 Fri: tri-set, 10
Wall Sit	W3 Thu: superset, 30 s (Hamstring-quad superset.); W5 Thu: superset, 40 s (3 s lowering on the deadlift.); W6 Tue: drop set, max s (Mechanical drop set: heel-elevated squat); W7 Tue: superset, 45 s; W8 Tue: superset, 50 s
Weighted Glute Bridge	W1 Thu: straight sets, 15 (2 s squeeze at the top.); W6 Thu: drop set, 12 (Mechanical drop set: single-leg bridge,)
Wide-Elbow Bent-Over Row (rear-back emphasis)	W2 Mon: straight sets, 12; W4 Mon: superset, 12 (4 s lowering on the fly.); W5 Mon: superset, 12; W6 Fri: superset, 12; W8 Mon: superset, 12
Zottman Curl	W3 Sat: superset, 10 (Biceps-triceps antagonist superset.); W6 Fri: superset, 10; W6 Sat: drop set, 8 (Mechanical drop set: three curls back to); W8 Wed: tri-set, 10

Part 4: Weekly Exercise Variation Matrix

For each muscle group: primary exercises (the main target) and secondary exercises (supporting involvement) in each week.

Chest

Week	Chest: primary exercises	Secondary exercises
W1	Flat Dumbbell Bench Press; Incline Dumbbell Fly; Scapular Push-Up (push-up plus); Incline Push-Up (hands on bench); Dumbbell Pullover (across flat bench)	-
W2	Incline Dumbbell Press; Flat Dumbbell Fly; Standard Push-Up; Close-Grip Neutral Dumbbell Press	Pike Push-Up
W3	Dumbbell Squeeze Press; Dumbbell Squeeze Fly; Incline Dumbbell Fly; Single-Arm Flat Dumbbell Press; Diamond Push-Up	-
W4	Glute-Bridge Dumbbell Press; Incline Dumbbell Fly; Diamond Push-Up; Incline Push-Up (hands on bench)	Bench Dip (feet on floor)
W5	Incline Dumbbell Press; Dumbbell Squeeze Fly; Dumbbell Squeeze Press; Incline Push-Up (hands on bench); Feet-Elevated Push-Up (feet on step board); Close-Grip Neutral Dumbbell Press; Diamond Push-Up	Feet-Elevated Bench Dip (feet on step board); Pike Push-Up
W6	Incline Dumbbell Squeeze Press; Flat Dumbbell Fly; Flat Dumbbell Bench Press; Standard Push-Up; Archer Push-Up; Close-Grip Neutral Dumbbell Press; Incline Push-Up (hands on bench)	Bench Dip (feet on floor)
W7	Flat Dumbbell Bench Press; Dumbbell Squeeze Fly; Incline Dumbbell Fly; Incline Push-Up (hands on bench); Feet-Elevated Push-Up (feet on step board); Single-Arm Flat Dumbbell Press; Diamond Push-Up	Renegade Row
W8	Incline Dumbbell Press; Flat Dumbbell Fly; Glute-Bridge Dumbbell Press; Diamond Push-Up; Archer Push-Up; Standard Push-Up; Incline Push-Up (hands on bench)	Feet-Elevated Bench Dip (feet on step board); Pike Push-Up

Back (lats / mid-back)

Week	Back (lats / mid-back): primary exercises	Secondary exercises
W1	Chest-Supported Row (incline bench); Incline-Bench Prone Y-T-W Raise; Bent-Over Dumbbell Row (two arms); Dumbbell Pullover (across flat bench)	Bent-Over Rear-Delt Raise
W2	Single-Arm Dumbbell Row (hand and knee on bench); Wide-Elbow Bent-Over Row (rear-back emphasis); Underhand Bent-Over Row	Incline-Bench Prone Rear-Delt Raise
W3	Staggered-Stance Lawnmower Row; Incline-Bench Prone Y-T-W Raise; Bird-Dog Dumbbell Row	Wall Angel
W4	Chest-Supported Row (incline bench); Wide-Elbow Bent-Over Row (rear-back emphasis); Single-Arm Dumbbell Row (hand and knee on bench); Incline-Bench Prone Y-T-W Raise	Bent-Over Rear-Delt Raise; Wall Angel; Plank Dumbbell Drag (anti-rotation)
W5	Underhand Bent-Over Row; Wide-Elbow Bent-Over Row (rear-back emphasis); Staggered-Stance Lawnmower Row; Chest-Supported Row (incline bench)	Incline-Bench Prone Rear-Delt Raise; Wall Angel
W6	Chest-Supported Row (incline bench); Bird-Dog Dumbbell Row; Incline-Bench Prone Y-T-W Raise; Underhand Bent-Over Row; Wide-Elbow Bent-Over Row (rear-back emphasis)	Bent-Over Rear-Delt Raise; Plank Dumbbell Drag (anti-rotation); Wall Angel
W7	Bent-Over Dumbbell Row (two arms); Single-Arm Dumbbell Row (hand and knee on bench); Incline-Bench Prone Y-T-W Raise; Renegade Row; Chest-Supported Row (incline bench)	Incline-Bench Prone Rear-Delt Raise; Plank Dumbbell Drag (anti-rotation); Wall Angel
W8	Staggered-Stance Lawnmower Row; Bird-Dog Dumbbell Row; Wide-Elbow Bent-Over Row (rear-back emphasis); Underhand Bent-Over Row; Bent-Over Dumbbell Row (two arms)	Wall Angel; Plank Dumbbell Drag (anti-rotation)

Shoulders

Week	Shoulders: primary exercises	Secondary exercises
W1	Scapular Push-Up (push-up plus); Seated Dumbbell Shoulder Press; Standing Lateral Raise; Bent-Over Rear-Delt Raise	Flat Dumbbell Bench Press; Chest-Supported Row (incline bench); Incline Dumbbell Fly; Incline-Bench Prone Y-T-W Raise; Side Plank; Incline Push-Up (hands on bench); Forearm Plank
W2	Arnold Press; Leaning Single-Arm Lateral Raise; Incline-Bench Prone Rear-Delt Raise; Side-Lying External Rotation; Pike Push-Up	Incline Dumbbell Press; Flat Dumbbell Fly; Wide-Elbow Bent-Over Row (rear-back emphasis); Side Plank Hip Dip; Bear Hold (knees hovering); Prone Snow Angel; Standard Push-Up; High Plank Shoulder Tap; Close-Grip Neutral Dumbbell Press
W3	Half-Kneeling Single-Arm Press; Side-Lying Rear-Delt Raise; Seated Lateral Raise; Cuban Rotation; Wall Angel; Side-Lying External Rotation; Alternating Front Raise	Dumbbell Squeeze Press; Incline-Bench Prone Y-T-W Raise; Incline Dumbbell Fly; Prone Snow Angel; Side Plank; Cross-Body Mountain Climber; Single-Arm Flat Dumbbell Press; High Plank Shoulder Tap
W4	Arnold Press; Bent-Over Rear-Delt Raise; Leaning Single-Arm Lateral Raise; Side-Lying External Rotation; Wall Angel; Scaption Raise (thumbs-up Y raise)	Chest-Supported Row (incline bench); Incline Dumbbell Fly; Wide-Elbow Bent-Over Row (rear-back emphasis); Bench Dip (feet on floor); Side Plank Hip Dip; Incline-Bench Prone Y-T-W Raise; Plank Dumbbell Drag (anti-rotation); Incline Push-Up (hands on bench)
W5	Seated Dumbbell Shoulder Press; Incline-Bench Prone Rear-Delt Raise; Leaning Single-Arm Lateral Raise; Standing Lateral Raise; Alternating Front Raise; Feet-Elevated Push-Up (feet on step board); Wall Angel; Pike Push-Up	Incline Dumbbell Press; Dumbbell Squeeze Press; Incline Push-Up (hands on bench); Wide-Elbow Bent-Over Row (rear-back emphasis); Prone Snow Angel; Feet-Elevated Bench Dip (feet on step board); Side Plank; Forearm Plank; Chest-Supported Row (incline bench); High Plank Shoulder Tap; Close-Grip Neutral Dumbbell Press; Cross-Body Mountain Climber
W6	Arnold Press; Bent-Over Rear-Delt Raise; Seated Lateral Raise; Scaption Raise (thumbs-up Y raise); Alternating Front Raise; Cuban Rotation; Wall Angel	Incline Dumbbell Squeeze Press; Chest-Supported Row (incline bench); Flat Dumbbell Fly; Flat Dumbbell Bench Press; Standard Push-Up; Incline-Bench Prone Y-T-W Raise; Side Plank Hip Dip; Archer Push-Up; Wide-Elbow Bent-Over Row (rear-back emphasis); Plank Dumbbell Drag (anti-rotation); Bear Hold (knees hovering); Close-Grip Neutral Dumbbell Press; Bench Dip (feet on floor); Incline Push-Up (hands on bench)
W7	Arnold Press; Leaning Single-Arm Lateral Raise; Incline-Bench Prone Rear-Delt Raise; Cuban Rotation; Alternating Front Raise; Feet-Elevated Push-Up (feet on step board); Side-Lying External Rotation; Scaption Raise (thumbs-up Y raise); Wall Angel	Flat Dumbbell Bench Press; Incline Dumbbell Fly; Incline Push-Up (hands on bench); Incline-Bench Prone Y-T-W Raise; Prone Snow Angel; Forearm Plank; Renegade Row; Chest-Supported Row (incline bench); Single-Arm Flat Dumbbell Press; Plank Dumbbell Drag (anti-rotation); Cross-Body Mountain Climber
W8	Half-Kneeling Single-Arm Press; Seated Lateral Raise; Side-Lying Rear-Delt Raise; Standing Lateral Raise; Alternating Front Raise; Cuban Rotation; Wall Angel; Pike Push-Up; Scaption Raise (thumbs-up Y raise)	Incline Dumbbell Press; Flat Dumbbell Fly; Wide-Elbow Bent-Over Row (rear-back emphasis); Side Plank Hip Dip; Bear Hold (knees hovering); Forearm Plank; Archer Push-Up; Prone Snow Angel; Standard Push-Up; High Plank Shoulder Tap; Plank Dumbbell Drag (anti-rotation); Feet-Elevated Bench Dip (feet on step board); Incline Push-Up (hands on bench)

Biceps / brachialis

Week	Biceps / brachialis: primary exercises	Secondary exercises
W1	Single-Arm Incline-Bench Preacher Curl; Alternating Dumbbell Curl; Seated Alternating Curl with Supination; Hammer Curl	Chest-Supported Row (incline bench); Bent-Over Dumbbell Row (two arms)
W2	Drag Curl; Incline Dumbbell Curl; Reverse Curl; Incline Hammer Curl; Seated Concentration Curl	Single-Arm Dumbbell Row (hand and knee on bench); Underhand Bent-Over Row
W3	Single-Arm Incline-Bench Preacher Curl; Reverse Curl; Spider Curl (chest on incline bench); Cross-Body Hammer Curl; Incline Hammer Curl; Isometric Curl Hold (90 degrees); Zottman Curl	Staggered-Stance Lawnmower Row
W4	Seated Alternating Curl with Supination; Isometric Curl Hold (90 degrees); Seated Concentration Curl; Incline Dumbbell Curl; Drag Curl; Reverse Curl; Spider Curl (chest on incline bench)	Chest-Supported Row (incline bench); Single-Arm Dumbbell Row (hand and knee on bench)
W5	Single-Arm Incline-Bench Preacher Curl; Seated Alternating Curl with Supination; Drag Curl; Hammer Curl; Spider Curl (chest on incline bench); Reverse Curl; 21s Curl (7 bottom half, 7 top half, 7 full); Isometric Curl Hold (90 degrees); Incline Dumbbell Curl; Alternating Dumbbell Curl	Underhand Bent-Over Row; Staggered-Stance Lawnmower Row; Chest-Supported Row (incline bench)
W6	Incline Hammer Curl; Single-Arm Incline-Bench Preacher Curl; Isometric Curl Hold (90 degrees); Cross-Body Hammer Curl; Seated Concentration Curl; Zottman Curl; Drag Curl; 21s Curl (7 bottom half, 7 top half, 7 full); Spider Curl (chest on incline bench); Hammer Curl	Chest-Supported Row (incline bench); Underhand Bent-Over Row
W7	Single-Arm Incline-Bench Preacher Curl; Drag Curl; Isometric Curl Hold (90 degrees); Incline Dumbbell Curl; Cross-Body Hammer Curl; Reverse Curl; Seated Alternating Curl with Supination; Incline Hammer Curl; Spider Curl (chest on incline bench); Hammer Curl	Bent-Over Dumbbell Row (two arms); Single-Arm Dumbbell Row (hand and knee on bench); Renegade Row; Chest-Supported Row (incline bench)
W8	Drag Curl; Seated Alternating Curl with Supination; Isometric Curl Hold (90 degrees); Seated Concentration Curl; Zottman Curl; Single-Arm Incline-Bench Preacher Curl; 21s Curl (7 bottom half, 7 top half, 7 full); Reverse Curl; Incline Dumbbell Curl; Cross-Body Hammer Curl	Staggered-Stance Lawnmower Row; Underhand Bent-Over Row; Bent-Over Dumbbell Row (two arms)

Triceps

Week	Triceps: primary exercises	Secondary exercises
W1	Two-Hand Overhead Dumbbell Extension; Dumbbell Triceps Kickback	Flat Dumbbell Bench Press; Seated Dumbbell Shoulder Press; Incline Push-Up (hands on bench); Dumbbell Pullover (across flat bench)
W2	Single-Arm Overhead Extension (seated); Close-Grip Neutral Dumbbell Press	Incline Dumbbell Press; Arnold Press; Standard Push-Up; Pike Push-Up
W3	Tate Press; Incline-Bench Overhead Triceps Extension; Lying Dumbbell Triceps Extension; Diamond Push-Up	Dumbbell Squeeze Press; Dumbbell Squeeze Fly; Half-Kneeling Single-Arm Press; Single-Arm Flat Dumbbell Press
W4	Bench Dip (feet on floor); Two-Hand Overhead Dumbbell Extension; Diamond Push-Up; Incline-Bench Overhead Triceps Extension	Glute-Bridge Dumbbell Press; Arnold Press; Incline Push-Up (hands on bench)
W5	Dumbbell Triceps Kickback; Feet-Elevated Bench Dip (feet on step board); Lying Dumbbell Triceps Extension; Close-Grip Neutral Dumbbell Press; Diamond Push-Up	Incline Dumbbell Press; Dumbbell Squeeze Fly; Dumbbell Squeeze Press; Incline Push-Up (hands on bench); Seated Dumbbell Shoulder Press; Feet-Elevated Push-Up (feet on step board); Pike Push-Up
W6	Tate Press; Single-Arm Overhead Extension (seated); Close-Grip Neutral Dumbbell Press; Bench Dip (feet on floor)	Incline Dumbbell Squeeze Press; Flat Dumbbell Bench Press; Standard Push-Up; Arnold Press; Archer Push-Up; Incline Push-Up (hands on bench)
W7	Incline-Bench Overhead Triceps Extension; Single-Arm Overhead Extension (seated); Lying Dumbbell Triceps Extension; Diamond Push-Up	Flat Dumbbell Bench Press; Dumbbell Squeeze Fly; Incline Push-Up (hands on bench); Arnold Press; Feet-Elevated Push-Up (feet on step board); Single-Arm Flat Dumbbell Press
W8	Diamond Push-Up; Tate Press; Feet-Elevated Bench Dip (feet on step board)	Incline Dumbbell Press; Glute-Bridge Dumbbell Press; Half-Kneeling Single-Arm Press; Archer Push-Up; Standard Push-Up; Pike Push-Up; Incline Push-Up (hands on bench)

Forearms

Week	Forearms: primary exercises	Secondary exercises
W1	Farmer Hold Walk; Seated Wrist Curl (palms up); Seated Wrist Extension (palms down); Hammer Curl	Alternating Dumbbell Curl; Dumbbell Romanian Deadlift; Bent-Over Dumbbell Row (two arms)
W2	Suitcase Hold (single dumbbell); Hammer-Grip Wrist Raise; Reverse Curl; Incline Hammer Curl	Single-Arm Dumbbell Row (hand and knee on bench); Underhand Bent-Over Row
W3	Seated Wrist Curl (palms up); Seated Wrist Extension (palms down); Reverse Curl; Cross-Body Hammer Curl; Hammer-Grip Wrist Raise; Dumbbell Finger Roll-and-Curl; Incline Hammer Curl; Isometric Curl Hold (90 degrees); Zottman Curl	-
W4	Farmer Hold Walk; Isometric Curl Hold (90 degrees); Seated Wrist Curl (palms up); Seated Wrist Extension (palms down); Suitcase Hold (single dumbbell); Forearm Pronation-Supination; Reverse Curl	Dumbbell Romanian Deadlift; Single-Arm Dumbbell Row (hand and knee on bench)
W5	Seated Wrist Extension (palms down); Seated Wrist Curl (palms up); Hammer Curl; Reverse Curl; Farmer Hold Walk; Hammer-Grip Wrist Raise; Isometric Curl Hold (90 degrees)	Underhand Bent-Over Row; 21s Curl (7 bottom half, 7 top half, 7 full); Alternating Dumbbell Curl
W6	Suitcase Hold (single dumbbell); Dumbbell Finger Roll-and-Curl; Incline Hammer Curl; Isometric Curl Hold (90 degrees); Cross-Body Hammer Curl; Seated Wrist Extension (palms down); Hammer-Grip Wrist Raise; Zottman Curl; Seated Wrist Curl (palms up); Hammer Curl	Dumbbell Romanian Deadlift; Underhand Bent-Over Row; 21s Curl (7 bottom half, 7 top half, 7 full)
W7	Farmer Hold Walk; Seated Wrist Extension (palms down); Isometric Curl Hold (90 degrees); Cross-Body Hammer Curl; Seated Wrist Curl (palms up); Reverse Curl; Incline Hammer Curl; Hammer Curl	Bent-Over Dumbbell Row (two arms); Single-Arm Dumbbell Row (hand and knee on bench); Dumbbell Romanian Deadlift
W8	Suitcase Hold (single dumbbell); Forearm Pronation-Supination; Isometric Curl Hold (90 degrees); Zottman Curl; Dumbbell Finger Roll-and-Curl; Hammer-Grip Wrist Raise; Seated Wrist Extension (palms down); Reverse Curl; Cross-Body Hammer Curl	Underhand Bent-Over Row; Bent-Over Dumbbell Row (two arms); 21s Curl (7 bottom half, 7 top half, 7 full)

Quadriceps

Week	Quadriceps: primary exercises	Secondary exercises
W1	Goblet Squat; Reverse Lunge; Step-Up (step board)	-
W2	Heel-Elevated Goblet Squat (heels on step board); Bulgarian Split Squat; Cossack Squat; Static Split Squat (2-second pause)	Bench Hip Thrust; Bear Hold (knees hovering)
W3	Sumo Goblet Squat; Step-Up (step board); Wall Sit; Lateral Step-Up; Reverse Lunge	-
W4	Walking Lunge; Lateral Step-Up; Cossack Squat; Single-Leg Bench Squat (sit-to-stand)	Bench Hip Thrust; Curtsy Lunge
W5	Goblet Squat; Bulgarian Split Squat; Static Split Squat (2-second pause); Reverse Lunge; Sumo Dumbbell Deadlift; Wall Sit; Step-Up (step board)	-
W6	Single-Leg Bench Squat (sit-to-stand); Heel-Elevated Goblet Squat (heels on step board); Goblet Squat; Wall Sit; Lateral Lunge; Cossack Squat; Lateral Step-Up	Bench Hip Thrust; Bear Hold (knees hovering); Curtsy Lunge
W7	Bulgarian Split Squat; Walking Lunge; Cossack Squat; Wall Sit; Step-Up (step board); Sumo Goblet Squat	Bench Hip Thrust
W8	Heel-Elevated Goblet Squat (heels on step board); Static Split Squat (2-second pause); Lateral Step-Up; Lateral Lunge; Wall Sit; Sumo Dumbbell Deadlift	Bear Hold (knees hovering); Curtsy Lunge

Hamstrings

Week	Hamstrings: primary exercises	Secondary exercises
W1	Dumbbell Romanian Deadlift	Reverse Lunge; Weighted Glute Bridge; Donkey Kick; Bent-Over Dumbbell Row (two arms)
W2	Single-Leg Romanian Deadlift (hand supported); Feet-Elevated Hamstring Bridge (heels on step board)	Bulgarian Split Squat; Bench Hip Thrust; Static Split Squat (2-second pause)
W3	Feet-Elevated Hamstring Bridge (heels on step board); Staggered-Stance (B-Stance) Romanian Deadlift	Single-Leg Glute Bridge; Standing Glute Kickback (hand on bench); Donkey Kick; Reverse Lunge
W4	Hamstring Bridge Walk-Out; Dumbbell Romanian Deadlift	Walking Lunge; Bench Hip Thrust
W5	Feet-Elevated Hamstring Bridge (heels on step board); Single-Leg Romanian Deadlift (hand supported); Staggered-Stance (B-Stance) Romanian Deadlift; Dumbbell Good Morning	Bulgarian Split Squat; Static Split Squat (2-second pause); Reverse Lunge; Sumo Dumbbell Deadlift; Single-Leg Glute Bridge; Standing Glute Kickback (hand on bench)
W6	Hamstring Bridge Walk-Out; Dumbbell Romanian Deadlift	Lateral Lunge; Bench Hip Thrust; Single-Leg Glute Bridge; Weighted Glute Bridge
W7	Staggered-Stance (B-Stance) Romanian Deadlift; Dumbbell Romanian Deadlift; Feet-Elevated Hamstring Bridge (heels on step board); Single-Leg Romanian Deadlift (hand supported)	Bent-Over Dumbbell Row (two arms); Bulgarian Split Squat; Walking Lunge; Bench Hip Thrust; Standing Glute Kickback (hand on bench)
W8	Hamstring Bridge Walk-Out; Staggered-Stance (B-Stance) Romanian Deadlift	Static Split Squat (2-second pause); Lateral Lunge; Sumo Dumbbell Deadlift; Single-Leg Glute Bridge; Bent-Over Dumbbell Row (two arms)

Glutes

Week	Glutes: primary exercises	Secondary exercises
W1	Goblet Squat; Reverse Lunge; Side-Lying Hip Abduction; Dumbbell Romanian Deadlift; Weighted Glute Bridge; Donkey Kick; Step-Up (step board)	Side Plank; Bird-Dog; Superman Hold; Forearm Plank
W2	Bulgarian Split Squat; Fire Hydrant; Single-Leg Romanian Deadlift (hand supported); Bench Hip Thrust; Feet-Elevated Hamstring Bridge (heels on step board); Static Split Squat (2-second pause)	Heel-Elevated Goblet Squat (heels on step board); Cossack Squat; Prone Snow Angel; Prone Cobra Hold
W3	Sumo Goblet Squat; Feet-Elevated Hamstring Bridge (heels on step board); Step-Up (step board); Frog Pump; Fire Hydrant; Staggered-Stance (B-Stance) Romanian Deadlift; Single-Leg Glute Bridge; Standing Glute Kickback (hand on bench); Donkey Kick; Side-Lying Hip Abduction; Lateral Step-Up; Reverse Lunge	Staggered-Stance Lawnmower Row; Prone Snow Angel; Side Plank; Wall Sit; Bird-Dog; Superman Hold; Bird-Dog Dumbbell Row; Prone Cobra Hold
W4	Walking Lunge; Lateral Step-Up; Frog Pump; Side-Lying Hip Abduction; Dumbbell Romanian Deadlift; Single-Leg Bench Squat (sit-to-stand); Bench Hip Thrust; Fire Hydrant; Curtsy Lunge	Glute-Bridge Dumbbell Press; Hamstring Bridge Walk-Out; Cossack Squat; Prone Cobra Hold
W5	Goblet Squat; Feet-Elevated Hamstring Bridge (heels on step board); Bulgarian Split Squat; Static Split Squat (2-second pause); Reverse Lunge; Fire Hydrant; Sumo Dumbbell Deadlift; Single-Leg Romanian Deadlift (hand supported); Staggered-Stance (B-Stance) Romanian Deadlift; Single-Leg Glute Bridge; Standing Glute Kickback (hand on bench); Step-Up (step board); Frog Pump	Prone Snow Angel; Side Plank; Wall Sit; Dumbbell Good Morning; Forearm Plank; Bird-Dog; Staggered-Stance Lawnmower Row
W6	Single-Leg Bench Squat (sit-to-stand); Goblet Squat; Side-Lying Hip Abduction; Dumbbell Romanian Deadlift; Bench Hip Thrust; Single-Leg Glute Bridge; Weighted Glute Bridge; Frog Pump; Fire Hydrant; Curtsy Lunge; Lateral Step-Up	Bird-Dog Dumbbell Row; Hamstring Bridge Walk-Out; Heel-Elevated Goblet Squat (heels on step board); Wall Sit; Lateral Lunge; Cossack Squat
W7	Bulgarian Split Squat; Staggered-Stance (B-Stance) Romanian Deadlift; Frog Pump; Walking Lunge; Dumbbell Romanian Deadlift; Bench Hip Thrust; Feet-Elevated Hamstring Bridge (heels on step board); Single-Leg Romanian Deadlift (hand supported); Standing Glute Kickback (hand on bench); Side-Lying Hip Abduction; Step-Up (step board); Sumo Goblet Squat	Prone Snow Angel; Cossack Squat; Wall Sit; Side Plank with Top-Leg Lift; Bird-Dog; Forearm Plank
W8	Static Split Squat (2-second pause); Lateral Step-Up; Sumo Dumbbell Deadlift; Single-Leg Glute Bridge; Staggered-Stance (B-Stance) Romanian Deadlift; Frog Pump; Fire Hydrant; Curtsy Lunge	Staggered-Stance Lawnmower Row; Glute-Bridge Dumbbell Press; Bird-Dog Dumbbell Row; Prone Cobra Hold; Heel-Elevated Goblet Squat (heels on step board); Hamstring Bridge Walk-Out; Lateral Lunge; Wall Sit; Forearm Plank; Prone Snow Angel

Calves

Week	Calves: primary exercises	Secondary exercises
W1	Standing Calf Raise (step board edge); Seated Calf Raise (dumbbells on knees)	Step-Up (step board)
W2	Single-Leg Calf Raise (step board edge); Calf Raise, Toes Turned Out (V-stance)	-
W3	Calf Raise, Toes Turned In; Donkey-Style Calf Raise (hands on bench)	Step-Up (step board)
W4	Single-Leg Calf Raise (step board edge); Tibialis Raise (heels on floor, toes up); Seated Calf Raise (dumbbells on knees); Pogo Hops; Donkey-Style Calf Raise (hands on bench)	Walking Lunge
W5	Calf Raise, Toes Turned Out (V-stance); Tibialis Raise (heels on floor, toes up); Standing Calf Raise (step board edge); Calf Raise, Toes Turned In	Step-Up (step board)
W6	Single-Leg Calf Raise (step board edge); Pogo Hops; Seated Calf Raise (dumbbells on knees); Donkey-Style Calf Raise (hands on bench)	-
W7	Calf Raise, Toes Turned Out (V-stance); Tibialis Raise (heels on floor, toes up); Single-Leg Calf Raise (step board edge)	Walking Lunge; Step-Up (step board)
W8	Pogo Hops; Calf Raise, Toes Turned In; Seated Calf Raise (dumbbells on knees); Standing Calf Raise (step board edge)	-

Upper abs

Week	Upper abs: primary exercises	Secondary exercises
W1	Slow Crunch	Dead Bug; Lying Leg Raise; Bicycle Crunch; Forearm Plank
W2	Reaching Crunch (long arms)	Hollow Body Hold (bent-knee version first); Bench Knee Tuck; Russian Twist
W3	Dumbbell-Weighted Crunch	Hollow Body Hold (bent-knee version first); Russian Twist
W4	Reaching Crunch (long arms); Bench Knees-Up Crunch	Lying Leg Raise; Russian Twist; Dead Bug; Bicycle Crunch
W5	Dumbbell-Weighted Crunch; Bench Knees-Up Crunch	Forearm Plank; Hollow Body Hold (bent-knee version first)
W6	Reaching Crunch (long arms)	Hollow Body Hold (bent-knee version first); Lying Leg Raise; Russian Twist; Dead Bug
W7	Dumbbell-Weighted Crunch; Bench Knees-Up Crunch; Reaching Crunch (long arms)	Russian Twist; Bicycle Crunch; Dead Bug; Forearm Plank; Hollow Body Hold (bent-knee version first)
W8	Slow Crunch	Dead Bug; Hollow Body Hold (bent-knee version first); Lying Leg Raise; Bench Knee Tuck; Forearm Plank; Russian Twist; Bicycle Crunch

Lower abs

Week	Lower abs: primary exercises	Secondary exercises
W1	Reverse Crunch; Lying Leg Raise	Dead Bug; Bicycle Crunch
W2	Hollow Body Hold (bent-knee version first); Flutter Kicks; Bench Knee Tuck	-
W3	Hollow Body Hold (bent-knee version first); Bench Leg Raise (hands gripping bench edge); Scissor Kicks; Alternating Leg Lowers	Cross-Body Mountain Climber
W4	Bench Knees-Up Crunch; Lying Leg Raise; Flutter Kicks; Scissor Kicks	Dead Bug; Bicycle Crunch
W5	Bench Knees-Up Crunch; Bench Leg Raise (hands gripping bench edge); Reverse Crunch; Hollow Body Hold (bent-knee version first)	Cross-Body Mountain Climber
W6	Hollow Body Hold (bent-knee version first); Lying Leg Raise; Scissor Kicks	Dead Bug
W7	Bench Knees-Up Crunch; Bench Leg Raise (hands gripping bench edge); Reverse Crunch; Flutter Kicks; Hollow Body Hold (bent-knee version first); Lying Windshield Wipers (bent knees)	Bicycle Crunch; Dead Bug; Cross-Body Mountain Climber
W8	Hollow Body Hold (bent-knee version first); Lying Leg Raise; Scissor Kicks; Bench Knee Tuck; Alternating Leg Lowers	Dead Bug; Bicycle Crunch

Obliques

Week	Obliques: primary exercises	Secondary exercises
W1	Bicycle Crunch; Side Plank; Alternating Heel Touches	-
W2	Suitcase Hold (single dumbbell); Russian Twist; Side Plank Hip Dip; High Plank Shoulder Tap; Side-Lying Oblique Crunch	-
W3	Side Plank; Cross-Body Mountain Climber; High Plank Shoulder Tap; Russian Twist	Scissor Kicks
W4	Side Plank Hip Dip; Russian Twist; Suitcase Hold (single dumbbell); Plank Dumbbell Drag (anti-rotation); Bicycle Crunch	Scissor Kicks
W5	Side Plank; Alternating Heel Touches; High Plank Shoulder Tap; Cross-Body Mountain Climber	-
W6	Suitcase Hold (single dumbbell); Russian Twist; Side Plank Hip Dip; Plank Dumbbell Drag (anti-rotation)	Scissor Kicks
W7	Russian Twist; Side Plank with Top-Leg Lift; Bicycle Crunch; Plank Dumbbell Drag (anti-rotation); Side-Lying Oblique Crunch; Lying Windshield Wipers (bent knees); Cross-Body Mountain Climber	-
W8	Suitcase Hold (single dumbbell); Side Plank Hip Dip; Alternating Heel Touches; Standing Dumbbell Side Bend; High Plank Shoulder Tap; Plank Dumbbell Drag (anti-rotation); Russian Twist; Bicycle Crunch	Scissor Kicks

Deep core

Week	Deep core: primary exercises	Secondary exercises
W1	Dead Bug; Side Plank; Bird-Dog; Forearm Plank; Stomach Vacuum (transverse abdominis hold)	Scapular Push-Up (push-up plus); Farmer Hold Walk; Goblet Squat; Lying Leg Raise; Dumbbell Pullover (across flat bench)
W2	Hollow Body Hold (bent-knee version first); Bear Hold (knees hovering); High Plank Shoulder Tap; Stomach Vacuum (transverse abdominis hold)	Single-Arm Dumbbell Row (hand and knee on bench); Suitcase Hold (single dumbbell); Heel-Elevated Goblet Squat (heels on step board); Bulgarian Split Squat; Flutter Kicks; Russian Twist; Side Plank Hip Dip; Single-Leg Romanian Deadlift (hand supported); Standard Push-Up; Pike Push-Up
W3	Hollow Body Hold (bent-knee version first); Half-Kneeling Single-Arm Press; Side Plank; Cross-Body Mountain Climber; Bird-Dog; Bird-Dog Dumbbell Row; High Plank Shoulder Tap; Stomach Vacuum (transverse abdominis hold)	Staggered-Stance Lawnmower Row; Sumo Goblet Squat; Bench Leg Raise (hands gripping bench edge); Scissor Kicks; Single-Leg Glute Bridge; Single-Arm Flat Dumbbell Press; Russian Twist; Alternating Leg Lowers
W4	Dead Bug; Plank Dumbbell Drag (anti-rotation); Stomach Vacuum (transverse abdominis hold)	Glute-Bridge Dumbbell Press; Farmer Hold Walk; Lying Leg Raise; Flutter Kicks; Side Plank Hip Dip; Russian Twist; Single-Arm Dumbbell Row (hand and knee on bench); Suitcase Hold (single dumbbell); Scissor Kicks
W5	Side Plank; Forearm Plank; Bird-Dog; High Plank Shoulder Tap; Hollow Body Hold (bent-knee version first); Cross-Body Mountain Climber	Goblet Squat; Bulgarian Split Squat; Bench Leg Raise (hands gripping bench edge); Single-Leg Romanian Deadlift (hand supported); Single-Leg Glute Bridge; Staggered-Stance Lawnmower Row; Feet-Elevated Push-Up (feet on step board); Farmer Hold Walk; Pike Push-Up
W6	Bird-Dog Dumbbell Row; Hollow Body Hold (bent-knee version first); Dead Bug; Stomach Vacuum (transverse abdominis hold); Plank Dumbbell Drag (anti-rotation); Bear Hold (knees hovering)	Standard Push-Up; Suitcase Hold (single dumbbell); Heel-Elevated Goblet Squat (heels on step board); Goblet Squat; Lying Leg Raise; Scissor Kicks; Russian Twist; Side Plank Hip Dip; Single-Leg Glute Bridge; Archer Push-Up
W7	Dead Bug; Bird-Dog; Forearm Plank; Renegade Row; Plank Dumbbell Drag (anti-rotation); Stomach Vacuum (transverse abdominis hold); Hollow Body Hold (bent-knee version first); Cross-Body Mountain Climber	Single-Arm Dumbbell Row (hand and knee on bench); Farmer Hold Walk; Bulgarian Split Squat; Bench Leg Raise (hands gripping bench edge); Flutter Kicks; Russian Twist; Side Plank with Top-Leg Lift; Single-Leg Romanian Deadlift (hand supported); Feet-Elevated Push-Up (feet on step board); Single-Arm Flat Dumbbell Press; Sumo Goblet Squat; Lying Windshield Wipers (bent knees)
W8	Bird-Dog Dumbbell Row; Dead Bug; Hollow Body Hold (bent-knee version first); Half-Kneeling Single-Arm Press; Bear Hold (knees hovering); Stomach Vacuum (transverse abdominis hold); Forearm Plank; High Plank Shoulder Tap; Plank Dumbbell Drag (anti-rotation)	Staggered-Stance Lawnmower Row; Glute-Bridge Dumbbell Press; Suitcase Hold (single dumbbell); Heel-Elevated Goblet Squat (heels on step board); Lying Leg Raise; Scissor Kicks; Side Plank Hip Dip; Single-Leg Glute Bridge; Archer Push-Up; Standard Push-Up; Pike Push-Up; Russian Twist; Alternating Leg Lowers

Lower back

Week	Lower back: primary exercises	Secondary exercises
W1	Bird-Dog; Superman Hold; Bent-Over Dumbbell Row (two arms)	Dumbbell Romanian Deadlift
W2	Prone Snow Angel; Prone Cobra Hold	Wide-Elbow Bent-Over Row (rear-back emphasis); Single-Leg Romanian Deadlift (hand supported); Feet-Elevated Hamstring Bridge (heels on step board); Underhand Bent-Over Row
W3	Prone Snow Angel; Bird-Dog; Superman Hold; Prone Cobra Hold	Feet-Elevated Hamstring Bridge (heels on step board); Staggered-Stance (B-Stance) Romanian Deadlift; Bird-Dog Dumbbell Row
W4	Prone Cobra Hold	Wide-Elbow Bent-Over Row (rear-back emphasis); Hamstring Bridge Walk-Out; Dumbbell Romanian Deadlift
W5	Prone Snow Angel; Dumbbell Good Morning; Bird-Dog	Underhand Bent-Over Row; Wide-Elbow Bent-Over Row (rear-back emphasis); Feet-Elevated Hamstring Bridge (heels on step board); Sumo Dumbbell Deadlift; Single-Leg Romanian Deadlift (hand supported); Staggered-Stance (B-Stance) Romanian Deadlift
W6	-	Bird-Dog Dumbbell Row; Hamstring Bridge Walk-Out; Dumbbell Romanian Deadlift; Underhand Bent-Over Row; Wide-Elbow Bent-Over Row (rear-back emphasis)
W7	Bent-Over Dumbbell Row (two arms); Prone Snow Angel; Bird-Dog	Staggered-Stance (B-Stance) Romanian Deadlift; Dumbbell Romanian Deadlift; Feet-Elevated Hamstring Bridge (heels on step board); Single-Leg Romanian Deadlift (hand supported)
W8	Prone Cobra Hold; Prone Snow Angel; Bent-Over Dumbbell Row (two arms)	Bird-Dog Dumbbell Row; Wide-Elbow Bent-Over Row (rear-back emphasis); Hamstring Bridge Walk-Out; Sumo Dumbbell Deadlift; Staggered-Stance (B-Stance) Romanian Deadlift; Underhand Bent-Over Row

Hip abductors / adductors

Week	Hip abductors / adductors: primary exercises	Secondary exercises
W1	Side-Lying Hip Abduction; Side-Lying Hip Adduction	-
W2	Fire Hydrant; Cossack Squat	-
W3	Sumo Goblet Squat; Fire Hydrant; Side-Lying Hip Adduction; Side-Lying Hip Abduction	Frog Pump; Lateral Step-Up
W4	Cossack Squat; Side-Lying Hip Abduction; Side-Lying Hip Adduction; Fire Hydrant; Curtsy Lunge	Lateral Step-Up; Frog Pump
W5	Side-Lying Hip Adduction; Fire Hydrant; Sumo Dumbbell Deadlift	Frog Pump
W6	Lateral Lunge; Side-Lying Hip Abduction; Fire Hydrant; Cossack Squat; Curtsy Lunge	Frog Pump; Lateral Step-Up
W7	Cossack Squat; Side Plank with Top-Leg Lift; Side-Lying Hip Adduction; Side-Lying Hip Abduction; Sumo Goblet Squat	Frog Pump
W8	Lateral Lunge; Sumo Dumbbell Deadlift; Fire Hydrant; Side-Lying Hip Adduction; Curtsy Lunge	Lateral Step-Up; Frog Pump

Trapezius / rhomboids

Week	Trapezius / rhomboids: primary exercises	Secondary exercises
W1	Chest-Supported Row (incline bench); Incline-Bench Prone Y-T-W Raise; Dumbbell Shrug with 3-Second Squeeze	Scapular Push-Up (push-up plus); Farmer Hold Walk; Bent-Over Rear-Delt Raise; Superman Hold
W2	Wide-Elbow Bent-Over Row (rear-back emphasis); Prone Snow Angel; Prone Cobra Hold	Suitcase Hold (single dumbbell); Incline-Bench Prone Rear-Delt Raise
W3	Incline-Bench Prone Y-T-W Raise; Prone Snow Angel; Dumbbell Shrug with 3-Second Squeeze; Prone Cobra Hold; Wall Angel	Superman Hold
W4	Chest-Supported Row (incline bench); Wide-Elbow Bent-Over Row (rear-back emphasis); Dumbbell Shrug with 3-Second Squeeze; Prone Cobra Hold; Incline-Bench Prone Y-T-W Raise; Wall Angel	Farmer Hold Walk; Bent-Over Rear-Delt Raise; Suitcase Hold (single dumbbell); Scaption Raise (thumbs-up Y raise)
W5	Wide-Elbow Bent-Over Row (rear-back emphasis); Prone Snow Angel; Chest-Supported Row (incline bench); Wall Angel	Incline-Bench Prone Rear-Delt Raise; Farmer Hold Walk
W6	Chest-Supported Row (incline bench); Incline-Bench Prone Y-T-W Raise; Wide-Elbow Bent-Over Row (rear-back emphasis); Wall Angel	Suitcase Hold (single dumbbell); Bent-Over Rear-Delt Raise; Scaption Raise (thumbs-up Y raise)
W7	Incline-Bench Prone Y-T-W Raise; Prone Snow Angel; Dumbbell Shrug with 3-Second Squeeze; Chest-Supported Row (incline bench); Wall Angel	Farmer Hold Walk; Incline-Bench Prone Rear-Delt Raise; Scaption Raise (thumbs-up Y raise)
W8	Wide-Elbow Bent-Over Row (rear-back emphasis); Prone Cobra Hold; Prone Snow Angel; Wall Angel	Suitcase Hold (single dumbbell); Scaption Raise (thumbs-up Y raise)

Part 5: Muscle Group Coverage Matrix

Numbers show in how many of the 8 weeks that muscle group receives primary (first table) or secondary (second table) work on that day. "-" means none. Sunday is active recovery (mobility only).

Primary involvement

Muscle group	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Chest	8/8	-	-	-	8/8	8/8	mobility
Back (lats / mid-back)	8/8	-	-	-	8/8	1/8	mobility
Shoulders	1/8	-	8/8	-	7/8	7/8	mobility
Biceps / brachialis	8/8	-	8/8	-	8/8	8/8	mobility
Triceps	1/8	-	8/8	-	1/8	8/8	mobility
Forearms	8/8	-	5/8	-	8/8	6/8	mobility
Quadriceps	-	8/8	-	5/8	-	7/8	mobility
Hamstrings	-	6/8	-	8/8	-	-	mobility
Glutes	-	8/8	-	8/8	-	8/8	mobility
Calves	-	8/8	-	8/8	-	1/8	mobility
Upper abs	8/8	-	-	-	-	-	mobility
Lower abs	7/8	8/8	-	-	2/8	4/8	mobility
Obliques	3/8	-	8/8	-	7/8	7/8	mobility
Deep core	5/8	-	4/8	8/8	8/8	2/8	mobility
Lower back	4/8	-	-	6/8	4/8	-	mobility
Hip abductors / adductors	-	8/8	1/8	6/8	-	4/8	mobility
Trapezius / rhomboids	8/8	-	-	2/8	8/8	2/8	mobility

Secondary involvement (days on which the group is trained only as a supporting muscle)

Muscle group	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Chest	-	-	2/8	-	-	-	mobility
Back (lats / mid-back)	-	-	6/8	-	-	2/8	mobility
Shoulders	7/8	-	-	4/8	1/8	-	mobility
Biceps / brachialis	-	-	-	-	-	-	mobility
Triceps	7/8	-	-	-	7/8	-	mobility
Forearms	-	-	1/8	4/8	-	-	mobility
Quadriceps	-	-	-	2/8	2/8	1/8	mobility
Hamstrings	1/8	2/8	-	-	2/8	3/8	mobility
Glutes	6/8	-	4/8	-	5/8	-	mobility
Calves	-	-	-	-	-	3/8	mobility
Upper abs	-	5/8	5/8	5/8	3/8	3/8	mobility
Lower abs	1/8	-	3/8	3/8	-	1/8	mobility
Obliques	-	3/8	-	-	-	-	mobility
Deep core	2/8	8/8	4/8	-	-	5/8	mobility
Lower back	3/8	6/8	-	2/8	1/8	-	mobility
Hip abductors / adductors	-	-	-	-	-	2/8	mobility
Trapezius / rhomboids	-	-	6/8	2/8	-	2/8	mobility

Part 6: Tracking and Assessment

Baseline Assessment (before Week 1)

Measure	Baseline	Notes
Date		
Body weight (kg)		
Body fat (%)		
Muscle mass (%)		
Waist (cm)		
Chest (cm)		
Right upper arm (cm)		
Left upper arm (cm)		
Thigh (cm, mid)		
Max push-ups (clean reps)		
Wall sit (seconds)		
Plank (seconds)		
Resting heart rate (bpm)		
Running stamina check (easy 20 min jog: comfortable? Y/N)		

Tracking Sheet: Week 1 (Phase 1: Foundation (Medium Intensity))

Day	Workout done (Y/N)	Cardio (min)	Breathing done (Y/N)	Soreness 1-5	Recovery 1-5	Notes

Wed						
Thu						
Fri						
Sat						
Sun						

Weekly measures	Value
Body weight (kg)	
Body fat (%)	
Muscle mass (%)	
Average sleep (hours)	
Average protein (g/day)	

Exercise log (record dumbbell weight, and sets x reps completed)

Day	Exercise	Prescribed	Weight used	Sets x reps done	RIR
Mon	Flat Dumbbell Bench Press	3 x 10-12			
Mon	Chest-Supported Row (incline bench)	3 x 10-12			
Mon	Incline Dumbbell Fly	3 x 12			
Mon	Incline-Bench Prone Y-T-W Raise	3 x 10			
Mon	Scapular Push-Up (push-up plus)	2 x 12			
Mon	Farmer Hold Walk	3 x 40 s			
Mon	Slow Crunch	3 x 15			
Mon	Single-Arm Incline-Bench Preacher Curl	3 x 12/arm			
Mon	Dead Bug	3 x 8/side			
Tue	Goblet Squat	5 x 12			
Tue	Reverse Lunge	4 x 10/leg			
Tue	Side-Lying Hip Abduction	3 x 15/side			
Tue	Side-Lying Hip Adduction	2 x 15/side			
Tue	Standing Calf Raise (step board edge)	3 x 15			
Tue	Reverse Crunch	3 x 12			
Tue	Lying Leg Raise	3 x 10			
Wed	Seated Dumbbell Shoulder Press	5 x 10-12			
Wed	Standing Lateral Raise	5 x 12-15			
Wed	Bent-Over Rear-Delt Raise	4 x 12-15			
Wed	Alternating Dumbbell Curl	3 x 12			
Wed	Two-Hand Overhead Dumbbell Extension	3 x 12			
Wed	Bicycle Crunch	3 x 20			
Wed	Side Plank	2 x 25 s/side			
Thu	Dumbbell Romanian Deadlift	5 x 12			
Thu	Weighted Glute Bridge	5 x 15			
Thu	Donkey Kick	4 x 15/side			
Thu	Seated Calf Raise (dumbbells on knees)	3 x 15			
Thu	Bird-Dog	3 x 8/side			

Day	Exercise	Prescribed	Weight used	Sets x reps done	RIR
Thu	Superman Hold	3 x 10			
Fri	Bent-Over Dumbbell Row (two arms)	5 x 10-12			
Fri	Incline Push-Up (hands on bench)	5 x 12-15			
Fri	Dumbbell Shrug with 3-Second Squeeze	5 x 12			
Fri	Seated Wrist Curl (palms up)	2 x 15			
Fri	Seated Wrist Extension (palms down)	2 x 15			
Fri	Forearm Plank	3 x 30 s			
Fri	Seated Alternating Curl with Supination	3 x 12			
Fri	Stomach Vacuum (transverse abdominis hold)	3 x 20 s			
Sat	Hammer Curl	5 x 12			
Sat	Dumbbell Triceps Kickback	5 x 12			
Sat	Step-Up (step board)	5 x 10/leg			
Sat	Dumbbell Pullover (across flat bench)	3 x 12			
Sat	Alternating Heel Touches	3 x 20			
Sat	Step-board cardio finisher	6 min

Review questions

• Which exercises improved the most (reps, tempo or difficulty)?
• Which muscle groups need more attention in the next cycle?
• Did recovery, sleep and soreness stay in a healthy range?
• Did the waist shrink while arms, shoulders and legs grew? If weight rose faster than 0.2 kg per week, reduce calories by 100-150 kcal.

Next step after 8 weeks: take an easy recovery week, then repeat the cycle with new exercise variations or heavier equipment if available.
